Research Methods for Environmental Studies Mark Kanazawa, 2017-10-18 The methodological needs of environmental studies are unique in the breadth of research questions that can be posed calling for a textbook that covers a broad swath of approaches to conducting research with potentially many different kinds of evidence Written specifically for social science based research into the environment this book covers the best practice research methods most commonly used to study the environment and its connections to societal and economic activities and objectives Over five key parts Kanazawa introduces quantitative and qualitative approaches mixed methods and the special requirements of interdisciplinary research emphasizing that methodological practice should be tailored to the specific needs of the project Within these parts detailed coverage is provided on key topics including the identification of a research project spatial analysis ethnography approaches interview technique and ethical issues in environmental research Drawing on a variety of extended examples to encourage problem based learning and fully addressing the challenges associated with interdisciplinary investigation this book will be an essential resource for students embarking on courses exploring research methods in environmental studies

Research

Handbook on Employee Pro-Environmental Behaviour Victoria K. Wells, Diana Gregory-Smith, Danae Manika, 2018 This Research Handbook brings together leading academics of employee pro environmental behaviour to highlight the key features and challenges of this growing field The international contributors draw on studies from across the methodological spectrum examine employee behaviour and discuss how pro environmental behaviour can be fostered and encouraged inspecting the impact for organisations

Environmental Design Evaluation Arnold Friedmann, Craig Zimring, Ervin Zube, 2013-12-14 As the nature of the field of environment behavior relations is interdisciplinary the collaboration of three persons of diverse professional backgrounds in writing this book is therefore not surprising This collaboration started in 1972 with the offering of a graduate seminar Environment Behavior and Design Evaluation at the University of Massachusetts Several research projects dealing with design evaluation which have been conducted at the University are also included as case studies in this book Chapter III the ELEMN study and the Visitor Center study Two of the authors have worked as part of the instructional team in the seminar and all of the authors have participated in varying degrees in the ELEMN Project The authors backgrounds in design psychology and landscape architecture suggest by example that professionals with diverse backgrounds but a common interest in environment behavior problems can indeed learn to communicate and to collaborate Since design evaluation is a new field and very little specific literature on the subject exists to date we hope this book fills a current need

Proceedings of the 2024 3rd International Conference on Social Sciences and Humanities and Arts (SSHA 2024) Mohd Fauzi bin Sedon, Intakhab Alam Khan, Mehmet Cüneyt Birkök, KinSun Chan, 2024-06-20 This is an open access book With the

progress of social civilization social science and its research are becoming more and more important Theoretically and practically the study of social phenomena and social problems and the development of prosperous social sciences are the eternal themes of human beings At present social science research and its results can hardly meet the needs of social development especially the unscientific evaluation of social science results which has aroused great concern from all walks of life and has produced dirt and questions on social science thus affecting the proper development of social science Max Weber once said that the most important function of social science in modern times is to keep people clear headed and to resist the delusions of prophetic legislators Humanities and arts are the process of perceiving realizing thinking manipulating and expressing objective or subjective objects through capturing and excavating feeling and analyzing integrating and applying or displaying the stage results in the form obtained through feeling seeing hearing smelling touching The social sciences and humanities and arts contain content that will directly affect our lives and the way society functions And by reacting to today s increasingly intricate problems and situations through systematic and professional discussions they will further contribute to the improvement of institutions and the development of society By thinking about issues and looking at problems and the world from different perspectives by putting the two together it may be possible to have more comprehensive appropriate and better responses for example the development of laws requires a deeper understanding of the environment in which they are implemented international trade requires a certain understanding of the customs of different countries and the development of tax and economic policies requires a certain understanding of the population consumer demand etc New Developments in Behavioral Research: Theory, Method and Application Barbara C. Etzel, Judith M. LeBlanc, Donald M. Baer, 2020-09-10 Originally published in 1977 these examples of research and scholarly argument were collected in honor of Professor Sidney W Bijou In the language of academics they constitute a Festschrift a festival of scholarly writing performed to celebrate the career of a person who produced and stimulated others to produce exactly such contributions throughout a long valuable and productive professional history Since 1955 Dr Bijou had worked almost exclusively within the approach variously labelled as the functional analysis of behavior the experimental analysis of behavior operant conditioning or Skinnerian psychology From his point of view it seems clear the first of these labels was the correct one It was the principle of objective direct observable analysis that attracted him

**Corporate Social Responsibility and Organizational Psychology: Quid pro Quo** Ante Glavas, Chelsea R. Willness, David A. Jones, 2017-07-05 Researchers corporate leaders and other stakeholders have shown increasing interest in Corporate Social Responsibility CSR a company s discretionary actions and policies that appear to advance societal well being beyond its immediate financial interests and legal requirements Spanning decades of research activity the scholarly literature on CSR has been dominated by meso and macro level perspectives such as studies within corporate strategy that examine relationships between firm level indicators of social environmental performance and corporate financial performance In recent years however there has been an explosion of

micro oriented CSR research conducted at the individual level of analysis especially with respect to studies on how and why job seekers and employees perceive and react to CSR practices This micro level focus is reflected in 12 articles published in this edited volume as a research topic collection in Frontiers in Psychology Organizational Psychology Specialty Section titled Corporate social responsibility and organizational psychology Quid pro quo Behavioral Research Methods in Environmental Design William M.
