Le traité de la réalité virtuelle Philippe Fuchs, Bruno Arnaldi, 2006 Projets de fin d'études 2002-2003 à l'école d'architecture de Saint-Etienne Ecole d'architecture de Saint-Etienne, 2005 Hyper-realistic computer generated architectural renderings Oscar Riera Ojeda, Lucas H. Guerra, 1999 La technologie numérique au service de l'architecture L'ouvrage présente un choix de projets architecturaux visualisés en trois dimensions à l'aide de logiciels de 3D et d'animation Une sorte de promenade dans la réalité virtuelle *Digital Heritage* Marinos Ioannides, Dieter Fellner, Andreas Georgopoulos, Diofantos Hadjimitsis, 2010-10-29 This volume comprises the proceedings of the Third International Euro Mediterranean Conference EuroMed 2010 on the historical island of Cyprus The focal point of this conference was digital heritage which all of us involved in the documentation of cultural heritage continually strive to implement The excellent selection of papers published in the proceedings reflects in the best possible way the benefits of exploiting modern technological advances for the restoration preservation and documentation of any kind of cultural heritage Above all we should always bear in mind that what we do now may be used by people in another century to repair rebuild or conserve the buildings monuments artifacts and landscapes that seem important Recent events like earthquakes tsunamis volcanic eruptions fires and insurrections show that we can never be too prepared for damage to and loss of the physical and non tangible elements of our past and in general our cultural heritage To reach this ambitious goal the topics covered included experiences in the use of innovative recording technologies and methods and how to take best advantage of the results obtained to build up new instruments and improved methodologies for documenting in multimedia formats archiving in digital libraries and managing a cultural heritage Technological advances are very often reported in detail in specialized fora This volume of proceedings establishes bridges of communication and channels of cooperation between the various disciplines involved in cultural heritage preservation Architecture des plantes et production végétale Philippe de Reffye, Marc Jaeger, Daniel Barthélémy, François Houllier, 2018-05-15 Comment modéliser la production végétale en utilisant les concepts de l'architecture des plantes Rédigé par des botanistes des agronomes des mathématiciens et des informaticiens cet ouvrage considère l'architecture d'une plante comme le résultat de la dynamique de ses organes en lien avec la particularité du modèle architectural propre son espace Il rend compte des principaux fondements de la modélisation des plantes et décrit les principales applications de cette démarche *Architecture, Ethics, and Technology* Louise Pelletier, Alberto Pérez-Gómez, 1994-03-10 An enlightened discussion of all relevant aspects of architecture shows the necessity for revision of commonly held assumptions about the nature of architectural history theory representation and ideation the production of buildings in the postindustrial city and professional ethics These topics provide the basis for the fourteen interdisciplinary papers presented here The introductory section includes an examination of the epistemological origins of technology in the early modern European context and two alternative visions of ethics and its potential relevance for architecture The second

part presents four perspectives on important questions about how we represent buildings and the ethical values involved in that representation Ethics and Poetics in the Context of Technological Production considers the role of philosophical ethics in a rational structure of categories in architectural practice and the possibility and desirability of incorporating ethical reflections into the generation of architectural form The Architectural Uses of History and Narrative in a Technocratic World explores alternatives for articulating an ethical attitude in forms of discourse other than philosophy and science These papers were originally presented at the bilingual symposium Architecture Ethics and Technology held at the Canadian Centre for Architecture in Montreal in 1991

New modeling Yves Weinand, 2004-01-01 Les architectes se sont intéressés aux cours de ces dernières années des géométries complexes abandonnant les formes classiques et platoniciennes Si les outils informatiques d'aujourd'hui permettent de représenter ces géométries cela ne signifie pas forcément que ces logiciels permettent également de les comprendre ou de les construire La démarche présente ici est basée sur la fabrication de modèles virtuels et physiques Ces modèles sont essentiels pour la compréhension et la formulation complète d'une architecture russe L'ouvrage présente une synthèse partant de la visualisation vers la formulation de modèles virtuels et physiques en passant par la vérification des géométries l'aide de modèles en maillages d'

ments finis pour finalement aboutir la réalisation des prototypes Le lecteur aura la possibilité de vérifier l'aide d'exemples la naissance la transformation et finalement la faisabilité d'une architecture basée sur une géométrie complexe Par la même occasion le chemin limite séparant artificiellement les disciplines d'architecture et de génie civil est supprimé au profit d'une véritable démarche interdisciplinaire

L incendie de Notre Dame de Paris le 15 avril 2019 nous a sidérés comme si une part de nous mêmes avait brûlé une part d'enfance avec notre Mère Et Marie Amélie Tek en a tiré autant plus bouleversée qu'elle a vu son travail d'architecte la préservation du patrimoine Dans cet essai écrit avec le courage et un style d'une poésie blouissante l'auteur revient sur la signification profonde de ce bâtiment sur le rapport la matière et l'harmonie si effrayant que l'on dissocie l'usage du lieu et sa construction Elle appelle les architectes respecter le bois de la charpente vivante matière qui vit aussi de la fonction qu'on lui donne et de l'âme de ceux qui la travaillent s'effacer derrière les mille ans de prières qui ont façonné Notre Dame ne pas oublier les habitants de l'édifice mes du passé qui demeurent entre les murs hommes du présent qui espèrent et ceux du futur qui l'on se doit de parler de nous la suite de Victor Hugo qui voyait en Notre Dame une œuvre d'art totale Marie Amélie Tek nous propose un texte visionnaire qui nous questionne sur notre rapport la cathédrale Notre Dame de Paris mais aussi sur la résurgence du patrimoine en chacun de nous

Architectes et ingénieurs face au projet Jean-Baptiste Marie, 2019-06-26 La collaboration entre ingénieurs et architectes n'a cessé d'évoluer et de se matérialiser sous différentes formes mais avec un objectif commun celui de voir naître un projet réfléchi et fédérateur. Cet ouvrage tout en couleurs et richement illustré avec des photographies des schémas de principes des plans et coupes de détail traite de la gestion de projets d'architecture travers la collaboration entre ingénieurs et architectes permettant de relier les phases de programmation de conception et d'exécution. Il évoque également l'influence des innovations technologiques et numériques, le développement du BIM et de la maquette numérique et ouvre les portes de trois projets architecturaux remarquables : la maison Hermès Tokyo, la fondation Louis Vuitton Paris et la station d'assainissement Seine Aval. À travers nous plongeant ainsi dans les coulisses de leur création. Il analyse la partie invisible du projet d'architecture c'est-à-dire sa fabrication depuis la collaboration jusqu'à la construction : les processus, les mutations organisationnelles, les difficultés rencontrées ainsi que les pistes d'innovation.

3D Research Challenges in Cultural Heritage II Sander Münster, Mieke Pfarr-Harfst, Piotr Kuroczyński, Marinos Ioannides, 2016-10-24 This book reflects a current state of the art and future perspectives of Digital Heritage focusing on not interpretative reconstruction and including as well as bridging practical and theoretical perspectives, strategies and approaches. Comprehensive key challenges are related to knowledge transfer and management as well as data handling within an interpretative digital reconstruction of Cultural Heritage including aspects of digital object creation, sustainability, accessibility, documentation, presentation, preservation and more general scientific compatibility. The three parts of the book provide an overview of a scope of usage scenarios, a current state of infrastructures as digital libraries, information repositories for an interpretative reconstruction of Cultural Heritage, highlight strategies, practices and principles currently used to ensure compatibility, reusability and sustainability of data objects and related knowledge within a 3D reconstruction work process on a day-to-day work basis and show innovative concepts for the exchange, publishing and management of 3D objects and for inherited knowledge about data workflows and semantic structures.
