Modeling Functions Graphs W Cd 3rd:

Large-Order Behaviour of Perturbation Theory J.C. Le Guillou, J. Zinn-Justin, 2012-12-02 This volume is concerned with the determination of the behaviour of perturbation theory at large orders in quantum mechanics and quantum field theory and its application to the problem of summation of perturbation series Perturbation series in quantum field theory and in many quantum mechanics models are only asymptotic and thus diverge for all values of the expansion parameter Their behaviour at large orders provides information about whether they define the theory uniquely the problem of Borel summability It suggests methods to extract numerical information from the series when the expansion parameter is not small The articles reprinted here deal with the explicit evaluation of large order behaviour in many quantum mechanics and field theory models The large order behaviour is related to barrier penetration effects for unphysical values of the expansion parameter which can be calculated by WKB or instanton methods The calculation of critical exponents of 4 field theory is presented as a practical application

Transactions on Large-Scale Data- and Knowledge-Centered Systems III Abdelkader

Hameurlain, Josef Küng, Roland Wagner, 2011-08-02 The LNCS journal Transactions on Large Scale Data and Knowledge Centered Systems focuses on data management knowledge discovery and knowledge processing which are core and hot topics in computer science Since the 1990s the Internet has become the main driving force behind application development in all domains An increase in the demand for resource sharing across different sites connected through networks has led to an evolution of data and knowledge management systems from centralized systems to decentralized systems enabling large scale distributed applications providing high scalability Current decentralized systems still focus on data and knowledge as their main resource Feasibility of these systems relies basically on P2P peer to peer techniques and the support of agent

systems with scaling and decentralized control Synergy between Grids P2P systems and agent technologies is the key to data and knowledge centered systems in large scale environments This the third issue of Transactions on Large Scale Data and Knowledge Centered Systems contains two kinds of papers Firstly a selection of the best papers from the third International Conference on Data Management in Grid and Peer to Peer Systems Globe 2010 and secondly a selection of 6 papers from the 18 papers submitted in response to the call for papers for this issue The topics covered by this special issue include replication the semantic web information retrieval data storage source selection and large scale distributed applications
