Methods in Microbiology, 1987-12-03 Methods in Microbiology **Molecular Techniques in Food Biology** Aly Farag El Sheikha, Robert E. Levin, Jianping Xu, 2018-01-02 Molecular Techniques in Food Biology Safety Biotechnology Authenticity Traceability explores all aspects of microbe food interactions especially as they pertain to food safety Traditional morphological physiological and biochemical techniques for the detection differentiation and identification of microorganisms have severe limitations As an alternative many of those responsible for monitoring food safety are turning to molecular tools for identifying foodborne microorganisms This book reviews the latest molecular techniques for detecting identifying and tracing microorganisms in food addressing both good foodborne microbes such as those used for fermentation and in probiotics and harmful ones responsible for foodborne illness and food quality control problems Molecular Techniques in Food Biology Safety Biotechnology Authenticity Traceability brings together contributions by leading international authorities in food biology from academe industry and government Chapters cover food microbiology food mycology biochemistry microbial ecology food biotechnology and bio processing food authenticity food origin traceability and food science and technology Throughout special emphasis is placed on novel molecular techniques relevant to food biology research and for monitoring and assessing food safety and quality Brings together contributions from scientists at the leading edge of the revolution in molecular food biology Explores how molecular techniques can satisfy the dire need to deepen our understanding of how microbial communities develop in foods of all types and in all forms Covers all aspects of food safety and hygiene microbial ecology food biotechnology and bio processing food authenticity food origin traceability and more Fills a yawning gap in the world literature on food traceability using molecular techniques This book is an important working resource for professionals in agricultural food science biomedicine and government involved in food regulation and safety It is also an excellent reference for advanced students in agriculture food science and food technology biochemistry microbiology and biotechnology as well as academic researchers in those fields **Trends in Immunolabelled and Related Techniques** Eltayb Abuelzein, 2012-04-27 The book is coined to provide a professional insight into the different trends of immunoassay and related techniques It encompasses 22 chapters which are grouped into two sections The first section consists of articles dealing with emerging uni and multiplex immunolabelled methods employed in the various areas of research The second section includes review articles which introduce the researchers to some immunolabelled techniques which are of vital significance such as the use of the conjugates of the Staphylococcus aureus protein A and the Streptococcus Spps protein G in immunolabelled assay systems the use of bead based assays and an overview on the laboratory assay systems The book provides technological innovations that are expected to provide an efficient channel for developments in immunolabelled and related techniques It is also most useful for researchers and post graduate students in all fields where immunolabelled techniques are applicable The Genera of Lactic Acid Bacteria W.H.N Holzapfel, B.J.

Wood,2012-12-06 The Lactic Acid Bacteria is planned as a series in a number of volumes and the interest shown in it appears to justify a cautious optimism that a series comprising at least five volumes will appear in the fullness of time This being so I feel that it is desirable to introduce the series by providing a little of the history of the events which culminated in the decision to produce such a series I also wish to indicate the boundaries of the group The Lactic Acid Bacteria as I have defined them for the present purposes and to outline my hopes for future topics in the series Historical background lowe my interest in the lactic acid bacteria LAB to the late Dr Cyril Rainbow who introduced me to their fascinating world when he offered me a place with him to work for a PhD on the carbohydrate metabolism of some lactic rods isolated from English beer breweries by himself and others notably Dr Dora Kulka He was particularly interested in their preference for maltose over glucose as a source of carbohydrate for growth expressed in most cases as a more rapid growth on the disaccharide but one isolate would grow only on maltose Eventually we showed that maltose was being utilised by direct fermentation as the older texts called it specifically by the phosphorylase which had first been demonstrated for maltose by Doudoroff and his associates in their work on maltose metabolism by a strain of Neisseria meningitidis
