Process Philosophy A Survey Of Basic Issues:

Process Philosophy Nicholas Rescher,2012-01-11 Process Philosophy surveys the basic issues and controversies surrounding the philosophical approach known as process philosophy. Process philosophy views temporality, activity and change as the cardinal factors for our understanding of the real process. In the real process, priority over product both ontologically and epistemically. Rescher examines the movement's historical origins reflecting a major line of thought in the work of such philosophers as Heraclitus, Leibniz, Bergson, Peirce, William James, and especially A.N. Whitehead. Reacting against the tendency to associate process philosophy too closely with this last-named thinker, Rescher writes: "Indeed one cardinal task for the partisans of process at this particular juncture of philosophical history is to prevent the idea of process philosophy from being marginalized through a limitation of its bearing to the work and influence of any one single individual or group." This book will appeal to both students and professors of philosophy. Those teachers who have not been trained in process philosophy will welcome this new text by one of North America's foremost philosophers as a perspicuous and informative introduction.

The Oxford Handbook of Process Philosophy and Organization Studies Jenny Helin, Tor Hernes, Daniel Hjorth, Robin Holt, 2014-05-15

Process approaches to organization studies focus on flow, activities, and evolution. Understanding organizations and organizing as processes in the making. They stand in contrast to positivist approaches that see organizations and phenomena as fixed, static, and measurable. Process approaches draw on a range of ideas and philosophies. The Handbook examines 34 philosophers and social theorists, both those commonly linked to process thinking such as Whitehead, Bergson, and James, and those that are not as often addressed from a process perspective such as Dilthey and Tarde. Each chapter addresses the background and context of this thinker, their work with a focus on the processual elements and the potential contribution to organization and management research. For students and scholars in the field of Organization Studies, this book is an entry point into the work of philosophical thinkers and social theorists for whom the world is far from being a solid place.

Process Philosophical Deliberations Nicholas Rescher, 2013-05-02

Process philosophy has established itself as one of the 20th century's prime contributions to philosophical thought, and Nicholas Rescher has for many years figured among its prime exponents. His new book, *Process Philosophical Deliberations*, collects together ten studies illuminating various aspects of this many-sided philosophical approach. Among the topics treated are the nature of process philosophy itself as well as its implementation in such areas as epistemology, value theory, moral philosophy, and the philosophy of science.

Process Realism in Physics William Penn, 2023-07-04

Science should tell us what the world is like. However, realist interpretations of physics face many problems, chief among them the pessimistic meta-induction. This book seeks to develop a realist position based on process ontology that avoids the traditional problems of realism. Primarily, the core claim is that in order for a scientific model to be minimally empirically adequate, that model must describe real experimental processes and dynamics. Any additional inferences from processes to things, substances, or objects are not

warranted and so these inferences are shown to represent the locus of the problems of realism The book then examines the history of physics to show that the progress of physical research is one of successive eliminations of thing interpretations of models in favor of more explanatory and experimentally verified process interpretations This culminates in collections of models that cannot coherently allow for thing interpretations but still successfully describe processes

Shadowing the Anthropocene: Eco-Realism for Turbulent Times

Adrian Ivakhiv,2018 A spectre is haunting humanity the spectre of a reality that will outwit and in the end bury us The Anthropocene or The Human Era is an attempt to name our geological fate that we will one day disappear into the layer cake of Earth s geology while highlighting humanity in the starring role of today s Earthly drama In Shadowing the Anthropocene Adrian Ivakhiv proposes an ecological realism that takes as its starting point humanity s eventual demise The only question for a realist today he suggests is what to do now and what quality of compost to leave behind with our burial The book engages with the challenges of the Anthropocene and with a series of philosophical efforts to address them including those of Slavoj Zizek and Charles Taylor Graham Harman and Timothy Morton Isabelle Stengers and Bruno Latour and William Connolly and Jane Bennett Along the way there are volcanic eruptions and revolutions ant cities and dog parks data clouds and space junk pagan gods and sacrificial altars dark flow souls of things and jazz Ivakhiv draws from centuries old process relational thinking that hearkens back to Daoist and Buddhist sages but gains incisive re invigoration in the philosophies of Charles Sanders Peirce and Alfred North Whitehead He translates those insights into practices of engaged Anthropocenic bodymindfulness aesthetic ethical and ecological practices for living in the shadow of the Anthropocene

Applied Process Thought II

Mark Dibben,Rebecca Newton,2013-05-02 Concentrating mainly on the process philosophy developed by Alfred North Whitehead this series of essays brings together some of the newest developments in the application of process thinking to the physical and social sciences These essays by established scholars in the field demonstrate how a wider and deeper understanding of the world can be obtained using process philosophical concepts how the distortions and blockages inevitably inherent in substantivist talk can be set aside and how new and fertile lines of research in the sciences can be opened as a result

Strategy Tools as Symbolic Objects in Managerial Language Games

Dragan Djurić,2015-04-22 Dragan Djuri looks at strategy tools from a process ontological worldview as proposed by the Process Organization Studies discourse Building on Wittgenstein s later philosophy he understands science and management as language games thereby developing a view of strategy tools as objects with both an ontological and a symbolic function This perspective is contrasted with the traditional understanding of strategy tools as technologies of rationality as well as with the practice based view of strategy tools as boundary objects

Generative Mechanisms Transforming the Social Order

Margaret S.

Archer,2015-02-18 This volume examines how generative mechanisms emerge in the social order and their consequences It does so in the light of finding answers to the general question posed in this book series Will Late Modernity be replaced by a social formation that could be called Morphogenic Society This volume clarifies what a generative mechanism is to achieve a better understanding of their social origins and to delineate in what way such mechanisms exert effects within a current social formation either stabilizing it or leading to changes potentially replacing it The book explores questions about conjuncture convergence and countervailing effects of morphogenetic mechanisms in order to assess their impact Simultaneously it looks at how products of positive feedback intertwine with the results of morphostatic negative feedback This process also requires clarification especially about the conditions under which morphostasis prevails over morphogenesis and vice versa It raises the issue as to whether their co existence can be other than short lived The volume addresses whether or not there also is a process of morpho necrosis i e the ultimate demise of certain morphostatic mechanisms such that they cannot recover The book concludes that not only are generative mechanisms required to explain associations between variables involved in the replacement of Late Modernity by Morphogenic Society but they are also robust enough to account for cases and times when such variables show no significant correlations

Actology Malcolm

Torry,2020-07-08 Two streams run through the Western philosophical stream one characterized by Being beings the unchanging the static and the unitary and the other by Action actions the changing the dynamic and the diverse The former might be represented by Parmenides Plato and much of what followed the latter by Heraclitus and by rather less of what followed The book explores the Action stream as it wound its way through history through Heraclitus Plato Aristotle Hegel Maurice Blondel Henri Bergson Pierre Teilhard de Chardin process philosophy and theology Geoffrey Studdert Kennedy Ludwig Wittgenstein and John Boys Smith The journey enables us to create the beginnings of an actology a way of seeing ourselves the universe and God in terms of actions in patterns rather than as beings that change Such an actology offers a complete alternative narrative far more in tune with the diverse and rapidly changing world in which we live than the ontology that has shaped philosophy theology and much else for the past two thousand years

The Open Secret Alister E.

McGrath,2011-09-23 Natural theology in the view of many is in crisis In this long awaited book Alister McGrath sets out a new vision for natural theology re establishing its legitimacy and utility A timely and innovative resource on natural theology the exploration of knowledge of God as it is observed through nature Written by internationally regarded theologian and author of numerous bestselling books Alister McGrath Develops an intellectually rigorous vision of natural theology as a point of convergence between the Christian faith the arts and literature and the natural sciences opening up important possibilities for dialogue and cross fertilization Treats natural theology as a cultural phenomenon broader than Christianity itself yet always possessing a distinctively Christian embodiment Explores topics including beauty goodness truth and the theological imagination how investigating nature gives rise to both theological and scientific theories the idea of a distinctively Christian

approach to nature and how natural theology can function as a bridge between Christianity and other faiths [Social Change in a Material World](#) Theodore R. Schatzki,2019-05-02 Social Change in a Material World offers a new practice theoretical account of social change and its explanation Extending the author s earlier account of social life and drawing on general ideas about events processes and change the book conceptualizes social changes as configurations of significant differences in bundles of practices and material arrangements Illustrated with examples from the history of bourbon distillation and the formation and evolution of digitally mediated associations in contemporary life the book argues that chains of activity combine with material events and processes to cause social changes The book thereby stresses the significance of the material dimension of society for the constitution determination and explanation of social phenomena as well as the types of space needed to understand them The book also challenges the explanatory significance of such key phenomena as power dependence relations mechanisms and individual behavior As such it will appeal to sociologists geographers organization studies scholars and others interested in social life and social change [The SAGE Handbook of Process Organization Studies](#) Ann Langley,Haridimos Tsoukas,2016-12-14

The SAGE Handbook of Process Organization Studies provides a comprehensive and timely overview of the field This volume offers a compendium of perspectives on process thinking process organizational theory process research methodology and empirical applications The emphasis is on a combination of pedagogical contributions and in depth reviews of current thinking and research in each of the selected areas combined with the development of agendas for future research The Handbook is divided into five sections Part One Process Philosophy Part Two Process Theory Part Three Process Methodology Part Four Process Applications Part Five Process Perspectives [**Space, Time, and Theology in the Leibniz-Newton Controversy**](#) Edward J.

Khamara,2013-05-02 In the famous Correspondence with Clarke which took place during the last year of Leibniz s life Leibniz advanced several arguments purporting to refute the absolute theory of space and time that was held by Newton and his followers The main aim of this book is to reassess Leibniz s attack on the Newtonian theory in so far as he relied on the principle of the identity of indiscernibles The theological side of the controversy is not ignored but isolated and discussed in the last three chapters which deal with problems connected with the notions of omnipotence and omniscience [After Whitehead](#) Michel Weber,2013-05-02

When Reschers Process Metaphysics 1996 was published it was widely acclaimed as a major step towards the academic recognition of a mode of thought that has otherwise been confined within sharp scholarly boundaries Of course it is not an easy book despite its stylistic clarity it remains the complex outcome of a lifes work in most areas of philosophy The goal of the present volume is to systematically unfold the vices and virtues of Process Metaphysics and thereby to specify the contemporary state of affairs in process thought To do so the editor has gathered one focused contribution per chapter each paper addressing specifically and explicitly its assigned chapter and seeking to promote a dialogue with Rescher In addition the volume features Reschers replies to the papers [Applied Process Thought](#) Mark
