OWNERS'

Supply Book

In that wonderful age when MODEL T gave wing to the horse-drawn world of the working man, supplying accessories and replacement parts became a vast operation, eclipsed in size only by the merchandising of the car itself . . . This complete reproduction of a catalog from the height of the era originally was issued by the largest supplier in the field. It will have significance for the historian, and may both delight and frustrate the planetary Fordist of today.

From the acclaimed popular historian Richard Snow who writes with verve and a keen eye The New York Times Book Review comes a fresh and entertaining account of Henry Ford and his invention of the Model T the ugly cranky invincible machine that defined twentieth century America Every century or so our republic has been remade by a new technology 170 years ago the railroad changed Americans conception of space and time in our era the microprocessor revolutionized how humans communicate But in the early twentieth century the agent of creative destruction was the gasoline engine as put to work by an unknown and relentlessly industrious young man named Henry Ford Born the same year as the battle of Gettysburg Ford died two years after the atomic bombs fell and his life personified the tremendous technological changes achieved in that span Growing up as a Michigan farm boy with a bone deep loathing of farming Ford intuitively saw the advantages of internal combustion Resourceful and fearless he built his first gasoline engine out of scavenged industrial scraps It was the size of a sewing machine From there scene by scene Richard Snow vividly shows Ford using his innate mechanical abilities hard work and radical imagination as he transformed American industry In many ways of course Ford s story is well known in many more ways it is not Richard Snow masterfully weaves together a fascinating narrative of Ford s rise to fame through his greatest invention the Model T When Ford first unveiled this car it took twelve and a half hours to build one A little more than a decade later it took exactly one minute In making his car so quickly and so cheaply that his own workers could easily afford it Ford created the cycle of consumerism that we still inhabit Our country changed in a mere decade and Ford became a national hero But then he soured and the benevolent side of his character went into an ever deepening eclipse even as the America he had remade evolved beyond all imagining into a global power capable of producing on a vast scale not only cars but airplanes ships machinery and an infinity of household devices A highly pleasurable read filled with scenes and incidents from Ford s life particularly during the intense phase of his secretive competition with other early car manufacturers *I Invented the Modern Age* shows Richard Snow at the height of his powers as a popular historian and reclaims from history Henry Ford the remarkable man who indeed invented the modern world as we know it
