Third Series Library of Congress. Copyright Office, 1973 **Making Our Neighborhoods, Making Our Selves** George C. Galster, 2019-03-13 Drawing on economics sociology geography and psychology Galster delivers a clear sighted explanation of what neighborhoods are how they come to be and what they should be. Urban theorists have tried for decades to define exactly what a neighborhood is. But behind that daunting existential question lies a much murkier problem: never mind how you define them how do you make neighborhoods productive and fair for their residents. In *Making Our Neighborhoods Making Our Selves* George C. Galster delves deep into the question of whether American neighborhoods are as efficient and equitable as they could be socially financially and emotionally and if not what we can do to change that. Galster aims to redefine the relationship between places and people promoting specific policies that reduce inequalities in housing markets and beyond. **Migration and Residential Mobility** Martin T. Cadwallader, 1992 Analyzes the phenomenon of human migration especially in the industrialized countries of the west. Explains and applies various kinds of models most of them statistical and most derived from the general linear model. Organized around two axes: micro vs macro approaches and interregional vs intracity migration. Paper edition, unsewn, 189 pages. Annotation copyright by Book News Inc, Portland, OR.

Developments in Electoral Geography Ron Johnston, Fred M. Shelley, Peter J. Taylor, 2014-10-03 The essays in this collection show how electoral geography has shifted from empiricist activity towards a closer involvement with the wider issues addressed by social scientists. They illustrate the potential contributions that electoral geographers can make towards the understanding of global national and local societies. *The East Lakes Geographer*, 1980 **Anthropology, Space,**

and Geographic Information Systems Mark Aldenderfer, Herbert D. G. Maschner, 1996-07-18 Major advances in the use of geographic information systems have been made in both anthropology and archaeology Yet there are few published discussions of these new applications and their use in solving complex problems This book explores these techniques showing how they have been successfully deployed to pursue research previously considered too difficult or impossible to undertake Among the projects described here are studies of land degradation in the Peruvian Amazon settlement patterns in the Pacific northwest ethnic distribution within the Los Angeles garment industry and prehistoric sociopolitical development among the Anasazi Following an introduction that discusses the theory of geographic information systems in relation to anthropological inquiry the book is divided into sections demonstrating actual applications in cultural anthropology archaeology paleoanthropology and physical anthropology The work will be of much interest within all these communities
