Foucault and International Relations Nicholas J. Kiersey, Doug Stokes, 2013-09-13 The recent debate about biopolitics in International Relations IR theory may well prove to be one of the most provocative and rewarding engagements with the concept of power in the history of the discipline Building on Foucault s arguments concerning the role played by the concept of security in 19th century liberal government numerous IR scholars are now arguing for the relevance of his theories of biopolitics and governmentality for understanding the Global War on Terror GWOT and broader issues of security and governance in the post 9 11 world Conversely others have criticized this idea Marxist and Communitarian scholars have challenged the notion that the category of biopolitics can be scaled up to the level of international relations with any analytical precision This edited volume covers these debates in IR with a series of critical engagements with Foucault s own thought and its increasing relevance for understanding international relations in the post 9 11 world This book was based on a special issue of *Global Society*

Power/Knowledge Michel Foucault, 1980-11-12 Michel Foucault has become famous for a series of books that have permanently altered our understanding of many institutions of Western society He analyzed mental institutions in the remarkable *Madness and Civilization* hospitals in *The Birth of the Clinic* prisons in *Discipline and Punish* and schools and families in *The History of Sexuality* But the general reader as well as the specialist is apt to miss the consistent purposes that lay behind these difficult individual studies thus losing sight of the broad social vision and political aims that unified them Now in this superb set of essays and interviews Foucault has provided a much needed guide to Foucault These pieces ranging over the entire spectrum of his concerns enabled Foucault in his most intimate and accessible voice to interpret the conclusions of his research in each area and to demonstrate the contribution of each to the magnificent and terrifying portrait of society that he was patiently compiling For as Foucault shows what he was always describing was the nature of power in society not the conventional treatment of power that concentrates on powerful individuals and

repressive institutions but the much more pervasive and insidious mechanisms by which power reaches into the very grain of individuals touches their bodies and inserts itself into their actions and attitudes their discourses learning processes and everyday lives Foucault's investigations of prisons schools barracks hospitals factories cities lodgings families and other organized forms of social life are each a segment of one of the most astonishing intellectual enterprises of all time and as this book proves one which possesses profound implications for understanding the social control of our bodies and our minds

Violence and Nihilism Luís Aguiar de Sousa, Paolo Stellino, 2022-07-05 Nihilism seems to be per definition linked to violence Indeed if the nihilist is a person who acknowledges no moral or religious authority then what does stop him from committing any kind of crime Dostoevsky precisely called attention to this danger if there is no God and no immortality of the soul then everything is permitted even anthropophagy Nietzsche too emphasised although in different terms the consequences deriving from the death of God and the collapse of Judeo Christian morality This context shaped the way in which philosophers writers and artists thought about violence in its different manifestations during the 20th century The goal of this interdisciplinary volume is to explore the various modern and contemporary configurations of the link between violence and nihilism as understood by philosophers and artists in both literature and film *Information Security and Ethics: Concepts, Methodologies, Tools, and Applications* Nemati, Hamid, 2007-09-30 Presents theories and models associated with information privacy and safeguard practices to help anchor and guide the development of technologies standards and best practices Provides recent comprehensive coverage of all issues related to information security and ethics as well as the opportunities future challenges and emerging trends related to this subject **Foucault and the Modern International** Philippe Bonditti, Didier Bigo, Frédéric Gros, 2017-02-07 This book addresses the possibilities of analyzing the modern international through the thought of Michel Foucault The broad range of authors brought together in this volume question four of the most self evident characteristics of our contemporary world international neoliberal biopolitical and global and thus fill significant gaps in both international and Foucault studies The chapters discuss what a Foucauldian perspective does or does not offer for understanding international phenomena while also questioning many appropriations of Foucault's work This transdisciplinary volume will serve as a reference for both scholars and students of international relations international political sociology international political economy political theory philosophy and critical theory more generally **Confucianism for the Modern World** Daniel A. Bell, Chae-bong Ham, 2003-09-08 While Confucian ideals continue to inspire thinkers and political actors discussions of concrete Confucian practices and institutions appropriate for the modern era have been conspicuously absent from the literature thus far This volume represents the most cutting edge effort to spell out in meticulous detail the relevance of Confucianism for the contemporary world The contributors to this book internationally renowned philosophers lawyers historians and social scientists argue for feasible and desirable Confucian policies and institutions as they attempt to draw out the political economic and legal implications of Confucianism

for the modern world **Dispositif** Greg Bird, Giovanbattista Tusa, 2023-12-05 A ground breaking anthology that places dispositifs apparatuses at the center of contemporary thought Dispositif is one of the most prevalent yet elusive terms in contemporary thought This comprehensive anthology brings together formative seminal and contemporary texts and visual applications to illuminate how central dispositifs are to contemporary theory Greg Bird and Giovanbattista Tusa s selection and placement of critical texts invite readers to explore common themes and genealogies different interpretations and readings and their diverse deployments across multiple disciplines and genres by such figures as Karl Marx Franz Kafka Judith Butler Martin Heidegger Gilbert Simondon Michel Foucault Edward Said Jasbir Puar Donna Haraway Giorgio Agamben Jacques Derrida Tiqqun Claire Fontaine and many others Dispositif A Cartography is a true toolbox for the development of technological ecology thinking that accounts for situated knowledge This collection provides coordinates for reorienting oneself in a permanently changing world offering possible roadmaps for navigating these profoundly uncertain times More than just a compilation of interventions on the dispositif this volume acts as a guide for understanding the complex interaction between technology philosophy and the languages of the arts and media **Wittgenstein, Education**

and the Problem of Rationality Michael A. Peters, 2021-01-21 This book develops an argument for a historicist and non foundationalist notion of rationality based on an interpretation of Wittgenstein of the Philosophical Investigations and On Certainty The book examines two notions of rationality a universal versus a constitutive conception and their significance for educational theory The former advanced by analytic philosophy of education as a form of conceptual analysis is based on a mistaken reading of Wittgenstein Analytic philosophy of education used a reading of Wittgenstein s philosophy of language to set up and justify an absolute universal and ahistorical notion of rationality By contrast the book examines the underlying influence of the later Wittgenstein on the historicist turn in philosophy of science as a basis for a non foundationalist and constitutive notion of rationality which is both historical and cultural and remains consistent with wider developments in philosophy hermeneutics and social theory This book aims to understand the philosophical motivation behind this view to examine its intellectual underpinnings and to substitute this universal conception of rationality by reference to a Hegelian interpretation of the later Wittgenstein that emphasizes his status as an anti foundational thinker **Disassembly**

Required Geoff Mann, 2013-08-16 Capitalism is a complex dynamic and extraordinarily robust way of organizing human life it is also a system that achieves prosperity for the few impoverishes the many and depletes the commons for all We know that capitalism is a broken system in desperate need of change But to imagine a different system we first need to understand how capitalism actually exists today and be able to explain to others how it works and why change is needed Disassembly Required is an attempt to meet these challenges It offers an anti capitalist analysis of capitalism and even more important it explains why it is anti capitalist It does not stop at claiming that the present way of organizing the economic aspects of our lives is politically indefensible and ecologically unsustainable but digs into the details of capitalist institutions and the

economics that justify them From money and markets to the subprime crisis it explains the fundamental features of contemporary capitalism and how they contribute sometimes in surprising ways to overall capitalist dynamics A brilliantly lucid book Mann illuminates the basic principles of modern capitalism their expressions in contemporary economies and states and their devastating socio ecological consequences for working people everywhere This is a must read if we are to envision ways of organizing our common planetary existence that are not based upon the illusory promises of market fundamentalism and the suicidal ideology of endless economic growth Neil Brenner *New State Spaces* Geoff Mann is a new breed of monkey wrencher He knows that contemporary capitalism has a perverse habit of dismantling itself and gives us a toolkit to build a new more socially just edifice Andy Merrifield *Magical Marxism* Insightful and incisive thoughtful and thorough filled with new avenues for thinking about resistance Pass this one by at your own peril Matt Hern *Common Ground* in a *Liquid City* An essential handbook for understanding actually existing capitalism and thus the world as it really is rather than as it is theorized and justified by the dissembling high priests of mainstream academia policy and politics Christian Parenti *Tropic of Chaos* [Practice Theory and International Relations](#) Silviya Lechner, Mervyn Frost, 2018-08-30 Advances our understanding of global and international relations through a ground breaking philosophical analysis of social practices indebted to Oakeshott Wittgenstein and Hegel **An Invitation to Social Construction** Kenneth J Gergen, 1999-12-06 In *An Invitation to Social Construction* Kenneth Gergen charts the background to the social constructionist movement and outlines the major debates topics and issues **Critical Psychology** Derek Hook, 2004 Offers a broad introduction to critical psychology and explores the socio political contexts of post apartheid South Africa This title expands on the theoretical resources usually referred to in the field of critical psychology by providing substantive discussions on Black Consciousness Post colonialism and Africanist forms of critique [A Materialist Theory of Justice](#) Isaak Dore, 2025-02-06 This book presents a comprehensive theory of justice that has a threefold justification For the first justification the book presents a rigorously empirical methodology based on the stark realities of the human condition It has a strong anthropological grounding in that it is adapted from the methodology of cultural materialism which in turn is founded on the materialist epistemology of Karl Marx The second justification is philosophical The theory of justice derived from the above methodology is further buttressed by and or tested against the major trends of Western philosophy as represented by the thought of Aristotle Thomas Hobbes Thomas Aquinas Immanuel Kant Georg W F Hegel John Finnis John Dewey George Mead Jürgen Habermas Michel Foucault Jean François Lyotard Axel Honneth Michael Sandel Michael Walzer Martha Nussbaum John Maynard Keynes Amartya Sen and Karl Marx The third justification is moral The promotion of human flourishing on the basis of fairness and equality are the minimum goals to be achieved after which a more ambitious and comprehensive theory of overall goodness based on individual and governmental action can be implemented
