[Bahamian Students' Experiences with Mathematics in American Universities and Colleges](#) Nikki Rochelle Cleare, 2011 This longitudinal qualitative multi case study examines the mathematical experiences of three Bahamian students pursuing science degrees in American universities and its relationship to their previous mathematical experiences in their Bahamian high schools Drawing on cultural psychology and sociocultural theories of learning this study found that the relationship between the academic preparedness of the participants on their experiences with collegiate mathematics is not limited to subject content only The lessons learnt from the implied curriculum also play a role in their experiences with collegiate mathematics Of the three participants two have had to learn develop techniques for studying

because they had not been sufficiently challenged in their previous environments to do so Each of the cases also highlights some powerful constructs needed for success in mathematics and at least two emphasize making connections between concepts procedures manipulatives tools and multiple approaches when solving problems This study contributes to an emerging area of research on student persistence in college level mathematics courses as well as to the ongoing discussions in mathematics education regarding the role importance of conceptual understanding and how to promote it The study makes visible some of the ways in which students post secondary experiences with mathematics are shaped by their perception of their mathematical preparation thus providing a basis for discussions of possible curricular change in the Bahamas It also suggests that issues such as confidence and school teacher expectations of students may play a role in the development of conceptual understanding

Modeling, Functions, and Graphs Katherine Yoshiwara, Modeling Functions and Graphs covers the content of a typical college algebra course with an emphasis on functions and modeling when combined with a trigonometry text or supplement this text can be used in a precalculus course The text employs a variety of applications to motivate mathematical thinking Each chapter opens with a problem of historical or contemporary significance highlighting the material in the chapter and includes by an Investigation that previews the skills to be introduced These Investigations can be used in class as guided explorations or as projects for small groups We have also provided a set of more challenging Projects at the end of each chapter

College Algebra: Graphs and Models Karl E. Byleen, David Sobecki, Professor, Raymond A. Barnett, Michael R. Ziegler, 2008-02-01 The Barnett Graphs Models series in college algebra and precalculus maximizes student comprehension by emphasizing computational skills real world data analysis and modeling and problem solving rather than mathematical theory Many examples feature side by side algebraic and graphical solutions and each is followed by a matched problem for the student to work This active involvement in the learning process helps students develop a more thorough understanding of concepts and processes A hallmark of the Barnett series the function concept serves as a unifying theme A major objective of this book is to develop a library of elementary functions including their important properties and uses Employing this library as a basic working tool students will be able to proceed through this course with greater confidence and understanding as they first learn to recognize the graph of a function and then learn to analyze the graph and use it to solve the problem Applications included throughout the text give the student substantial experience in solving and modeling real world problems in an effort to convince even the most skeptical student that mathematics is really useful

College Algebra Cynthia Y. Young, 2012-10-02 This is the Student Solutions Manual to accompany College Algebra 3rd Edition The 3rd edition of Cynthia Young's College Algebra brings together all the elements that have allowed instructors and learners to successfully bridge the gap between classroom instruction and independent homework by overcoming common learning barriers and building confidence in students ability to do mathematics Written in a clear voice that speaks to students and mirrors how instructors communicate in lecture Young's hallmark pedagogy enables

Integrating Research on the Graphical Representation of Functions Thomas A. Romberg, Elizabeth Fennema, Thomas P. Carpenter, 2012-10-12 This volume focuses on the important mathematical idea of functions that with the technology of computers and calculators can be dynamically represented in ways that have not been possible previously The book's editors contend that as result of recent technological developments combined with the integrated knowledge available from research on teaching instruction students thinking and assessment curriculum developers researchers and teacher educators are faced with an unprecedented opportunity for making dramatic changes The book presents content considerations that occur when the mathematics of graphs and functions relate to curriculum It also examines content in a carefully considered integration of research that conveys where the field stands and where it might go Drawing heavily on their own work the chapter authors reconceptualize research in their specific areas so that this knowledge is integrated with the others strands This model for synthesizing research can serve as a paradigm for how research in mathematics education can and probably should proceed

Exemplary Programs in Introductory College Mathematics Susan S. Lenker, 1998 This handbook contains a collection of the winning entries in the first INPUT Competition part of the INPUT Innovative Programs Using Technology Project The INPUT Project was designed to improve instruction by recognizing and rewarding college instructors who rethought the mathematical content of their introductory mathematics courses with innovative uses of technology The targeted introductory mathematics courses were developmental mathematics precalculus business mathematics and introductory statistics
