promoted their social agenda as a religious and patriotic duty a reflection of the individual's responsibility to make personal sacrifices on behalf of their vision for France's Christian civilization The Croix de Feu PSF's ethno-religious nationalism circulated throughout the French imperial nation state making the movement the premier defender of an empire at the height of its power But women in North African branches faced substantial marginalization and the movement remained dangerously sectarian in the Maghreb driving indigenous activists from reformism to anticolonialism The Croix de Feu PSF thus set the stage for both the authoritarian anti-Semitic Vichy regime and the decolonization that followed the war The first book on women of the French far right in the age of fascism *Political Belief in France 1927-1945* contributes to the fields of French history gender studies the history of fascism and the history of empire

**Human Rights and Reform** Susan E. Waltz, 2022-07-15 Independence from colonial rule did not usher in the halcyon days many North Africans had hoped for as the new governments in Morocco Tunisia and Algeria soon came to rely on repression to reinforce and maintain power In response to widespread human rights abuses individuals across the Maghrib began to form groups in the late 1970s to challenge the political practices and structures in the region and over time these independent human rights organizations became prominent political actors The activists behind them are neither saints nor revolutionaries but political reformers intent on changing political patterns that have impeded democratization This study the first systematic comparative analysis of North African politics in more than a decade explores the ability of society including Islamist forces to challenge the powers of states Locating Maghribi politics within their cultural and historical contexts Waltz traces state-society relations in the contemporary period Even as Algeria totters at the brink of civil war and security concerns rise across the region the human rights groups Susan Waltz examines implicitly challenge the authoritarian basis of political governance Their efforts have not led to the democratic transition many had hoped but human rights have become a crucial new element of North African political discourse This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high-quality peer-reviewed scholarship

How the legacy of monarchical empires shaped Britain, France, Spain, and the United States as they became liberal entities. Historians view the late eighteenth and early nineteenth centuries as a turning point when imperial monarchies collapsed and modern nations emerged. Treating this pivotal moment as a bridge rather than a break, *The Imperial Nation* offers a sweeping examination of four of these modern powers: Great Britain, France, Spain, and the United States, and asks how, after the great revolutionary cycle in Europe and America, the history of monarchical empires shaped these new nations. Josep Fradera explores this transition, paying particular attention to the relations between imperial centers and their sovereign territories and the constant and changing distinctions placed between citizens and subjects. Fradera argues that the essential struggle that lasted from the Seven Years War to the twentieth century was over the governance of dispersed and varied peoples: each empire tried to ensure domination through subordinate representation or by denying any representation at all. The most common approach echoed Napoleon's special laws which allowed France to reinstate slavery in its Caribbean possessions. The Spanish and Portuguese constitutions adopted specialness in the 1830s; the United States used comparable guidelines to distinguish between states, territories, and Indian reservations, and the British similarly ruled their dominions and colonies. In all these empires, the mix of indigenous peoples, European origin populations, slaves, and indentured workers, immigrants, and unassimilated social groups led to unequal and hierarchical political relations. Fradera considers not only political and constitutional transformations but also their social underpinnings. Presenting a fresh perspective on the ways in which nations descended and evolved from and throughout empires, *The Imperial Nation* highlights the ramifications of this entangled history for the subjects who lived in its shadows. **The Nation and Its New Women** Ellen

Fleischmann, 2003-04-01. Though they are almost completely absent from the historical record, Palestinian women were extensively involved in the unfolding national struggle in their country during the British mandate period. Led primarily by urban, educated women from the middle and upper classes of Arab society, Palestinian women struggled against British colonialism and against Jewish settlement by holding a national congress, meeting with government officials, smuggling arms, demonstrating, and participating in regional and international conferences. This book is the first comprehensive historical study of the emergence and development of the Palestinian women's movement in this important historical period. Drawing from little studied source material, including oral histories, newspapers, memoirs, and government documents, Ellen Fleischmann not only shows what these women accomplished within the political arena but also explores the social, cultural, and economic contexts within which they operated. Charting the emergence of an indigenous feminism in Palestine, this work joins efforts to broaden European and American definitions of feminism by incorporating non-Western perspectives. *A Comparative Historical and Typological Approach to the Middle Eastern State System* Lars Mjøset, Nils Butenschøn, Kristian

Berg Harpviken,2024-04-19 Showcasing the legacy of Norwegian political scientist and sociologist Stein Rokkan this volume ushers in a new vision in the field of state formation and nation building      **After Appomattox** Gregory P.

Downs,2019-08-13 Original and revelatory David Blight author of Frederick Douglass Avery O Craven Award Finalist A Civil

War Memory Civil War Monitor Best Book of the Year In April 1865 Robert E Lee wrote to Ulysses S Grant asking for peace

Peace was beyond his authority to negotiate Grant replied but surrender terms he would discuss The distinction proved

prophetic After Appomattox reveals that the Civil War did not end with Confederate capitulation in 1865 Instead a second

phase of the war began which lasted until 1871 not the project euphemistically called Reconstruction but a state of genuine

belligerence whose mission was to shape the peace Using its war powers the U S Army oversaw an ambitious occupation

stationing tens of thousands of troops in outposts across the defeated South This groundbreaking history shows that the

purpose of the occupation was to crush slavery in the face of fierce and violent resistance but there were limits to its

effectiveness the occupying army never really managed to remake the South The United States Army has been far too

neglected as a player a force in the history of Reconstruction Downs wants his work to speak to the present and indeed it

should David W Blight The Atlantic Striking Downs chronicles a military occupation that was indispensable to the uprooting

of slavery Boston Globe Downs makes the case that the final end to slavery and the establishment of basic civil and voting

rights for all Americans was born in the face of bayonets A remarkable necessary book Slate      **Encyclopedia of African**

about the Middle East through a sprinkling of information and generalizations deriving largely from media treatments of

current events This scattershot approach can propagate bias and misconceptions that inhibit students abilities to examine

this vitally important part of the world Understanding and Teaching the Modern Middle East moves away from the Orientalist

frameworks that have dominated the West s understanding of the region offering a range of fresh interpretations and

approaches for teachers The volume brings together experts on the rich intellectual cultural social and political history of the

Middle East providing necessary historical context to familiarize teachers with the latest scholarship Each chapter includes

easy to explore sources to supplement any curriculum focusing on valuable and controversial themes that may prove

pedagogically challenging including colonization and decolonization the 1979 Iranian revolution and the US led war on terror

By presenting multiple viewpoints the book will function as a springboard for instructors hoping to encourage students to

negotiate the various contradictions in historical study      **Guerrilla War, Counterinsurgency, and State Formation in**

**Ottoman Yemen, 1872-1911** Vincent Wilhite,2024-06-03 Scholarship on Ottoman Yemen in the 19th and early 20th

centuries is still in the beginning stages and there are no modern military histories in European languages of that period This

book captures the turbulence of late Ottoman Yemen with vivid descriptions of the battles and campaigns between the Zayd

Shiite tribesmen of Yemen and the Ottoman forces It also provides a clear analysis of the political context of these wars discussing how the political structures and ideologies of both the Ottomans and the Zayd rebels impacted the course of these wars and in turn how these wars affected these political structures and ideologies

**A Missionary Nation** Scott Eastman, 2021-10 A Missionary Nation focuses on Spain's crusade to resurrect its empire beginning with the so called War of Africa Fought in Morocco between 1859 and 1860 the campaign involved more than forty five thousand troops and led to a long lasting Spanish engagement in North Africa With popular support the government backed French invasions of Indochina and Mexico and many veteran soldiers from the African war were reenlisted in the brutal and protracted conflict following the reannexation of the Dominican Republic in 1861 In addition expeditions to West Africa built a colonial presence in and around the island of Fernando Po Few works in English have examined the impact of these nineteenth century imperial ventures on Spanish identity notions of race and culture Agents of empire from journalists and diplomats to soldiers spies and clerics took up the mantle of the civilizing mission and pushed back against those who resisted militarized occupations In turn a gendered racialized rhetoric became a linchpin of Spain's growing involvement in North Africa and the Caribbean in the 1850s and 1860s A Missionary Nation interrogates the legacy of Hispanic identities from multiple axes as former colonies were annexed and others were occupied tying together strands of European Mediterranean and Atlantic histories in the second age of global imperialism It challenges the prevailing notion that secular ideologies alone informed imperial narratives in Europe Liberal Spain attempted to reconstruct its great empire of old but the entangled issues of nationalism race and religion frustrated its efforts
