*Problem Based Neurosurgery* Sam Eljamel, 2011 Problem Based Neurosurgery is a remarkable fusion of recent advances in neuro imaging and neurosurgery with modern teaching of integrated system based curricula It approaches each problem systematically from history and physical examination to differential diagnosis investigations and management options The book captures four decades of advances and experiences in diagnosis and management of patients The problems upon which the book is based are real patients and cover all aspects of neurosurgical practice with up to date modern images The blend of new scientific discoveries modern imaging and the art of smart history and physical examinations underpins the book to improve diagnosis investigation and the care of neurosurgical patients The main thrust of this book is that it is based on clinical problems faced by fellows residents and students rather than traditional topic based Problem based learning and management is the modern method of teaching in the new curriculum of teaching neurosurgery It is a practical handbook that will help students residents and community doctors alike There is no similar book on the market that fulfills the objectives of this handbook

*Advances and Technical Standards in Neurosurgery* Johannes Schramm, 2015-10-27 This volume reviews standard treatments for spinal dural arteriovenous fistulas examining the anatomy of arteries and veins of the sylvian fissure as well as microsurgical advances and the development of modern therapeutic strategies in intracranial meningiomas The advances section presents a strategy for minimizing hearing loss after stereotactic radiosurgery for vestibular schwannomas as well as a description of the mode of action and biology of ALA including its interaction with tumor cells and the limits of this method A dedicated chapter addresses the essential question of the limits and merits of various tractography techniques and of their importance for non specialists who may be tempted to use them uncritically A further chapter examines molecular markers which have become standard in neuropathological reports on intracranial tumors reviewing the prognostic and predictive value of these modern molecular markers in gliomas

Additional chapters round out the coverage offering a comprehensive overview of standard and advanced techniques
