## **Modern Chinese State:**

**Origins of the Modern Chinese State** Philip A. Kuhn, 2003-08 What is Chinese about China's modern state This book proposes that the state we see today has developed over the past two centuries largely as a response to internal challenges emerging from the late empire Well before the Opium War Chinese confronted such constitutional questions as How does the scope of political participation affect state power How is the state to secure a share of society's wealth In response to the changing demands of the age this agenda has been expressed in changing language Yet because the underlying pattern remains recognizable the modernization of the state in response to foreign aggression can be studied in longer perspective The author offers three concrete studies to illustrate the constitutional agenda in action how the early nineteenth century scholar activist Wei Yuan confronted the relation between broadened political participation and authoritarian state power how the reformist proposals of the influential scholar Feng Guifen were received by mainstream bureaucrats during the 1898 reform movement and how fiscal problems of the late empire formed a backdrop to agricultural collectivization in the 1950s In each case the author presents the modern constitutional solution as only the most recent answer to old Chinese questions The book concludes by describing the transformation of the constitutional agenda over the course of the modern period

**The Making of the Modern Chinese State** Huaiyin Li, 2019-08-13 The Making of the Modern Chinese State 1600-1950 offers an historical analysis of the formation of the modern Chinese state from the seventeenth century to the mid twentieth centuries providing refreshing and provocative interpretations on almost every major issue regarding the rise of modern China This book explores the question of why today's China is unlike any other nation state in size and structure It inquires into the reasons behind the striking continuity in China's territorial and ethnic compositions over the past centuries and explicates the genesis and tenacity of the Chinese state as a highly centralized and unified regime that has been able to survive into the twenty first century Its analysis centres on three key variables namely geopolitical strategy fiscal constitution and identity building and it demonstrates how they worked together to shape the outcome of state transformation in modern China Enhanced by a selection of informative tables and illustrations The Making of the Modern Chinese State 1600-1950 is ideal for undergraduates and graduates studying East Asian history Chinese history empires in Asia and state formation

**The Modern Chinese State** David Shambaugh, 2000-03-28 The Modern Chinese State is the first book to examine systematically the evolution of the Chinese state from the late Ming Dynasty of the 17th century through the Nationalist and Communist party states of the 20th century and into the 21st century Leading scholars on modern China carefully assess the internal organization of the Chinese state over time the ruling parties that have governed it the foreign and indigenous systems that have served as models for state building and political development and the array of concepts that have guided Chinese thinking about the state

**Xinjiang and the Modern Chinese State** Justin M. Jacobs, 2016-04-18 Xinjiang and the Modern Chinese State views modern Chinese political history from the perspective of Han officials who were tasked with

governing Xinjiang This region inhabited by Uighurs Kazaks Hui Mongols Kirgiz and Tajiks is also the last significant colony of the former Qing empire to remain under continuous Chinese rule throughout the twentieth century By foregrounding the responses of Chinese and other imperial elites to the growing threat of national determination across Eurasia Justin Jacobs argues for a reconceptualization of the modern Chinese state as a national empire He shows how strategies for administering this region in the late Qing Republican and Communist eras were molded by and shaped in response to the rival platforms of ethnic difference characterized by Soviet and other geopolitical competitors across Inner and East Asia This riveting narrative tracks Xinjiang political history through the Bolshevik revolution the warlord years Chinese civil war and the large scale Han immigration in the People s Republic of China as well as the efforts of the exiled Xinjiang government in Taiwan after 1949 to claim the loyalty of Xinjiang refugees

**The Modern Chinese State** David Shambaugh, 2000-05-08 Publisher Description

**The Making of the Modern Chinese State** Humphrey Ko, 2016-12-08 This text addresses the corporate causes of the collapse of the Qing Dynasty and the emergence of modern Republican China Weaving together political legal and business histories it focuses on the key relationship between China cement and corporations and demonstrates how the particular circumstances of cement manufacturing in nineteenth and early twentieth century China serve to illuminate key aspects of Chinese political economy and illustrate the importance of legal frameworks in the emergence of industrial enterprises Examining the centrality of legal personality in China s historical story seen from the angle of cement manufacturing corporations it offers an alternative historical perspective on the making of the modern Chinese States and delves into the involvement of larger than life historical figures of modern China such as Yuan Shikai Chiang Kai shek and the revolutionary and the father of modern China Sun Yat sen in the unfolding of these events

**Contender States and Modern Chinese International Thought** Ferran Perez Mena, 2024-05-17 This book contends that the development of modern Chinese international thought has been profoundly shaped by the distinctive nature of the Chinese state as a contender state and its global positioning since 1912 The argument posited demonstrates that notwithstanding the varied perspectives on the international held by Chinese intellectuals throughout the 20th century there exist commonalities across the periods analyzed in this book In essence the book emphasizes that the shared elements influencing the production of modern Chinese international thought do not derive from a unified cultural Chinese identity but rather stem from China s evolving geopolitical position in the modern world

**After Empire** Peter Zarrow, 2012-03-28 From 1885 1924 China underwent a period of acute political struggle and cultural change brought on by a radical change in thought after over 2 000 years of monarchical rule the Chinese people stopped believing in the emperor These forty years saw the collapse of Confucian political orthodoxy and the struggle among competing definitions of modern citizenship and the state What made it possible to suddenly imagine a world without the emperor After Empire traces the formation of the modern Chinese idea of the state through the radical reform programs of the late Qing 1885 1911 the Revolution of 1911 and the first years of the

Republic through the final expulsion of the last emperor of the Qing from the Forbidden City in 1924. It contributes to longstanding debates on modern Chinese nationalism by highlighting the evolving ideas of major political thinkers and the views reflected in the general political culture. Zarrow uses a wide range of sources to show how statism became a hegemonic discourse that continues to shape China today. Essential to this process were the notions of citizenship and sovereignty which were consciously adopted and modified from Western discourses on legal theory and international state practices on the basis of Chinese needs and understandings. This text provides fresh interpretations and keen insights into China's pivotal transition from dynasty to republic.

**The Bloomsbury Handbook of Modern Chinese Literature in Translation** Cosima Bruno, Lucas Klein, Chris Song, 2023-10-19. Offering the first systematic overview of modern and contemporary Chinese literature from a translation studies perspective, this handbook provides students, researchers, and teachers with a context in which to read and appreciate the effects of linguistic and cultural transfer in Chinese literary works. Translation matters. It always has, of course, but more so when we want to reap the benefits of intercultural communication. In many universities, Chinese literature in English translation is taught as if it had been written in English. As a result, students submit what they read to their own cultural expectations; they do not read in translation and do not attend to the protocols of knowing, engagements, and contestations that bind literature and society to each other. The Bloomsbury Handbook of Modern Chinese Literature in Translation squarely addresses this pedagogical lack. Organised in a tripartite structure around considerations of textual, social, and large-scale spatial and historical circumstances, its thirty-plus essays each deal with a theme of translation studies as emerged from the translation of one or more Chinese literary works. In doing so, it offers new tools for reading and appreciating modern and contemporary Chinese literature in the global context of its translation, offering in-depth studies about eminent Chinese authors and their literary masterpieces in translation. The first of its kind, this book is essential reading for anyone studying or researching Chinese literature in translation.

**Modern Chinese Legal Reform** Xiaobing Li, Qiang Fang, 2013-02-15. China's rapid socioeconomic transformation of the past twenty years has led to dramatic changes in its judicial system and legal practices. As China becomes more powerful on the world stage, the global community has dedicated more resources and attention to understanding the country's evolving democratization, and policymakers have identified the development of civil liberties and long-term legal reforms as crucial for the nation's acceptance as a global partner. Modern Chinese Legal Reform is designed as a legal and political research tool to help English-speaking scholars interpret the many recent changes to China's legal system. Investigating subjects such as constitutional history, the intersection of politics and law, democratization, civil legal practices, and judicial mechanisms, the essays in this volume situate current constitutional debates in the context of both the country's ideology and traditions and the wider global community. Editors Xiaobing Li and Qiang Fang bring together scholars from multiple disciplines to provide a comprehensive and balanced look at a difficult subject. Featuring newly available official sources and interviews with

Chinese administrators judges law enforcement officers and legal experts this essential resource enables readers to view key events through the eyes of individuals who are intimately acquainted with the challenges and successes of the past twenty years

**Ten Lessons in Modern Chinese History** Zheng Yangwen, 2018-04-25 This book is a timely and solid portrait of modern China from the First Opium War to the Xi Jinping era Unlike the handful of existing textbooks that only provide narratives this textbook fashions a new and practical way to study modern China Written exclusively for university students A level or high school teachers and students it uses primary sources to tell the story of China and introduces them to existing scholarship and academic debate so they can conduct independent research for their essays and dissertations This book will be required reading for students who embark on the study of Chinese history politics economics diaspora sociology literature cultural urban and women s studies It would be essential reading to journalists NGO workers diplomats government officials businessmen and travellers

**Nation-State by Construction** Suisheng Zhao, 2004 This is the first historically comprehensive up to date analysis of the causes content and consequences of nationalism in China an ancient empire that has struggled to construct a nation state and find its place in the modern world It shows how Chinese political elites have competed to promote different types of nationalism linked to their political values and interests and imposed them on the nation while trying to repress other types of nationalism In particular the book reveals how leaders of the PRC have adopted a pragmatic strategy to use nationalism while struggling to prevent it from turning into a menace rather than a prop     *The Columbia Guide to Modern Chinese History* R. Keith Schoppa, 2000-08-05 China the world's oldest and most populous state remains an enigma to most people in the West even at a time when that country is playing an increasingly prominent role on the international stage At the heart of modern Chinese history have been the efforts of the Chinese people to transform their polity into a modern nation state the Confucian orthodoxy into an ideology that can help direct that process and an agrarian economy into an industrial one These efforts are ongoing and of great importance This book is both an introduction to the major features of modern Chinese history and a resource for researchers interested in virtually any topic relating to the Chinese experience of the last 220 years This valuable reference contains a historical narrative providing a comprehensive overview of five core aspects of Chinese history domestic politics society the economy the world of culture and thought and relations with the outside world a compendium of 250 short descriptive articles on key figures events and terms a resource guide containing approximately 500 annotated entries for the most authoritative sources for further research in English as well as descriptions of important films depicting modern China and a guide to electronic resources and appendices including a chronology excerpts from key primary source documents and a wealth of tables and graphs on demographic social and economic trends     Modern Chinese History Harley Farnsworth MacNair, 1923     *Teachers' Schools and the Making of the Modern Chinese Nation-State, 1897-1937* Xiaoping Cong, 2011-01-01 During the educational and social transformations in politically tumultuous early twentieth century China Chinese teacher's schools played a critical role They were a force in the changes that swept Chinese society bridging Chinese and Western ideals empowering women and contributing to rural modernization This innovative account examines the social and political aspects and impacts of these schools their role in a society in transition and their production of grassroots forces that lead to the Communist Revolution     **Introduction to Modern Chinese** A.
