konzipierten Welt nicht konkurrenzfähig sei beherrschte vom Ende des 19. Jahrhunderts besonders seit dem verlorenen Krieg gegen Japan 1894/95 bis in die 1930er Jahre den politischen Diskurs in China selbst wie auch in anderen Ländern der Welt. They show how the Chinese state has sought to reconfigure the nation's position in the world and the centrality of trade, labor, religion, migration, gender, race and literature to this reconfiguration. Among other topics, the contributors examine China's post-Bandung cultural diplomacy with African nations, how West African pastor-entrepreneurs in China interpreted and preached the prosperity doctrine, the diversity of Chinese-Argentine social relations in the soy supply chain and the ties between China and India within the complex history of inter-Asian exchange and Chinese migration to Southeast Asia. By examining China's long historical relationship with the Global South, this volume presents a non-state-centric history of China that foregrounds the importance of transnational communicative and imaginative worldmaking processes and interactions. Contributors: Andrea Bachner, Luciano Damián Bolinaga, Nellie Chu, Rachel Cypher, Mingwei Huang, T. Tu Huynh, Yu-lin Lee, Ng Kim Chew, Lisa Rofel, Carlos Rojas, Shuang Shen, Derek Sheridan, Nicolai Volland. **Quest for Status** Deborah Welch Larson, Alexei Shevchenko, 2019-02-26 A look at how the desire to improve international status affects Russia's and China's foreign policies. Deborah Welch Larson and Alexei Shevchenko argue that the desire for world status plays a key role in shaping the foreign policies of China and Russia. Applying social identity theory, the idea that individuals derive part of their identity from larger communities to nations, they contend that China and Russia have used various modes of emulation, competition and creativity to gain recognition from other countries and thus validate their respective identities. To make this argument, they analyze numerous cases including Catherine the Great's attempts to westernize Russia, China's identity crises in the nineteenth century and both countries' responses to the end of the Cold War. The authors employ a multifaceted method of measuring status, factoring in influence and inclusion in multinational organizations, military clout and

cultural sway among other considerations Combined with historical precedent this socio psychological approach helps explain current trends in Russian and Chinese foreign policy

**The Geography of Contemporary China** Jing'ai Wang,Shunlin Liang,Peijun Shi,2022-06-28 This textbook provides a comprehensive and very detailed insight into Chinese Contemporary Geography in English It documents

the geographical issues associated with China's rapid growth. Since initiating the reforms and open policy, China has achieved tremendous success. China's rapid growth is now a driving force in the global economy and is achieving unprecedented rates of poverty reduction. However, China also faces a number of sustainability and emerging challenges associated with rapid growth, such as growing regional disparities in terms of per capita income and social economic development, sustainable resource development, and issues related to regional and global economic integration. In addition, rapid economic growth has also brought about major challenges such as resource shortages, ecological and environmental destruction, land degradation, and frequent disasters. This book presents the authors' reflections. This lavishly illustrated book covers physical geography, history, and economic and political systems of the world's most populous country. The major focus is on geographical issues in China's contemporary development, agriculture, population, urbanization, resource and energy, and environment. The lead author of the book has taught relevant courses in China for three decades and authored and edited multiple textbooks for Chinese students. This book will appeal to undergraduate students of geography and related disciplines with a regional focus on China and to the general reader who wants to learn different geographical aspects of modern China with little academic background in geography. *China's Intelligentsia in the Late 19th to Early 20th Centuries* Qing Zhang, 2023-09-18

Intelligentsia has been a widely used term in the studies of history and society to describe intellectual, academic, educational, and publishing circles. Zhang Qing analyses the formation of Chinese intelligentsia in the context of modern China, more specifically the late Qing dynasty and Republic of China, and addresses topics such as the expansion of newspaper distributions, the relationship between newspapers and academia, the impact of newspapers on society, the change of readers' expressions, and scholars' social mobility. The emergence of the intelligentsia and other circles in the early twentieth century is an epitome of the drastic changes in Chinese society at the time, indicative both of a new state-society relation and of Chinese scholars' efforts to find new roles and identities for themselves after bidding farewell to imperial examinations. The author shows how both the emergence of new type publications and new roles in academia had a profound influence on modern China. The formation of the intelligentsia at the turn of the twentieth century was not only a key to grasping modern Chinese history but also a mirror for examining the future society.
