Anzia, 2024-05-31 Public policy in the United States is the product of decisions made by more than 500 000 elected officials and the vast majority of those officials are elected on days other than Election Day And because far fewer voters turn out for off cycle elections that means the majority of officials in America are elected by a politically motivated minority of Americans Sarah F Anzia is the first to systemically address the effects of election timing on political outcomes and her findings are eye opening

The low turnout for off cycle elections Anzia argues increases the influence of organized interest groups like teachers unions and municipal workers While such groups tend to vote at high rates regardless of when the election is held the low turnout in off cycle years enhances the effectiveness of their mobilization efforts and makes them a proportionately larger bloc Throughout American history the issue of election timing has been a contentious one Anzia s book traces efforts by interest groups and political parties to change the timing of elections to their advantage resulting in the electoral structures we have today Ultimately what might seem at first glance to be mundane matters of scheduling are better understood as tactics designed to distribute political power determining who has an advantage in the electoral process and who will control government at the municipal county and state levels *Personnel Bibliography Series* United States. Running in the Red Irene S. Rubin,1983-06-30 This case study of a politically reformed middle sized Midwestern city provides a model of fiscal stress that contrasts sharply with that of America s vast metropolitan centers Dr Rubin examines the interaction of social political and economic causes of the city s predicament She then goes on to analyze the specific factors that solved the city s problems over a six year period Finally she offers a self correcting mechanism that would allow a city to save itself from financial trouble without direct state or federal assistance This study suggests that local political factors were even more important than national factors in contributing to the city s fiscal stress It also brings into question the theory that generosity to the poor creates urban fiscal stress and that giving less to the poor will solve urban financial problems
