A Place in the Rain Forest Darryl Cole-Christensen, 2010-06-28 In the 1950s Darryl Cole Christensen and his family were among the first settlers of the Coto Brus, an almost impenetrable mountainous rain forest region of southeastern Costa Rica. In this evocative book he captures the elemental struggles and rewards of settling a new frontier, an experience forever closed to most people in Western urbanized society. With the perspective of more than forty years residence in the Coto Brus, Cole Christensen ably describes both the settlers' dreams of bringing civilization and progress to the rain forest and the sweeping and irreversible changes they caused throughout the ecosystem as they cut the rain forest down. Writing neither to apologize for nor to defend their actions, he instead illuminates the personal and subjective factors that cause people to risk danger and hardship for the uncertain rewards of settling a frontier. In his own words, Cole Christensen says, "This is a book for the scientist who wants to recapture a sense of an incalculable world departed for the student who asks, 'How is it that our forebears changed and restructured this land?' For the adventurer who dreams of the expanse of frontiers for every person who, having passed once through the darkening forest along a path in twilight stillness, looks back to find that a blanket of murmurs remains."

Case Studies in Educational Psychology Patricia P. Willems, Alyssa R. Gonzalez-DeHass, 2017-12-06 This case study book serves as a valuable tool for professors and instructors of educational psychology. It contains 18 cases that represent current areas of interest in Educational Psychology, embedded within current challenges that teachers face in today's elementary grade classrooms. The cases are organized into six major parts: Human Development, Individual Differences and Diversity, Learning Theories, Motivation, Classroom Management, Instructional Approaches and Assessment and Evaluation. Each case describes a detailed teaching scenario written from either the student or the teacher's perspective. To engage students in critical thinking, perspective taking, analysis, problem solving and decision making, the cases have been intentionally written without a conclusion. Because the cases are open-ended, it allows the professor or instructor more flexibility and autonomy in how they use the cases. Each case is followed by thought-provoking questions highlighting the significant issues in the case from which to analyze the case and apply various theoretical viewpoints. While the cases do not replace actual classroom experience, they present a way to immerse students in the classroom's culture by providing them with real-life teaching examples.
