Nuevas orientaciones para una actividad física saludable en centros de fitness Borja Sañudo Corrales (Coord.), Jerónimo García Fernández (Coord.), 2011-08-15 La salud es probablemente una de las temáticas que más preocupan a la sociedad actual. Esta preocupación se debe al aumento de enfermedades crónicas, metabólicas, cardiovasculares y del aparato locomotor derivadas de un estilo de vida cada vez más sedentario. Esta situación requiere una actuación inmediata para fomentar la práctica de actividad física y promover un estilo de vida no solamente activo sino también saludable. En este sentido, estamos observando como determinados sectores están incrementando su actividad y es posible apreciar como el sector del fitness está cobrando interés al entenderse como una alternativa efectiva para satisfacer las demandas de práctica de actividad física del conjunto de la población. La progresiva adaptación de este sector a las distintas necesidades de los diferentes grupos o estratos sociales ha permitido un gran desarrollo de esta industria. Este libro tiene por objetivo ofrecer un estado de la cuestión actual sobre la práctica de actividad físico-deportiva en centros de fitness, especialmente en su orientación hacia el mantenimiento de la salud. En primer lugar y tras un breve repaso a esta evolución en la práctica, cada vez más diversificada, nos centraremos en los centros de fitness y en cómo valorar y prescribir el ejercicio físico a sus usuarios. No cabe duda de que tan solo si el ejercicio es practicado de manera regular y con la intensidad adecuada contribuir a mejorar la capacidad funcional global del organismo. En este sentido se presentan las bases para la prescripción de un ejercicio físico saludable abarcando ejercicios cardiorrespiratorios, ciclo indoor, el análisis de la técnica en los ejercicios de fortalecimiento muscular o las nuevas tendencias en el entrenamiento de la flexibilidad en sala. Finalmente se abordarán aspectos relacionados con la innovación en centros de fitness.
