Modern German Philosophy:

Modern German Philosophy Rüdiger Bubner, 1981 **Nietzsche and Modern German Thought** Keith Ansell-Pearson, 2012-10-12 Nietzsche is no longer a marginal figure in the study of philosophy. This collection of specially commissioned essays reflects the emergence of a serious interest amongst philosophers, sociologists and political theorists. By considering Nietzsche's ideas in the context of the modern philosophical tradition from which it emerged, his importance in contemporary thought is refined and reaffirmed. Modern German thought begins with Kant and has rarely escaped his influence. It is with respect to this Kantian heritage that this volume examines Nietzsche. These essays critically consider Nietzsche's relation to Kant and the post-Kantian tradition. In broad terms, it is his relation to the domains of knowledge, ethics and aesthetics that is through the three Kantian critiques that Nietzsche's thought is illuminated. This allows a surprising variety of areas and questions both about Nietzsche and about philosophy to be investigated. **Early Modern German Philosophy (1690-1750)** Corey W. Dyck, 2019-12-12 Early Modern German Philosophy 1690-1750 makes some of the key texts of early German thought available in English in most cases for the first time. The translations range from texts by the most important figures of the period including Christian Thomasius, Christian Wolff, Christian August Crusius and Georg Friedrich Meier, as well as texts by consequential but less familiar thinkers such as Dorothea Christiane Erxleben, Theodor Ludwig Lau, Friedrich Wilhelm Stosch and Joachim Lange. The topics covered range across a number of areas of theoretical philosophy including metaphysics, the immortality of the soul, materialism and its refutation, the pre-established harmony, epistemology, the principle of sufficient reason, the limits of reason with respect to matters of faith and logic, the role of prejudices in cognition and the doctrine of truth. These texts are intended to showcase German philosophy in the early Modern period as a far richer tradition than it is typically given credit for and indeed as much more than either a footnote to Leibniz or merely a step on the way to Kant. This collection is a valuable resource for students and scholars interested in the early modern German tradition and the often neglected works that enlightened it. Modern German philosophy J. D. Morell, 1856 **an introduction to contemporary german philosophy** Werner Brock, *German Philosophy in the Twentieth Century* Julian Young, 2018-05-23 The course of German philosophy in the twentieth century is one of the most exciting, diverse and controversial periods in the history of human thought. It is widely studied and its legacy hotly contested. In this outstanding introduction, Julian Young explains and assesses the two dominant traditions in modern German philosophy: critical theory and phenomenology, by examining the following key thinkers and topics: Max Weber's setting the agenda for modern German philosophy; the rationalization and disenchantment of modernity resulting in loss of freedom and loss of meaning; Horkheimer and Adorno's rationalization and the culture industry; Habermas's defence of Enlightenment; rationalization: the unfinished project of modernity; Marcuse's Freud-based vision of a repression-free utopia; Husserl's overcoming the crisis of humanity through phenomenology; Early Heidegger's existential phenomenology; authenticity as

Anima Mundi: The Rise of the World Soul Theory in Modern German Philosophy Miklós Vassányi, 2010-11-16 This work presents and philosophically analyzes the early modern and modern history of the theory concerning the soul of the world anima mundi The initial question of the investigation is why there was a revival of this theory in the time of the early German Romanticism whereas the concept of the anima mundi had been rejected in the earlier classical period of European philosophy early and mature Enlightenment The presentation and analysis starts from the Leibnizian Wolffian school generally hostile to the theory and covers classical eighteenth century physico theology also reluctant to accept an anima mundi Next it discusses early modern and modern Christian philosophical Cabbala B hme and tinger an intellectual tradition which to some extent tolerated the idea of a soul of the world The philosophical relationship between Spinoza and Spinozism on the one hand and the anima mundi theory on the other is also examined An analysis of Giordano Bruno s utilization of the concept anima del mondo is the last step before we give an account of how and why German Romanticism especially Baader and Schelling asserted and applied the theory of the Weltseele The purpose of the work is to prove that the philosophical insufficiency of a concept of God as an ens extramundanum instigated the Romantics to think an anima mundi that can act as a divine and quasi infinite intermediary between God and Nature as a locum tenens of God in physical reality

The Modern Subject Karl Ameriks, Dieter Sturma, 1995-12-07 Contemporary thought often claims the death of the subject and postmodernists typically contend that the standpoint of human subjectivity has been surpassed as a foundation for philosophy A proper appreciation of these influential claims requires an understanding of the main tradition in which the standpoint of subjectivity was articulated namely the classical philosophy of German Idealism This book provides such an understanding The authors assess what is dead and what is alive today in the philosophy of subjectivity and offer the most thorough study available on the background of the postmodern assault on the primacy of the subject Tracing this assault back to reactions to Kant they elucidate the historical and systematic details of the

development of the concept of the self in Classical philosophy from Kant to Fichte and Hegel Manfred Frank one of Europe's most prominent and prolific writers on neo structuralism provides two major contributions an account of the philosophical foundations of the reaction to Kant in early romanticism especially Novalis and a defense of the ineliminability of self consciousness against its critics in current analytic philosophy Essays by other contributors including Henry Allison Robert Pippin Daniel Breazeale Guenter Zoeller Ludwig Siep Veronique Zanetti and Georg Mohr relate the concept of the self to topics such as freedom teleology modernity and intersubjectivity

German Idealism Today Markus Gabriel, Anders Moe Rasmussen, 2017-09-25 This collection of essays provides an exemplary overview of the diversity and relevance of current scholarship on German Idealism The importance of German Idealism for contemporary philosophy has received growing attention and acknowledgment throughout competing fields of contemporary philosophy Part of the growing interest rests on the claim that the works of Kant Fichte Schelling Hegel remain of considerable interest for cultural studies sociology theology aesthetics and other areas of interest In the domain of philosophy the renaissance of innovative readings of German Idealism has taken scholarly debates beyond merely antiquarian perspectives This renaissance has been a major factor of current efforts to bridge the gap between so called analytic and so called continental philosophy The volume provides a selection of well chosen examples of readings that contribute to systematic treatments of philosophical problems It contains among others contributions by Markus Gabriel Robert Pippin Anders Moe Rasmussen Sebastian Rdl

Contemporary German Philosophy , Toward a Theory of Radical Origin John David Pizer, 1995-01-01 This provocative book addresses one of the central and most controversial branches of Western thought the philosophy of origin In light of recent poststructuralist principles such as alterity difference and dissemination the philosophy of origin seems to exemplify the repressive reactionary tendencies of much of the Western philosophical tradition

John Pizer aims to overturn this recent antipathy to the philosophy of origin. He ably summarizes poststructuralist critiques of that earlier philosophical tradition then turns to five German thinkers: Nietzsche, Benjamin, Rosenzweig, Heidegger, and Adorno, who developed philosophies of origin that effectively anticipate and counter poststructuralist attacks. These are thinkers who in one way or another influenced recent generations of poststructuralist thinkers. Pizer argues, however, that rather than do away with the notion of origin altogether as in the works of the most thoroughgoing poststructuralists, these philosophers developed theories in which origin is always multiple and plurivalent. In the writings of these seminal German thinkers, origin becomes origins, and authentic origins are inherently plural and divergent. A valuable engrossing account of a wide range of thinkers and their complex relations, Pizer's book recovers the notion of origin for an intellectual world that has come to value multiplicity, openness, and diversity.

German Philosophers Roger Scruton, 2001

German Philosophers contains studies of four of the most important German theorists: Kant, arguably the most influential modern philosopher; Hegel, whose philosophy inspired an enduring vision of a communist society; Schopenhauer, renowned for his pessimistic preference for non-existence; and Nietzsche, who has been appropriated as an icon by an astonishingly diverse spectrum of people.
