*Inside China's Grand Strategy* Ye Zicheng, 2011-01-01 China's enormous size vast population abundant natural resources robust economy and modern military demonstrate that the nation has emerged as a great world power Inside China's Grand Strategy The Perspective from the People's Republic analyzes China's economic social political and military development assessing the extent of China's dominance Highly regarded Chinese scholar Ye Zicheng offers a rare insider's perspective on the country's geopolitical ambitions and strategic thinking Inside China's Grand Strategy argues that China's primary obstacle to achieving enduring status as a world power is its domestic state of affairs Ye examines the impact of unemployment corruption massive economic gaps between classes population size strains on natural and labor resources environmental degradation and other issues that impede China's continuing development Some analysts claim that repressive domestic policies threaten the country's goal of modernization but Ye points to China's recent inclusion in the G 20 as an indicator of future success Ye contends that China's progress hinges on many factors peaceful development extensive governmental reform with a system of checks and balances social and economic development on the mainland and strategies for reunification especially with Taiwan Ye asserts that military pressure may be required to integrate Taiwanese separatist forces but advises that development should remain China's primary goal because it will eventually lead to unification Although Ye argues that democracy is the only way to repair the corrupt systems that perpetuate economic inequality he specifies that a Western style democracy is not what China needs As the United States destiny is increasingly bound to China's growth and American policies are being evaluated in the realm of geopolitics it is important to gauge and understand China's ambitions An authoritative and up to date analysis from within Chinese society Inside China's Grand Strategy is an indispensable resource for Western scholars offering a new window on Chinese development The Art and Practice of Military Strategy George Edward Thibault, 1984 **Military Power And The Advance Of Technology** Seymour J. Cimbala, 2000-05-30 The future of nuclear weapons and nuclear strategy in the 21st century is not entirely predictable from the Cold War past Nor is it easy to foresee on the basis of what has happened since the Soviet Union collapsed in 1991 Cimbala contends that nuclear weapons and the psychology of nuclear deterrence will remain important after 2000 but the character of that importance will change No longer will nuclear weapons be the dominators of military technology Instead advanced technology conventional weapons based on information and electronics will supplant nuclear weapons as the instruments of military supremacy in the 21st century What Cimbala asks can be expected of nuclear weapons in the 21st century given what we have learned from previous experience in the Cold War and in the 1990s Cimbala

expects that nuclear weapons will spread among currently non nuclear states and states with regional grievances or hegemonic aspirations will seek to deploy small nuclear forces as deterrents against neighbors or against outside intervention by the United States in regional conflicts Regional rogue states may also obtain nuclear weapons Nonetheless as Cimballa explains the international balance of power is unlikely to change As he makes clear power will be less dependent on deployed military platforms and more dependent on information warfare A thoughtful and provocative analysis that will be of particular interest to policy makers scholars and other researchers involved with arms control security studies and international relations Disarmament Army Library (U.S.),1960 *The Diffusion of Military Technology and Ideas* Emily O.
