A comprehensive introduction to formal logic

Logic and Philosophy

A Modern Introduction is a rigorous yet accessible text appropriate for students encountering the subject for the first time

Abundant carefully crafted exercise sets accompanied by a clear engaging exposition build to an exploration of sentential logic first order predicate logic the theory of descriptions identity relations set theory modal logic and Aristotelian logic

And as its title suggests Logic and Philosophy is devoted not only to logic but also to the philosophical debates that led to the development of the field

Much new material has been added for the 13th edition

An introduction to set theory and its relationship to logic and mathematics including philosophical issues is now part of Chapter 13

Chapter 15 is an introduction to modal logic and Kripke semantics concluding with a discussion of philosophical problems with any logical accommodation of modalities

Instructors who do not wish to present proof methods will find chapters on truth trees for both sentential and first order logic and a presentation of trees for modal logic

Special features of this text include presentations of the history of logic alternatives to traditional methods of conditional and indirect proof and a discussion of semantic problems with universal and existential instantiations

Throughout the authors are sensitive to philosophical issues that arise from the relationship between ordinary language symbolic logic and justifications for the syntax and semantics of the various symbolic languages

Discussions range from the justification of the truth table for the sentential rendering of if then statements to semantic and syntactic paradoxes including some troubling paradoxes that arise in ordinary language e g the so called hangman or surprise quiz paradox

Logic and Philosophy includes ample material for a one semester or two semester course and provides a thorough preparation for more advanced logic courses

Reason and Practice Karl Nielsen, 1971 **A Modern Introduction to Philosophy** Paul Edwards, Arthur Pap, 1965 **A Modern Introduction to Moral Philosophy** Alan Montefiore, 1958 Philosophical Problems Justus Hartnack, 1962 **Modern Philosophy** Roger Scruton, 2012-11-26

Roger Scruton is one of the most widely respected philosophers of our time whose often provocative views never fail to simulate debate

In Modern Philosophy he turns his attention to the whole of the field from the philosophy of logic to

aesthetics and in so doing provides us with an essential and comprehensive guide to modern thinking

Dictionary of Modern American Philosophers John R. Shook, 2005-01-01 The *Dictionary of Modern American Philosophers* includes both academic and non academic philosophers and a large number of female and minority thinkers whose work has been neglected It includes those intellectuals involved in the development of psychology pedagogy sociology anthropology education theology political science and several other fields before these disciplines came to be considered distinct from philosophy in the late nineteenth century Each entry contains a short biography of the writer an exposition and analysis of his or her doctrines and ideas a bibliography of writings and suggestions for further reading While all the major post Civil War philosophers are present the most valuable feature of this dictionary is its coverage of a huge range of less well known writers including hundreds of presently obscure thinkers In many cases the

Dictionary of Modern American Philosophers offers the first scholarly treatment of the life and work of certain writers This book will be an indispensable reference work for scholars working on almost any aspect of modern American thought **A Miscellany of Modern Musings** Peter Chong-Beng Gan, 2024-07-07 The book starts off by giving a quick overview of the main phases within the history of philosophy in the Western tradition It then homes in on the modern phase and proceeds to select key thinkers that represent that slice from the rich intellectual heritage of the West The main chapters have these thinkers names as heading The work is meant to be expository and discursive suited to introduce the neophyte in philosophy to some of the big questions asked by philosophers and their methods of addressing these questions as well as their unique proposed answers The coverage is selective rather than extensive and hence only a small portion of the philosopher s corpus of writings will be hand picked and considered The Bookman's Manual Bessie Graham, 1928 *A Modern Introduction to Moral Philosophy* Kenneth Robinson, 1958
