Metropolitan Phoenix Place Making And Community Building In The Desert:

Metropolitan Phoenix Patricia Gober, 2006 *Metropolitan Phoenix* explores the efforts to build a sustainable desert city in the face of environmental uncertainty rapid growth and increasing social diversity **Desert Visions and the Making of Phoenix, 1860-2009** Philip VanderMeer, 2010-12-16 Whether touted for its burgeoning economy affordable housing and pleasant living style or criticized for being less like a city than a sprawling suburb Phoenix by all environmental logic should not exist Yet despite its extremely hot and dry climate and its remoteness Phoenix has grown into a massive metropolitan area This exhaustive study examines the history of how Phoenix came into being and how it has sustained itself from its origins in the 1860s to its present status as the nation's fifth largest city From the beginning Phoenix sought to grow and although growth has remained central to the city's history its importance meaning and value have changed substantially over the years The initial vision of Phoenix as an American Eden gave way to the Cold War Era vision of a High Tech Suburbia which in turn gave way to rising concerns in the late twentieth century about the environmental social and political costs of growth To understand how such unusual growth occurred in such an improbable location Philip VanderMeer explores five major themes the natural environment urban infrastructure economic development social and cultural values and public leadership Through investigating Phoenix's struggle to become a major American metropolis his study also offers a unique view of what it means to be a desert city *Metropolitan Phoenix* Patricia Gober, 2013-02-12 Inhabitants of Phoenix tend to think small but live big They feel connected to individual neighborhoods and communities but drive farther to get to work feel the effects of the regional heat island and depend in part for their water on snow packs in Wyoming In *Metropolitan Phoenix* Patricia Gober explores the efforts to build a sustainable desert city in the face of environmental uncertainty rapid growth and increasing social diversity *Metropolitan Phoenix* chronicles the burgeoning of this desert community including the audacious decisions that created a metropolis of 3.6 million people in a harsh and demanding physical setting From the prehistoric Hohokam who constructed a thousand miles of irrigation canals to the Euro American farmers who converted the dryland river valley into an agricultural paradise at the end of the nineteenth century Gober stresses the sense of beginning again and building anew that has been deeply embedded in wave after wave of human migration to the region In the early twentieth century the so called health seekers asthmatics arthritis and tuberculosis sufferers arrived with the hope of leading more vigorous lives in the warm desert climate while the postwar period drew veterans and their families to the region to work in emerging electronics and defense industries Most recently a new generation of elderly seeking active retirement has settled into planned retirement communities on the perimeter of the city *Metropolitan Phoenix* also tackles the future of the city The passage of a recent transportation initiative efforts to create a biotechnology incubator and growing publicity about water shortages and school funding have placed Phoenix at a crossroads forcing its citizens to grapple with the issues of social equity environmental quality and economic security Gober argues that given Phoenix's dramatic population growth and

enormous capacity for change it can become a prototype for twenty first century urbanization reconnecting with its desert setting and building a multifaceted sense of identity that encompasses the entire metropolitan community

Toronto Edward Relph,2013-08-22 Extending a hundred miles across south central Ontario Toronto is the fifth largest metropolitan area in North America with the highest population density and the busiest expressway At its core old Toronto consists of walkable neighborhoods and a financial district deeply connected to the global economy Newer parts of the region have downtown centers linked by networks of arterial roads and expressways employment districts with most of the region s jobs and ethnically diverse suburbs where English is a minority language About half the population is foreign born the highest proportion in the developed world Population growth because of immigration almost three million in thirty years shows few signs of abating but recently implemented regional strategies aim to contain future urban expansion within a greenbelt and to accommodate growth by increasing densities in designated urban centers served by public transit Toronto Transformations in a City and Its Region traces the city s development from a British colonial outpost established in 1793 to the multicultural polycentric metropolitan region of today Though the original grid survey and much of the streetcar city created a century ago have endured they have been supplemented by remarkable changes over the past fifty years in the context of economic and social globalization Geographer Edward Relph s broad stroke portrait of the urban region draws on the ideas of two renowned Torontonians Jane Jacobs and Marshall McLuhan to provide an interpretation of how its current forms and landscapes came to be as they are the values they embody and how they may change once again

Bird on Fire Andrew Ross,2011-10-27 Phoenix Arizona is one of America s fastest growing metropolitan regions It is also its least sustainable one sprawling over a thousand square miles with a population of four and a half million minimal rainfall scorching heat and an insatiable appetite for unrestrained growth and unrestricted property rights In *Bird on Fire* eminent social and cultural analyst Andrew Ross focuses on the prospects for sustainability in Phoenix a city in the bull s eye of global warming and also the obstacles that stand in the way Most authors writing on sustainable cities look at places that have excellent public transit systems and relatively high density such as Portland Seattle or New York But Ross contends that if we can t change the game in fast growing low density cities like Phoenix the whole movement has a major problem Drawing on interviews with 200 influential residents from state legislators urban planners developers and green

business advocates to civil rights champions energy lobbyists solar entrepreneurs and community activists Ross argues that if Phoenix is ever to become sustainable it will occur more through political and social change than through technological fixes Ross explains how Arizona's increasingly xenophobic immigration laws science denying legislature and growth at all costs business ethic have perpetuated social injustice and environmental degradation But he also highlights the positive changes happening in Phoenix in particular the Gila River Indian Community's successful struggle to win back its water rights potentially shifting resources away from new housing developments to producing healthy local food for the people of the Phoenix Basin Ross argues that this victory may serve as a new model for how green democracy can work redressing the claims of those who have been aggrieved in a way that creates long term benefits for all Bird on Fire offers a compelling take on one of the pressing issues of our time finding pathways to sustainability at a time when governments are dismally failing in their responsibility to address climate change

Water Regimes Dominique Lorrain, Franck Poupeau, 2016-10-04 In recent years the water sector has undergone profound institutional economic and political transformations Some countries have encouraged privatization of water services but in many cases this has provoked adverse reaction to such a neoliberal and market based approach to this common shared but essential resource This book goes beyond the ideology of the public versus private water regime debate by focusing on the results of these types of initiatives to provide better water services particularly in urban settings It provides numerous examples of alternative models to show who is responsible for implementing such systems and what are their social institutional and technical scientific characteristics Policies are analysed in terms of their implications for employees and residents The book presents a new combinatory approach of water regimes based on several international case studies Argentina Bolivia China France Germany India South Africa and the USA plus a comparison of three cities in Africa presenting specific challenges for water models These case studies demonstrate the successes and problems of a range of private sector involvements in the provision of water services and provide examples of how small scale systems can compare with larger scale more technical systems

Balsas, 2019-10-01 Examines how cities of various sizes on both sides of the Atlantic Ocean are making walkability improvements a part of their overall urban revitalization strategy Walkable precincts have become an important component of urban revitalization on both sides of the Atlantic In Walkable Cities Carlos J L Balsas examines a range of city scales and geographic settings on three continents focusing on the Iberian Peninsula Spain and Portugal Latin America Brazil and Mexico and the United States Phoenix and New York City He explains how this pedestrianization of Main Street approach to central locations downtowns and midtowns has contributed to strengthening various urban functions such as urban vitality pedestrian and bicyclist safety tourism and more However it has also put pressure on less affluent peripheral and fragile areas due to higher levels of consumption and waste generation Balsas calls attention to the need to base urban revitalization interventions on more spatially and socially just interventions coupled with sustainable consumption practices that do not

necessarily entail high growth levels but instead aim to improve the quality of city life The notion of commercial urbanism is both novel and engaging since much of the vibrancy of cities comes from commerce consumption and entertainment The idea itself is a major contribution of the book Tridib Kumar Banerjee University of Southern California

Boomburbs Robert E. Lang, Jennifer B. LeFurgy, 2007-10-01 A glance at a list of America's fastest growing cities reveals quite a surprise most are really overgrown suburbs Places such as Anaheim California Coral Springs Florida Naperville Illinois North Las Vegas Nevada and Plano Texas have swelled to big city size with few people really noticing including many of their ten million residents These boomburbs are large rapidly growing incorporated communities of more than 100 000 residents that are not the biggest city in their region Here Robert E Lang and Jennifer B LeFurgy explain who lives in them what they look like how they are governed and why their rise calls into question the definition of urban Located in over twenty five major metro areas throughout the United States numerous boomburbs have doubled tripled even quadrupled in size between census reports Some are now more populated than traditional big cities The population of the biggest boomburb Mesa Arizona recently surpassed that of Minneapolis and Miami Typically large and sprawling boomburbs are accidental cities but not because they lack planning Many are made up of master planned communities that have grown into one another Few anticipated becoming big cities and unintentionally arrived at their status Although boomburbs possess elements found in cities such as housing retailing offices and entertainment they lack large downtowns But they can contain high profile industries and entertainment venues the Los Angeles Angels of Anaheim and Arizona Cardinals are among over a dozen major league sports teams who play in the boomburbs Urban in fact but not in feel these drive by cities of highways office parks and shopping malls are much more horizontally built and less pedestrian friendly than most older suburbs And contrary to common perceptions of suburbia they are not rich and elitist Poverty is often seen in boomburb communities of small single family homes neighborhoods that once
