 David Burton, 2017-03-02 Buddhism is essentially a teaching about liberation from suffering ignorance selfishness and
 continued rebirth Knowledge of the way things really are is thought by many Buddhists to be vital in bringing about this
 emancipation This book is a philosophical study of the notion of liberating knowledge as it occurs in a range of Buddhist
 sources Buddhism Knowledge and Liberation assesses the common Buddhist idea that knowledge of the three characteristics
 of existence impermanence not self and suffering is the key to liberation It argues that this claim must be seen in the context
 of the Buddhist path and training as a whole Detailed attention is also given to anti realist sceptical and mystical strands
 within the Buddhist tradition all of which make distinctive claims about liberating knowledge and the nature of reality David
 Burton seeks to uncover various problematic assumptions which underpin the Buddhist worldview Sensitive to the wide
 diversity of philosophical perspectives and interpretations that Buddhism has engendered this book makes a serious
 contribution to critical and philosophically aware engagement with Buddhist thought Written in an accessible style it will be
 of value to those interested in Buddhist Studies and broader issues in comparative philosophy and religion **The Presence

The Psychiatric Interview for Differential Diagnosis Lennart Jansson, Julie Nordgaard, 2016-07-18 This book offers an alternative to operational diagnostic manuals and manuals for structured interviewing as the only sources of theoretical and clinical knowledge It provides an exposition of psychiatric interviewing that is theoretically and clinically well founded and supplies the reader with a coherent framework for performance of a thorough psychiatric examination The goal is not to come up with yet another interview scheme but to facilitate an understanding of the basic but today completely neglected tenets of psychopathology and phenomenology This exposition targets the disorders of subjectivity consciousness the second person processes involved in converting subjective first person and observable data into a third person diagnostically useful format In addition the most pertinent clinical descriptions concerning the major diagnostic groups are presented and discussed

Applying Scientific Reasoning to the Field of Marketing Terry Grapentine, 2012-10-03 Marketing decisions often misfire when driven more by beliefs than by knowledge This book will guide you on how to differentiate between the two and to think more clearly and correctly when making those decisions thereby increasing organizational success The author has based this book on the fields of epistemology the study of how knowledge is created and the philosophy of science the study of what it means for a science to be called a science The motivation behind the book is quite simple Given that science is so successful why shouldn't marketers borrow thinking and reasoning skills from science and apply them to marketing Indeed why not The book details the groundwork for learning how to apply scientific reasoning to the field of marketing such as some basic and important definitions What is a belief What is knowledge and identifies barriers to scientific reasoning giving an example from the Dow Chemical Company and just how Dow uses critical thinking and reasoning skills to make more effective marketing and business decisions You'll also learn some real thinking tools you will need to apply scientific reasoning to solving your marketing problems It introduces topics relating to attributes versus constructs the meaning of causation the relationship between coherence and justified beliefs the importance of logic to sound reasoning and the avoidance of logical fallacies in making sound recommendations The book concludes by giving you direction to further improve your ability to apply scientific reasoning to solving marketing problems
