Lapidus, 2012-10-29 First published in 1988 Ira Lapidus A History of Islamic Societies has become a classic in the field enlightening students scholars and others with a thirst for knowledge about one of the world's great civilizations This book based on fully revised and updated parts one and two of this monumental work describes the transformations of Islamic societies from their beginning in the seventh century through their diffusion across the globe into the challenges of the nineteenth century The story focuses on the organization of families and tribes religious groups and states showing how they were transformed by their interactions with other religious and political communities. The book concludes with the European commercial and imperial interventions that initiated a new set of transformations in the Islamic world and the onset of the modern era Organized in narrative sections for the history of each major region with innovative analytic summary introductions and conclusions this book is a unique endeavour The Myth of Continents Martin W. Lewis, Kären

Wigen, 1997-08-11 In this thoughtful and engaging critique geographer Martin W Lewis and historian K ren Wigen reexamine the basic geographical divisions we take for granted and challenge the unconscious spatial frameworks that govern the way we perceive the world Arguing that notions of East vs West First World vs Third World and even the sevenfold continental system are simplistic and misconceived the authors trace the history of such misconceptions. Their up to the minute study reflects both on the global scale and its relation to the specific continents of Europe Asia and Africa actually part of one contiguous landmass The Myth of Continents sheds new light on how our metageographical assumptions grew out of cultural concepts how the first continental divisions developed from classical times how the Urals became the division between the so called continents of Europe and Asia how countries like Pakistan and Afghanistan recently shifted macroregions in the general consciousness This extremely readable and thought provoking analysis also explores the ways that new economic regions the end of the cold war and the proliferation of communication technologies change our understanding of the world It stimulates thinking about the role of large scale spatial constructs as driving forces behind particular worldviews and encourages everyone to take a more thoughtful geographically informed approach to the task of describing and interpreting the human diversity of the planet The Dictionary Catalog of the Vivian G.
