Master Builder The:

The Master Builder Charles Sale, 1930 *The Master Builder* Henrik Ibsen, 1991 **The Master Builder** Henrik Ibsen, 1892 *The Master Builder* Henrik Ibsen, 2019-11-20

Henrik Ibsen's *The Master Builder* delves into the profound themes of ambition, creation, and the psychological underpinnings of desire. Set within the realm of an architect who grapples with his own artistic integrity and the burden of his past, the play unfolds in a richly symbolic style, capturing the essence of modernist literature through its exploration of human consciousness. Ibsen employs sharp dialogue and vivid imagery, blending reality with the surreal in a manner that reflects the pressures of societal expectations and individual aspiration, portraying the existential quandaries of a man on the brink of self-destruction as he seeks redemption through his work and personal relationships.

Henrik Ibsen (1828-1906), often heralded as the father of modern drama, was a revolutionary playwright whose works challenged the conventions of 19th-century society. Growing up in a country grappling with its identity and societal norms, Ibsen developed a critical eye towards the human condition, which greatly influenced *The Master Builder*. His exploration of psychological depth and the disillusionment of the individual emerged from his formative experiences, including the societal constraints imposed on creativity and autonomy. This compelling play is recommended for readers interested in the intersection of art and existential inquiry. Ibsen's masterful character study not only invites reflection on the price of ambition but also resonates with contemporary audiences grappling with their own aspirations in an increasingly complex world.

The Master Builder Henrik Ibsen, 1955 *Pietro DiDonato, the Master Builder* Matthew Diomedes, 1995

In *Pietro DiDonato the Master Builder*, author Matthew Diomedes explores the role of the immigrant Italian American writer in twentieth-century American letters by examining the life and work of the novelist, dramatist, and essayist Pietro DiDonato. Diomedes uses the text of two lengthy interviews with the writer to discover the themes of love, death, women, beauty, rebellion,

and the mystery of life that can be found in DiDonato's works. He also touches on DiDonato's writing process. DiMede then incorporates these concepts into a critical analysis of several of DiDonato's works including his novels *This Woman*, *Christ in Concrete*, and *Three Circles of Light*; a play *The Love of Annunziata*; two biographies *Immigrant Saint* and *The Life of Mother Cabrini*; and an essay *Christ in Plastic*. Central to DiMede's analysis are two concepts of analyst Carl Jung that dreams can prove valuable in understanding ourselves and that full human realization occurs when a person takes on a father/male component and a mother/female component. DiMede also explores the development of DiDonato's autobiographical character Paul Paolo in three novels and a play. He then demonstrates the value of dreams by tracing Paul's dream/nightmare in *Christ in Concrete* through DiDonato's oeuvre to the character's fullest development in *This Woman*, the pinnacle of DiDonato's work. Besides exploring the Jungian concepts in DiDonato's biographies, DiMede demonstrates how love is the concrete that is central to the author's work.

The Master Builder (Hardcover Library Edition) Henrik Ibsen, 2024-04-28

Master Builder (Firm), 1915

The Wise Master Builder Nigel Hiscock, 2018-05-08 This title was first published in 2000. Did the plan of medieval churches have any underlying symbolic meaning? This work re-opens the debate about the importance of geometry and symbolism in medieval architectural design and argues the case for attributing an intellectual meaning to the planning of abbeys and cathedrals. In challenging prevailing claims for the use of arithmetical ratios in architectural design, notably those based on the square root of two, Dr Hiscock advances a perspective consisting of proportions derived from the figures of Platonic geometry: the square, the equilateral triangle, and the pentagon, and provides evidence for the symbolic interpretation of these figures. The investigation further reveals whole series of geometric relationships between some of England's most celebrated Norman cathedrals, such as Norwich or Durham, together with a wide sample from the Continent, from Old St Peter's in Rome to Chartres Cathedral, and sets out a comprehensive design method in each case. Hiscock first demonstrates the proposition that the ideas of Christian Platonism, including number and geometry, remained current and were employed in the thought of the early Middle Ages. In particular, he argues that they can be associated with the leading persons in the 10th-century revival of monasticism and that

they found expression in the white mantle of churches that spread across Western Europe at the end of the first millennium AD The book then provides a detailed analysis of the geometric proportions of church plans between the 9th and 12th centuries in Germany France and in England This research seeks to demonstrate that a coherent sequence of geometric forms can be seen in these plans forms which correspond to the key figures of Platonic geometry as understood in the context of Christian Platonist thought In conclusion the author shows how the system of design proposed could be set out on site using the known working methods of medieval masons
