Macrosociology Frank W. Elwell, 2015-12-03 Social theorists dwell on the canonical works of Marx Weber and Durkheim but little on the theories of the major contemporary macrotheorists This book fills this gap with a focus on the work of four modern theorists who have taken on the larger questions spawned by classical social theory C Wright Mills Marvin Harris Immanuel Wallerstein and Gerhard Lenski have examined such phenomena and processes as the rise and impact of capitalism the centralization and enlargement of authority inequality and the historical intensification of production and populations Borrowing what is useful from the classics as well as relying on contemporary practitioners and empirical evidence each theorist adds his own insights and interpretations in constructing a comprehensive perspective of sociocultural stability and change This book fully synthesizes and documents each perspective using language and examples

that resonate with the general reader A short biography on each theorist is also provided

Theories of Alienation R.F. Geyer, D.R. Schweitzer, 2012-12-06 The original papers which appear in this volume were initially presented in a series of sessions of the Ad Hoc Group on Alienation Theory and Research at the 1974 World Congress of Sociology in Toronto Canada This group was organized by the editors as a result of their longstanding research and teaching interest in the field The purpose of the Toronto sessions was to provide an international forum where scholars and researchers could come to gether for a personal exchange of ideas and research findings To our know ledge this was the first forum of its kind concerned specifically with aliena tion theory and research More than fifty theoretical and empirical papers from thirteen countries and several overlapping disciplines were organized into panels and workshops during the span of four days The response to these sessions indicates that interest in the study of alienation by philosophers and social scientists continues unabated The Toronto sessions were organized largely around a fundamental concern for further theoretical development and conceptual clarification in the alienation field The papers selected for this volume reflect this thematic concern Although many excellent empirical papers were presented it was

generally felt that meaningful empirical research would benefit from a continued elaboration and refinement of alienation theory. The present collection is consequently geared to problems of meaning theory and method. Considerable emphasis is also placed on a critical evaluation of the alienation theme as it has evolved from social philosophy to empirical social research.

Microsociology Kai-Olaf Maiwald, Inken Suerig, 2019-09-05 This book offers an unprecedented integrative account of the shape of social order on the microsocial level. Dealing with the basic dimensions of interaction, the authors examine the major factors which influence structure in social interaction by applying various theoretical concepts. Although the concept of microsociology is usually associated with symbolic interactionism, social psychology, the works of George Herbert Mead and Erving Goffman, and with qualitative methodologies, this book reaches beyond interactionist theories, claiming that no single school of thought covers the different dimensions necessary for understanding the basics of microsociology. As such, the book provides something of a microsociologist's tool kit, analyzing an array of theoretical approaches which offer the best conceptual solutions and interpreting them in a way that is independent of their specific theoretical language. Such theoretical traditions include systems theory, conversation analysis, structuralism, the theory of knowledge, and the philosophy of language. Providing a distinct systematic and incremental approach to the subject, this book fills an important gap in sociological literature. Written in an accessible style and offering new insights into the area of microsociology, it will appeal to students and scholars of the social sciences and to those with interests in sociology, microsociology, interactionism, and sociological theory.

Handbook of Marriage and the Family Suzanne K. Steinmetz, Marvin B. Sussman, 2013-11-11 The lucid straightforward Preface of this Handbook by the two editors and the comprehensive perspectives offered in the Introduction by one of them leave little for a Foreword to add It is therefore limited to two relevant but not intrinsically related points vis a vis research on marriage and the family in the interval since the first Handbook Christensen 1964 appeared namely the impact on this research of the politicization of the New Right and of the Feminist Enlightenment beginning in the mid sixties about the time of the first Handbook In the late 1930s Willard Waller noted Fifty years or more ago about 1890 most people had the greatest respect for the institution called the family and wished to learn nothing whatever about it Everything that concerned the life of men and women and their children was shrouded from the light Today much of that has been changed Gone is the concealment of the way in which life begins gone the irrational sanctity of the home The aura of sentiment which once protected the family from discussion clings to it no more We want to learn as much about it as we can and to understand it as thoroughly as possible for there is a rising recognition in America that vast numbers of its families are sick from internal frustrations and from external buffeting We are engaged in the process of reconstructing our family institutions through criticism and discussion 1938 pp 3 4
