An Introduction to the Psychology of Paranormal Belief and Experience Tony Jinks,2011-11-08 When someone admits to a strange experience such as witnessing an unidentified flying object having telepathic hunches or seeing angels or ghosts listeners usually explain it away as mistaken perception intoxication ignorance or even mental illness Though these unsympathetic psychology based explanations remain the most popular responses to claims of the supernatural those who use them often have little understanding of what such dismissive solutions actually entail This study offers a balanced and accessible analysis of various explanations for the paranormal By providing insight into how these theories are applied or misapplied to inquiry into the paranormal it clarifies the relationship between the field of psychology and the supernatural
