Frank-Kamenetskaya, Dmitry Yu. Vlasov, Elena G. Panova, Tatiana V. Alekseeva, 2023-11-20 The book represents a collection of papers presented at VII International Symposium Biogenic abiogenic interactions in natural and anthropogenic systems that was held on 26-29 September 2022 in Saint Petersburg Russia. Papers in this book cover a wide range of topics connecting with interactions between biogenic and abiogenic components in lithosphere, biosphere and technosphere. The main regarding topics are following: biomineralization in living organisms and nature-like materials; biomineralization in geosystems; geochemistry of biogenic abiogenic systems; biomineral interactions in soil; interaction of microorganisms with natural and artificial materials; medical geology; philosophical aspects of interdisciplinary researches. **Applied Soil**

Physical Properties, Drainage, and Irrigation Strategies. Lambert B. McCarty, Lewis Ray Hubbard, Jr., Virgil

Quisenberry, 2015-12-16 The book is a realistic blend of basic knowledge and understanding in soil physical properties. It will enable the reader to scientifically analyze soils to develop practical and successful means of providing sufficient drainage and to develop science-based irrigation strategies. Only basic mathematical knowledge is necessary to understand and apply the proven principles covered. With limited resources that are increasing significantly in costs, the book blends the ideal concept of providing sufficient drainage and irrigation based on using soil physical properties but with financial limitations in mind. One traditional problem with many Soil Physics Drainage and Irrigation based texts is the prerequisite of understanding complicated calculus-based mathematics. Although necessary for a theory-based text, our text was developed with practitioners in mind where such complicated mathematics was avoided but referenced if the reader wishes to further explore the specific topic. Another problem with many traditional texts is the lack of practical examples or case studies allowing readers to relate their specific scenarios to similar types of situations. We have purposely included numerous examples and practical field experiences. This is especially true when many of the theoretical ideals are covered followed by explanations of how such ideals can be applied in the laboratory and field. Precision Agriculture Technology for Crop

Farming Qin Zhang, 2015-10-15 This book provides a review of precision agriculture technology development followed by a presentation of the state of the art and future requirements of precision agriculture technology. It presents different styles of precision agriculture technologies suitable for large-scale mechanized farming, highly automated community-based mechanized production and fully mechanized farming practices commonly seen in emerging economic regions. The book emphasizes the introduction of core technical features of sensing, data processing and interpretation technologies, crop modeling and production control theory, intelligent machinery and field robots for precision agriculture production.
