Modern Communications and Foreign Policy United States. Congress. House. Committee on Foreign Affairs. Subcommittee on International Organizations and Movements, 1967 The Postal Age David M. Henkin, 2008-09-15 Americans commonly recognize television e mail and instant messaging as agents of pervasive cultural change But many of us may not realize that what we now call snail mail was once just as revolutionary As David M Henkin argues in The Postal Age a burgeoning postal network initiated major cultural shifts during the nineteenth century laying the foundation for the interconnectedness that now defines our ever evolving world of telecommunications This fascinating history traces these shifts from their beginnings in the mid 1800s when cheaper postage mass literacy and migration combined to make the long established postal service a more integral and viable part of everyday life With such dramatic events as the Civil War and the gold rush underscoring the importance and necessity of the post a surprisingly broad range of Americans male and female black and white native born and immigrant joined this postal network regularly interacting with distant locales before the existence of telephones or even the widespread use of telegraphy Drawing on original letters and diaries from the period as well as public discussions of the expanding postal system Henkin tells the story of how these Americans adjusted to a new world of long distance correspondence crowded post offices junk mail valentines and dead letters The Postal Age paints a vibrant picture of a society where possibilities proliferated for the kinds of personal and impersonal communications that we often associate with more recent historical periods In doing so it significantly increases our understanding of both

antebellum America and our own chapter in the history of communications **The New Communications Technologies**

Notational and mathematical preliminaries *Nineteenth-Century Communications: A Documentary History, 1780-1918* Nicola Kirkby, Karin Koehler, Eleanor Hopkins, Kathleen McIlvenna, Ellen Smith, Harriet M. Thompson, 2025-09-30 This volume foregrounds the close and mutually informing relationships between mediated communication and technological innovation during the nineteenth century. It draws attention to the fact that communication was a driver of innovation but also considers how communication practices adapted to new media and technologies. The following themes and subjects are covered: The development of the telegraph from the semaphore in the late eighteenth century to the wireless in the late nineteenth. The shift from privately owned to nationalised telegraph infrastructure and services. Mail trains travelling post offices and accelerated public communication. The development of and cultural responses to steam packet technologies and infrastructures and accelerated international communication. The development of and cultural responses to submarine and transoceanic telegraphy. The beginnings of telephony **The Toronto School of Communication Theory** Rita

Watson, Menahem Blondheim, 2008-02-23 While never formally recognized as a school of thought in its time, the work of a number of University of Toronto scholars over several decades, most notably Harold Adams Innis and Marshall McLuhan, formulated a number of original attempts to conceptualize communication as a phenomenon and launched radical and innovative conjectures about its consequences. This landmark collection of essays reassesses the existence and re-evaluates the contribution of the so-called Toronto School of Communication. While the theories of Innis and McLuhan are notoriously resistant to neat encapsulation, some general themes have emerged in scholarly attempts to situate them within the discipline of communications studies that they helped to define. Three such themes focus on the effects and consequences of communications: emphasis on communications as a process rather than as structure; and a sharp focus on the technology of communication or the medium as the most fundamental in characterizing the unique perspective of the Toronto School. This collection not only represents a crucial step in defining the Toronto School, it also provides close analysis of the ideas of its individual members *Nineteenth-Century Communications: A Documentary History, 1780-1918* Ellen Smith, Karin

Koehler, Nicola Kirkby, Eleanor Hopkins, Harriet M. Thompson, Kathleen McIlvenna, 2025-09-30 This volume pays particular attention to Britain's embeddedness and role in shaping a rapidly expanding global communications network. In particular, it reflects the links between communications and Britain's imperial and colonial projects. It covers the development of imperial communication routes and infrastructures as well as, in the late nineteenth century, the introduction of imperial penny postage. The ramifications of new technologies and media of communication for warfare and diplomacy between the end of the Napoleonic Wars and the beginning of the First World War. Emigrants' correspondence. The domestic significance of

communication infrastructure in relation to British national identity The 1874 establishment of the Union Postale Universelle and related initiatives to globalise communications *Railway Signaling and Communications* ,1942 Law Enforcement, Communication, and Community Howard Giles,2002 Given widespread media attention to issues of crime and its prevention police heroism and new modes of police community involvements this international collection is timely It is unique in examining ways in which police and citizens communicate across a range of contexts and problem areas While much attention is afforded the critical roles of communication by police agencies there has been little recourse to communication science and its theories Likewise the latter has not until recently concerned itself with analyzing police citizen interactions This volume examines the character of such encounters forging new theoretical frameworks having implications for practice in many instances Topics include media portrayals of law enforcement communication and new technologies within police culture domestic violence hate crimes stalking sexual abuse and hostage negotiations This book should be relevant not only to a range of social sciences besides Communication scholars and students but also to practitioners working in the field
