Modern Movements In European Philosophy:

Modern Movements in European Philosophy Richard Kearney, 1986 *Modern Movements in European Philosophy* Richard Kearney, 1996 Modern Movements in European Philosophy Richard Kearney, 1986 *Modern Movements in European Philosophy* Richard Kearney, 1994-01-01 This text surveys the work of 19 of the 20th century's most influential European thinkers and acts as an introduction to three major movements: phenomenology, critical theory, and structuralism. This edition includes a chapter devoted to Julia Kristeva whose work in the fields of semiotics and psychoanalytic theory has made a significant contribution to recent continental thought.

Modern movements in European philosophy Richard Kearney, 1988 **Modern Movements in European Philosophy** Richard Kearney, 1995-01-15 In this now classic textbook Richard Kearney surveys the work of nineteen of this century's most influential European thinkers. The second edition has a new chapter devoted to Julia Kristeva whose work in the fields of semiotics and psychoanalytic theory has made a significant contribution to recent continental thought.

The History of European Philosophy Walter Taylor Marvin, 1917 *Poetics of Imagining* Richard Kearney, 1998 With an extended foreword and an afterword chapter and fascinating new material on the narrative imagination *Poetics of Imagining: Modern to Postmodern* provides a critically developed and accessible account of the major theories of imagination in modern European thought.

New Approaches to the Study of Religion: Regional, critical, and historical approaches Peter Antes, Armin W. Geertz, Randi Ruth Warne, 2004 Internationally recognized scholars from many parts of the world provide a critical survey of recent developments and achievements in the global field of religious studies. The work follows in the footsteps of two former publications: *Classical Approaches to the Study of Religion* edited by Jacques Waardenburg 1973 and *Contemporary Approaches to the Study of Religion* edited by Frank Whaling 1984. *New Approaches to the Study of Religion* completes the survey of the comparative study of religion in the twentieth century by focussing on the past two decades. Many of the chapters however are also pathbreaking and point the way to future approaches.

Qualitative Research in Midwifery and Childbirth Gill Thomson, Fiona Dykes, Soo Downe, 2012-03-29 *Qualitative Research in Midwifery and Childbirth* brings together a range of phenomenological methods and insights into one accessible text. Illustrated with plenty of examples of successful phenomenological research it keeps the focus applied to midwifery and childbirth and makes clear the links to practice.

throughout **Evil after Postmodernism** Jennifer Geddes,2013-01-11 These six essays form a stimulating and lucid investigation of the meaning of evil in the light of postmodern thought and of the cultural and social changes of the modern age They consider subjects such as the war in Bosnia AIDS and the Holocaust Division of History and Political Science, Comprising the Departments of History and Government, and Economics Harvard University,1910 **The Future of Reason, Science and Faith** J. Andrew Kirk,2016-12-05 Focusing on the history of ideas this book explores important questions concerning knowledge in relation to philosophy science ethics and Christian faith Kirk contributes to the current debate about the intellectual basis and integrity of Western culture exploring controversial issues concerning the notions of modernity and post modernity Repositioning the Christian faith as a valid dialogue partner with contemporary secular movements in philosophy and ethics Kirk seeks to show that in post Christian Europe the Christian faith still possesses intellectual resources worthy to be reckoned with This book s principal argument is that contemporary Western society faces a cultural crisis It explores what appears to be an historical enigma namely the question of why Western intellectual endeavours in philosophy and science seem to have abandoned the search for a source of knowledge able to draw together disparate pieces of information provided by different disciplines Kirk draws conclusions particularly in the area of ethical decision making from this apparent failure and invites readers to consider Christian theism afresh as a means for the renewal of culture and society Information Ages Michael E. Hobart,Zachary S. Schiffman,2000-05-26 A grand intellectual history from clay tablets to Bill Gates Selected by Choice Magazine as an Outstanding Academic Title The late twentieth century is trumpeted as the Information Age by pundits and politicians alike and on the face of it the claim requires no justification But in Information Ages Michael E Hobart and Zachary S Schiffman challenge this widespread assumption In a sweeping and captivating history of information technology from the ancient Sumerians to the world of Alan Turing and John von Neumann the authors show how revolutions in the technology of information storage from the invention of writing approximately 5 000 years ago to the mathematical models for describing physical reality in the seventeenth and eighteenth centuries to the introduction of computers profoundly transformed ways of thinking Jürgen Habermas Luca Corchia,2010

Imagination Now M. E. Littlejohn,2020-05-13 The world is increasingly polarized along religious ethnic race gender class and ideological lines But must such diversity necessarily breed suspicion fear or violence Richard Kearney invites us to consider another path He wagers that the cause of our divisions often lies not in difference but in a lack of creative imagination Ever in a spirit of dialogue he shows how poetics and narrative imagination can break the hold of hostility and open new possibilities of reconciliation accomplishing what moral arguments alone cannot Now more than ever there is an urgent need for Kearney s work which addresses our current moment of crisis and division providing pathways of creative response and healing This book follows Kearney s journey through the fields of philosophy of the imagination hermeneutics philosophy of religion ethics psychology practical philosophy and politics The selection of writings in this volume offers to the

specialist and the general reader a concise well rounded entry into one of the most prolific and wide ranging thinkers in contemporary philosophy **The Embodied Image** Juhani Pallasmaa, 2011-05-16 **The Embodied Image** The Embodied Image Imagination and Imagery in Architecture Juhani Pallasmaa All artistic and architectural effects are evoked mediated and experienced through poeticised images These images are embodied and lived experiences that take place in the flesh of the world becoming part of us at the same time that we unconsciously project aspects of ourselves on to a conceived space object or event Artistic images have a life and reality of their own and they develop through unexpected associations rather than rational and causal logic Images are usually thought of as retinal pictures but profound poetic images are multi sensory and they address us in an embodied and emotive manner Architecture is usually analysed and taught as a discipline that articulates space and geometry but the mental impact of architecture arises significantly from its image quality that integrates the various aspects and dimensions of experience into a singular internalised and remembered entity The material reality is fused with our mental and imaginative realm The book is organised into five main parts that look at in turn the image in contemporary culture language thought and the image the many faces of the image the poetic image and finally the architectural image The Embodied Image is illustrated with over sixty images in pairs which are diverse in subject They range from scientific images to historic artistic and architectural masterpieces Artworks span Michelangelo and Vermeer to Gordon Matta Clark and architecture takes in Modern Masters such as Mies van der Rohe Le Corbusier and Alvar Aalto as well as significant contemporary works by Steven Holl and Daniel Libeskind **Translating Orients** Timothy Weiss, Timothy F. Weiss, 2004-01-01 Weiss examines texts that reference Asian North African or Middle Eastern societies and their imaginaries and equally important engage questions of individual and communal identity that issue from transformative encounters **Phenomenology or Deconstruction?** Christopher Watkin, 2009-03-03 Phenomenology or Deconstruction challenges traditional understandings of the relationship between phenomenology and deconstruction through new readings of the work of Maurice Merleau Ponty Paul Ricur and Jean Luc Nancy A constant dialogue with Jacques Derrida s engagement with phenomenological themes provides the impetus to establishing a new understanding of being and presence that exposes significant blindspots inherent in traditional readings of both phenomenology and deconstruction In reproducing neither a stock phenomenological reaction to deconstruction nor the routine deconstructive reading of phenomenology Christopher Watkin provides a fresh assessment of the possibilities for the future of phenomenology along with a new reading of the deconstructive legacy Through detailed studies of the philosophy of Merleau Ponty Ricur and Nancy he shows how a phenomenological tradition much wider and richer than Husserlian or Heideggerian thought alone can take account of Derrida s critique of ontology and yet still hold a commitment to the ontological This new reading of being and presence fundamentally re draws our understanding of the relation of deconstruction and phenomenology and provides the first sustained discussion of the possibilities and problems for any future deconstructive phenomenology
