Tutoring Systems in E-Learning Environments: Design, Implementation and Evaluation* Stankov, Slavomir, Glavinic,
Vlado, Rosic, Marko, 2010-07-31 This book addresses intelligent tutoring system ITS environments from the standpoint of
information and communication technology ICT and the recent accomplishments within both the e learning paradigm and e
learning systems Provided by publisher New Directions for Intelligent Tutoring Systems Ernesto Costa, 2012-12-06 This
book is a result of the NATO Advanced Research Workshop on New Directions for Intelligent Tutoring Systems held in Sintra
Portugal October 6 10 1990 The main idea behind the workshop was to bring together scientists with different concerns
about Intelligent Tutoring Systems ITS in order to discuss the positive and negative aspects of the current architecture
paradigm expert module student module instructional module and interface module and eventually propose some
modifications or radical changes to it This was a consequence of the increasing malaise felt currently by researchers in the
area of artificial intelligence and education and in particular by those concerned with ITS One symptom of this state of affairs
is the fact that people have started talking about Intelligent Learning Environments ILE instead of ITS To understand the
reasons for this situation we promoted the discussion of questions like To what extent do we need the technology of expert
systems in ITS Which other relevant AI techniques and methodologies are urgently needed Is ITS a tool for knowledge
communication or is it rather a belief system How can the research already done on interactions among agents be utilized Is
it possible to find a formal theory to describe and solve the current problems with ITS The book contains the revised versions
of the papers presented at the workshop The new texts reflect the discussions that took place at the meeting
