Models And Economic Theory:

Models and Economic Theory Ivy Papps, Willie Henderson, 1977 *Some Quantitative Methods and Models in Economic Theory* Alexander V. Prasolov, 2016 Introduction Linear dynamic models Lotka Volterra's models in economics Various dynamic models

The Methodology of Economic Model Building (Routledge Revivals) Lawrence A. Boland, 2014-05-01 The major methodological task for modern economists has been to establish the testability of models Too often however methodological assumptions can make a model virtually impossible to test even under ideal conditions yet few theorists have examined the requirements and problems of assuring testability in economics In *The Methodology of Economic Model Building* first published in 1989 Lawrence Boland presents the results of a research project that spanned more than twenty years He examines how economists have applied the philosophy of Karl Popper relating methodological debates about falsifiability to wider discussions about the truth status of models in natural and social sciences He concludes that model building in economics reflects more the methodological prescriptions of the economist Paul Samuelson than Popper's falsificationism This title will prove invaluable to both students and researchers and represents a substantial contribution to debates about the scientific status of economics

[The General Economic Theory](#) Wei-Bin Zhang, 2020-08-27 This book develops a general economic theory that integrates various economic theories and ideas and establishes important relationships between economic variables that are not formally recognized in the economic literature The author demonstrates how the basic model is integrated with neoclassical growth theory Walrasian general equilibrium theory and Ricardian distribution theory and how these theories can be incorporated through a single set of equations with a microeconomic basis The book offers new insights into income and wealth distribution between heterogeneous households racial and national differences in growth and development interdependence between different stock variables with portfolio choices among different markets It will appeal to scholars of economists interested in an integrative theoretical approach to this discipline

Mathematical Models in Economics - Volume I Wei-Bin Zhang, 2009-06-10 *Mathematical Models in Economics* is a component of *Encyclopedia of Mathematical Sciences* in which is part of the global *Encyclopedia of Life Support Systems EOLSS* an integrated compendium of twenty one Encyclopedias This theme is organized into several different topics and introduces the applications of mathematics to economics Mathematical economics has experienced rapid growth generating many new academic fields associated with the development of mathematical theory and computer Mathematics is the backbone of modern economics It plays a basic role in creating ideas constructing new theories and empirically testing ideas and theories Mathematics is now an integral part of economics The main advances in modern economics are characterized by applying mathematics to various economic problems Many of today's profound insights into economic problems could hardly be obtained without the help of mathematics The concepts of equilibrium versus non equilibrium stability versus instability and steady states versus chaos in the contemporary literature are difficult to explain

without mathematics The theme discusses on modern versions of some classical economic theories taking account of balancing between significance of economic issues and mathematical techniques These two volumes are aimed at the following five major target audiences University and College students Educators Professional practitioners Research personnel and Policy analysts managers and decision makers and NGOs

Bayesian Models in Economic Theory Marcel Boyer, Richard Kihlstrom, 1984

Institutions, Behaviour and Economic Theory Heinrich Bortis, 1997 This book is about the conceptual foundations of an intermediate way between liberalism and socialism From a standpoint of economic theory this middle way is conceived of as a synthesis of classical Ricardian and Keynesian political economy While the former deals with proportions between individuals or collectives and society in tackling the problems of distribution and value on the basis of the surplus principle the latter is concerned with the scale of economic activity as explained by the principle of effective demand Political economy pictures the economic aspects of the functioning of the institutional system within which the behaviour of individuals is embedded The economy considered is primarily neither a market nor a planned economy but rather a monetary production economy To establish an alternative to liberalism and socialism requires setting up a system of the social sciences In this work suggestions are made for linking political economy with other social sciences i e sociology law and politics in the traditional sense thus establishing the unity of the social sciences In a Keynesian vein the social sciences are conceived of as moral sciences a view which gives rise to a specific philosophy of history To complete the picture issues of method associated with the theory of knowledge in the social sciences and the problem of linking theory with historical reality are also covered

Alternative Approaches to Economic Theory Victor A. Beker, 2019-06-11 The 2007 2008 financial crisis exposed the shortcomings of mainstream economic theory with economists unprepared to deal with it In the face of this a major rethinking of economics seems necessary and in presenting alternative approaches to economic theory this book contributes to the rebuilding of the discipline This volume brings together contributions from different perspectives and theoretical approaches that address the challenge of updating the economic theory corpus and seek to recover prestige for this discipline after the failure of neoclassical economics It addresses a range of topics including the complexity approach to economics category theory the Post Keynesian approach to micro and macroeconomics financialisation multidimensional analysis and ecological economics The book is aimed at economics scholars researchers academics and practitioners as well as upper undergraduates and graduates in this area of knowledge It may also be of interest for people interested in methodological issues in economics and the relationship between economic theory and the real world

On the Reliability of Economic Models Daniel Little, 1995-08-31 This volume represents a contribution to the philosophy of economics with a distinctive point of view the contributors have selected particular areas of economics and have probed these areas for the philosophical and methodological issues that they raise The primary essays are written by philosophers concentrating on philosophical issues that arise at the level of the everyday theoretical practice of working

economists Commentary essays are provided by working economists responding to the philosophical arguments from the standpoint of their own disciplines The volume thus represents something of an experiment in the philosophy of science striving as it does to explore methodological issues across two research communities The purpose of the volume is very specific to stimulate a discussion of the epistemology and methodology of economics that works at the level of detail of existing best practice in economics today The contributors have designed their contributions to stimulate productive conversation between philosophers and economists on topics in the methodology of economics

The Methodology of Economic Model Building (Routledge Revivals) Lawrence A. Boland, 2014-05-01 The major methodological task for modern economists has been to establish the testability of models Too often however methodological assumptions can make a model virtually impossible to test even under ideal conditions yet few theorists have examined the requirements and problems of assuring testability in economics In The Methodology of Economic Model Building first published in 1989 Lawrence Boland presents the results of a research project that spanned more than twenty years He examines how economists have applied the philosophy of Karl Popper relating methodological debates about falsifiability to wider discussions about the truth status of models in natural and social sciences He concludes that model building in economics reflects more the methodological prescriptions of the economist Paul Samuelson than Popper's falsificationism This title will prove invaluable to both students and researchers and represents a substantial contribution to debates about the scientific status of economics

25 Years of Economic Theory T.J. Kastelein, Simon K. Kuipers, W.A. Nijenhuis, R.G. Wagenaar, 2012-12-06 Almost three years passed since the Faculty of Economics of the University of Groningen celebrated its 25th Anniversary in 1973 Late but not too late we hope to present the lectures of most of our distinguished guests who came from the United States and different European Countries to inform the Congress participants of their opinion and ideas on 25 Years of Economic Theory Retrospect and Prospect The problems we met in publishing the lectures in accordance with the agreement we made with our guests are not unusual as everyone knows who has been an editor of such a volume before The promise to give a lecture and to write it down afterwards as well is much more difficult to maintain than only to give a speech Everybody knows there is nothing so terrifying as to be reminded of your promise to write down your lecture especially if only a type written text put down from a tape is at your disposal You are sure of your remembrance That very day I heard applause there were friendly words and perhaps a state of not ending enthusiasm And now I receive this type written text of my speech with a request full of innocence of these friendly committee members will you be so kind as to prepare your text for publication But this one is this my text Unbelievable

An Economic Theory of Gender and Population Change

Wei-Bin Zhang, 2025-01-10 This book proposes an economic theory of gender and population change by integrating neoclassical and new economic theories Modern economies are characterized by complicated dynamic interdependence between many variables such as population growth human capital accumulation wealth accumulation gender division of labor children caring environmental changes various types of conflicts wars and so on However modern dynamic economic theories deal with simplified interdependence between a few variables Any genuine modeling of economic dynamics result in high dimensional nonlinear dynamics Nevertheless it is only in recent years that it is possible to examine the behavior of highly dimensional dynamics This partly explains why economic theory has been dominated by modeling dynamic economic systems with a few variables with linear linearized relations Since Malthus published his An Essay on the Principle of Population in 1798 economists have made great efforts to reveal the dynamic complexity of population change Modern economies have experienced unprecedented population dynamics No one in human history could even have rationally predicted the natural declination of the national population in modern times These failures in predicting family structural changes and life expectancy lead to many socioeconomic problems such as health costs in association with aging and pension systems that many societies fail to be prepared for This book contributes to the literature on macroeconomics based on microeconomics neoclassical growth theory new growth theory and family economics by integrating some important ideas in neoclassical growth theory and family economics This book extensively applies the ideas in the literature to deal with the complexity of population change
