Modern Art And The Object:

Modern Art And The Object Ellen H. Johnson, 2019-03-04 This book is devoted to a reexamination of modern art from the point of view of the artist's approach to the object. It chronicles the complex changing relationship between art and the object over the past hundred years, a fundamental organicism relationship as one thing grows out of another. **Modern Art**

and the Object ELLEN H. JOHNSON, Taylor & Francis Group, 2019-06-28 [The Changing Boundaries and Nature of the Modern Art World](#) Richard Kalina, 2021-04-08 Concentrating on the shifting boundaries and definition of art, Richard Kalina offers a panoramic view of the contemporary art scene over the last 30 years. His focus is on the ongoing development of concepts, the transformation of art worlds and the social matrices in which they are created. Discussing painting in general and abstract painting in particular, his survey takes in photorealism, sculpture and art forms found outside of the modernist tradition. Kalina's group of artists includes Mel Bochner, Joan Mitchell, Cy Twombly, Franz West and Alma Thomas, who in their ongoing projects explicitly or implicitly questioned the aesthetic assumptions of their times. Merging an examination of animating philosophies and context, political, social and personal, with a sharply focused look at the works of art themselves, Kalina brings us closer to understanding the social matrices in which art is embedded and responds to bigger questions about the object nature of the work of art in today's world. **From Space in Modern Art to a Spatial Art History** Jutta

Vinzent, 2019-12-02 This book traces artists' theories of constructive space in the first half of the twentieth century. Drawing on these concepts and recent theories on space, it develops a methodology termed Spatial Art History that conceives of artworks as physical spatio-temporal things which produce the social to overcome the reductive understanding of art as a mere mirror or facilitator of society. *Dictionary Of Modern Art* Matthew Baigell, 2021-12-13 Alphabetically arranged and cross-referenced entries provide background information on major American painters, sculptors, printmakers and photographers, plus important topics and movements central to American art from the sixteenth century to the present.

Boundaries of Modern Art Richard Pooler, 2013-02-04 Conceptual art in the Western world is in crisis. That is the view of many people who are disillusioned with what they regard as its attention-seeking antics, where artists themselves have proudly proclaimed the death of art. Why has art been on this road to destruction and how did it get there? How does one make sense of the bewildering complexity of Conceptual art and how does one extract meaning from its diverse and sometimes bizarre manifestations? This predicament needs explanation and an exploration of the theoretical underpinnings of modern and contemporary art and a means to evaluate it. This book starts with a summarised overview of the major art movements since the beginning of the twentieth century, a tracing of the extraordinary journey that art has followed in modern times. The next part considers contemporary art movements to explore whether they have value and how that value can be determined. Are the activities that take place in the name of art actually art? Or as some would have it, is it a gigantic sham manipulated by clowns to make a trap for fools? To some it is an outrage that modern and contemporary artists can

splash paint around quickly and freely with a modicum of skill or assemble a range of found objects and regard themselves as gifted and creative artists Others see this as a new forward rolling wave with art at last released from the suffocation and restrictions of the past The rules have been cast aside There are fresh ways of exploring and seeing the world and expressing it freely The world is constantly changing and art must change with it Modern art has followed a long journey Traditions have been largely cast aside and replaced with an unceasing search for the new Our apparent progress is now being questioned Where do we go from here Are we on the right road The second half of this book discusses how we can make sense of contemporary art and assign value to an artwork Traditional painting and sculpture have physical limits Conceptual art does not This is a new freedom but is it freedom for art or freedom from art

The Contingent Object of

Contemporary Art Martha Buskirk, 2005-02-18 An exploration of transformations in the nature of the art object and artistic authorship in the last four decades In this book Martha Buskirk addresses the interesting fact that since the early 1960s almost anything can and has been called art Among other practices contemporary artists have employed mass produced elements impermanent materials and appropriated imagery have incorporated performance and video and have created works through instructions carried out by others Furthermore works of art that lack traditional signs of authenticity or permanence have been embraced by institutions long devoted to the original and the permanent Buskirk begins with questions of authorship raised by minimalists use of industrial materials and methods including competing claims of ownership and artistic authorship evident in conflicts over the right to fabricate artists works Examining recent examples of

appropriation she finds precedents in pop art and the early twentieth century readymade and explores the intersection of contemporary artistic copying and the system of copyrights trademarks and brand names characteristic of other forms of commodity production She also investigates the ways that connections between work and context have transformed art and institutional conventions the impact of new materials on definitions of medium the role of the document as both primary and secondary object and the significance of conceptually oriented performance work for the intersection of photography and the human body in contemporary art Buskirk explores how artists active in the 1980s and 1990s have recombined strategies of the art of the 1960s and 1970s She also shows how the mechanisms through which art is presented shape not only readings of the work but the work itself She uses her discussion of the readymade and conceptual art to explore broader issues of authorship reproduction context and temporality

When Modern Became Contemporary Art Charles Green, Heather Barker, 2024-09-19 This book is a portrait of the period when modern art became contemporary art It explores how and why writers and artists in Australia argued over the idea of a distinctively Australian modern and then postmodern art from 1962 the date of publication of a foundational book *Australian Painting 1788-1960* up to 1988 the year of the Australian Bicentennial Across nine chapters about art exhibitions curators and critics this book describes the shift from modern art to contemporary art through the successive attempts to define a place in the world for Australian art But by 1988 Australian art looked less and less like a viable tradition inside which to interpret our art Instead vast gaps appeared since mostly male and often older White writers had limited their horizons to White Australia alone National stories by White men like borders had less and less explanatory value Underneath this a perplexing subject remained the absence of Aboriginal art in understanding what Australian art was during the period that established the idea of a distinctive Australian modern and then contemporary art This book reflects on why the embrace of Aboriginal art was so late in art museums and histories of Australian art arguing that this was because it was not part of a national story dominated by colonial then neo colonial dependency It is important reading for all scholars of both global and Australian art and for curators and artists

Creative Thinking C J Hollins, 2012-01-28 What would Cézanne Monet Picasso Kandinsky and the other founders of modern art think of Damien Hirst's shark in formaldehyde or Tracey Emin's unmade bed Has modern art moved on since the breakthroughs of these early pioneers or are we going round in circles Has modern art merely become a carnival of the shocking grotesque and ridiculous because modern artists have failed to comprehend what Modernism emerged to explore Have modern artists become so intoxicated by the need for notoriety and celebrity status that they are no longer interested in the quest for a genuine art experience In this collection of essays written between 1968 and 2010 C J Hollins reveals his thoughts on these questions in an unflinching attempt to open our eyes to the enigma of modern art From early cave paintings and traditional masterpieces Hollins explores the development of art ending at the current crisis point of our times More importantly he offers concrete theories of what the modern artist should be striving to achieve to move us closer to a new way of perceiving the world

Unsolvable Contemporary Paul Rabinow, 2017-10-19 In Unsolvable Contemporary Paul Rabinow continues his explorations of a philosophic anthropology of the contemporary Defining the contemporary as a moving ratio in which the modern becomes historical Rabinow shows how an anthropological

ethos of the contemporary can be realized by drawing on the work of art historians cultural critics social theorists and others thereby inventing a methodology he calls anthropological assemblage He focuses on the work and persona of German painter Gerhard Richter demonstrating how reflecting on Richter s work provides rich insights into the practices and stylization of what following Aby Warburg one might call the afterlife of the modern Rabinow opens with analyses of Richter s recent Birkenau exhibit both the artwork and its critical framing He then chronicles Richter s experiments in image making as well as his subtle inclusion of art historical and critical discourses about the modern This Rabinow contends enables Richter to signal his awareness of the stakes of such theorizing while refusing the positioning of his work by modernist critical theorists In this innovative work Rabinow elucidates the ways meaning is created within the contemporary
