## **Modern Mongolia From Khans To Commissars To Capitalists:**

**Modern Mongolia** Morris Rossabi, 2005-04-25 Land locked between its giant neighbors Russia and China Mongolia was the first Asian country to adopt communism and the first to abandon it When the Soviet Union collapsed in the early 1990s Mongolia turned to international financial agencies including the International Monetary Fund the World Bank and the Asian Development Bank for help in compensating for the economic changes caused by disruptions in the communist world Modern Mongolia is the best informed and most thorough account to date of the political economy of Mongolia during the past decade In it Morris Rossabi explores the effects of the withdrawal of Soviet assistance the role of international financial agencies in supporting a pure market economy and the ways that new policies have led to greater political freedom but also to unemployment poverty increasingly inequitable distribution of income and deterioration in the education health and well being of Mongolian society Rossabi demonstrates that the agencies providing grants and loans insisted on Mongolia s adherence to a set of policies that did not generally take into account the country s unique heritage and society Though the sale of state assets minimalist government liberalization of trade and prices a balanced budget and austerity were supposed to yield marked economic growth Mongolia the world s fifth largest per capita recipient of foreign aid did not recover as expected As he details this painful transition from a collective to a capitalist economy Rossabi also analyzes the cultural effects of the sudden opening of Mongolia to democracy He looks at the broader implications of Mongolia s international situation and considers its future particularly in relation to China

## **Pastoralism and Common Pool Resources**

Sandagsuren Undargaa, 2016-03-31 The grazing of animals on common land and associated property rights were the original basis of the concept of the tragedy of the commons Drawing on the classic work of Elinor Ostrom and the readings of political ecology this book questions the application of exclusive property rights to mobile pastoralism and rangeland resource governance It argues that this approach inadequately represents property relations in the context of Mongolian pastoralism The author presents an in depth exploration and analysis of mobile pastoral production and resource management in Mongolia The country is widely considered to be a prime example of successful and resilient common pool resource management but now faces a dilemma as policy advocates attempt to adjust historical pastoralism to a modern property regime framework The book strengthens understanding of the complex and multilateral considerations involved in natural resource governance and management in a mobile pastoralist context It considers the implications for common pool resource management and pastoral societies in Africa Russia and China and includes recommendations for formulating national policy

**China's Foreign Relations and the Survival of Autocracies** Julia Bader, 2014-10-30 The Chinese government has frequently been criticized for propping up anti democratic governments This book investigates the rise of China as an emerging authoritarian power By comparing China s bilateral relations to three Asian developing countries Burma Cambodia and Mongolia it examines how China targets specific groups of actors in autocracies versus non autocracies It illustrates how

the Chinese non interference policy translates into support for incumbent leaders in autocratic countries and how the Chinese government has thereby profited from exploiting secretive decision making in autocracies to realize its own external interests such as achieving access to natural resources In a statistical analysis of the patterns of Chinese external cooperation and their impact on the survival of autocratic leaders the book finds some evidence that China is more likely to target autocracies with economic cooperation However only some forms of bilateral interaction are found to increase the prospect of survival for autocratic leaders This important contribution to the understanding of both external factors of authoritarian endurance and China s foreign relations a field of study still lacking systematic investigation will be of great interest to students and researchers in Development Studies Asian Studies International Relations and International Political Economy

Does Everyone Want Democracy? Paula L. W. Sabloff, 2016-06-16 Do all people desire democracy For at least a century the idea that democracy is a universal good has been an article of faith for American policy makers Paula Sabloff challenges this conventional wisdom about who wants democracy and why Arguing that certain universal human aspirations exist she shows how local realities are highly particularistic and explains that culture history and values are critical to the study of political systems Her fascinating study of Mongolia feudal until it became the first country to follow Russia into communism and now struggling with post socialist democratization is a model for investigating how everyday people around the world actually think about and implement democracy on their own terms
