**Navigating World History** P. Manning, 2003-05-15 World history has expanded dramatically in recent years primarily as a teaching field and increasingly as a research field Growing numbers of teachers and Ph Ds in history are required to teach the subject They must be current on topics from human evolution to industrial development in Song dynasty China to today's disease patterns and then link these disparate topics into a coherent course Numerous textbooks in print and in preparation summarize the field of world history at an introductory level But good teaching also requires advanced training for teachers and access to a stream of new research from scholars trained as world historians In this book Patrick Manning provides the first comprehensive overview of the academic field of world history He reviews patterns of research and debate and proposes guidelines for study by teachers and by researchers in world history The Ecological

Rift John Bellamy Foster, Brett Clark, Richard York, 2011-11-01 Humanity in the twenty first century is facing what might be described as its ultimate environmental catastrophe the destruction of the climate that has nurtured human civilization and with it the basis of life on earth as we know it All ecosystems on the planet are now in decline Enormous rifts have been driven through the delicate fabric of the biosphere The economy and the earth are headed for a fateful collision if we don't alter course In The Ecological Rift Capitalism's War on the Earth environmental sociologists John Bellamy Foster Brett Clark and Richard York offer a radical assessment of both the problem and the solution They argue that the source of our ecological crisis lies in the paradox of wealth in capitalist society which expands individual riches at the expense of public wealth including the wealth of nature In the process a huge ecological rift is driven between human beings and nature undermining the conditions of sustainable existence a rift in the metabolic relation between humanity and nature that is irreparable within capitalist society since integral to its very laws of motion Critically examining the sanguine arguments of mainstream economists and technologists Foster Clark and York insist instead that fundamental changes in social relations must occur if the ecological and social problems presently facing us are to be transcended Their analysis relies on the development of a deep dialectical naturalism concerned with issues of ecology and evolution and their interaction with the economy Importantly they offer reasons for revolutionary hope in moving beyond the regime of capital and toward a society of sustainable human development Caught in the Cultural Preference Net Michael J. Camasso, Radha

Jagannathan,2021-01-27 How big of a role have national cultures the collection of values beliefs attitudes and preferences played in the formation of social and economic identities If substantial can these identities impact work related attitudes and impact personal decision as specific as the preferred type of job or even the choice of seeking employment at all At a time when Millennials and Generation Z ers are facing prodigious employment challenges it is more timely than ever to examine the ways culture especially cultural transmission from older to younger generations facilitate hinder influence labor force attachment and even the work ethic itself Caught in the Cultural Preference Net examines work related beliefs attitudes and preferences that characterize the value orientations of three generational families in Germany Sweden Spain Italy India and the United States These six countries have developed significantly different forms of capitalism ranging from the social democratic form in Sweden to the relatively unfettered free market capitalism in the United States Michael J Camasso and Radha Jagannathan investigate whether these cultural and economic contexts have resulted in enduring attitude and preference structures or if these values and preferences have been changing as economic conditions in a nation have changed These two experts focus a great deal of their attention on the roles that parents and grandparents have in socializing Millennials into the world of work and if this influence trumps the often competing influences of education labor market and peers The book is organized around three lines of inquiry 1 Do some national cultures possess value orientations that are more successful than others in promoting economic opportunity 2 Does the transmission of these value orientations demonstrate a persistence irrespective of economic conditions or are they simply the results of these conditions 3 If a nation s value orientation does indeed impact economic opportunity does it do so by influencing an individual s preferences To answer this third question Camasso and Jagannathan conduct a cross national multi generational stated preference experiment one of the very few ever attempted The resulting book reveals substantial cultural stability across generations in some of the six capitalist democracies and substantial intergenerational change in others The implications of this differential impact for national employment strategies are explored as are the implications for a global economy distinguished by abundant well paying service jobs for youth

*Critique of the Legal Order* Richard Quinney,Randall G. Shelden,2018-02-06 Originally published thirty years ago Critique of the Legal Order remains highly relevant for the twenty first century Here Richard Quinney provides a critical look at the legal order in capitalist society Using a traditional Marxist perspective he argues that the legal order is not intended to reduce crime and suffering but to maintain class differences and a social order that mainly benefits the ruling class Quinney challenges modern criminologists to examine their own positions As ancillary agents of power criminologists provide information that governing elites use to manipulate and control those who threaten the system Quinney s original and thorough analysis of crime control bureaucracies and the class basis of such bureaucracies anticipates subsequent research and theorizing about the crime control industry a system that aims at social control of marginalized populations rather than elimination of the social conditions that give rise to crime He forcefully argues that technology applied to a war against crime together with academic scholarship is used to help maintain social order to benefit a ruling class Quinney also suggests alternatives Anticipating the work of Noam Chomsky he suggests we must first overcome a powerful media that provides a general framework that serves as the boundary of expression Chomsky calls this the manufacture of consent by providing necessary illusions Quinney calls for a critical philosophy that enables us
