Master Your Motivation Susan Fowler, 2019-06-04 If you want to accomplish what's important to you discipline and willpower won't get you where you need to go In this iconoclastic new book Susan Fowler reveals compelling insights and actions to help you master and maintain your motivation Motivation is at the heart of everything you do and everything you want to do but don't Unfortunately the ways we typically motivate ourselves don't work Relying on sheer determination eventually becomes exhausting it's not sustainable And even setting goals can backfire if you're not setting them for the right reasons Susan Fowler says motivation is energy and what matters is the quality not the quantity Traditional motivators such as fear guilt or the promise of a reward provide low quality short term energy Drawing on the latest empirical research she proves that high quality optimal motivation is a skill that you can learn and apply Science tells us that satisfying three basic needs for choice connection and competence is essential to optimal motivation You need to feel like you've picked your path not that you're being driven down it Your goal should be linked to people or a purpose meaningful to you And you want to continually learn and grow Through practical exercises and eye opening stories Fowler shows you how to identify and shift the quality of your motivation The skill to master your motivation is important it may be your greatest opportunity to evolve grow in wisdom and be the light the world so desperately needs Singapore National Bibliography, 1991

Mastered by the Clock Mark M. Smith, 2000-11-09 *Mastered by the Clock* is the first work to explore the evolution of clock based time consciousness in the American South Challenging traditional assumptions about the plantation economy's reliance on a premodern nature based conception of time Mark M Smith shows how and why southerners particularly masters and their slaves came to view the clock as a legitimate arbiter of time Drawing on an extraordinary range of eighteenth and nineteenth century archival sources Smith demonstrates that white southern slaveholders began to incorporate this new sense of time in the 1830s Influenced by colonial merchants' fascination with time thrift by a long held familiarity with urban public time by the transport and market revolution in the South and by their own qualified embrace of modernity slaveowners began to purchase timepieces in growing numbers adopting a clock based conception of time and attempting in turn to instill a similar consciousness in their slaves But forbidden to own watches themselves slaves did not internalize this idea to the same degree as their masters and slaveholders found themselves dependent as much on the whip as on the clock when enforcing slaves' obedience to time Ironically Smith shows freedom largely consolidated the dependence of masters as well as freedpeople on the clock
