Gavin Bremner,Alan Slater,George Butterworth,1997 An account of recent research into infant development the text includes 13 chapters written by British and North American infancy researchers Although the chapters are organized along conventional lines into sections on perceptual cognitive and social development the emphasis appearing both within chapters and in the linking editorial passages within sections is on links between perceptual cognitive and social aspects of development Thus new findings on infant perception are related to both old and new accounts of cognitive developemnt and links are drawn between these topics and the development of social interaction and language Attention is given to both traditional approaches such as Piagetian theory and more recent approaches such as direct perception and dynamic systems theory There is also a chapter devoted to interpreting infant development from a psychoanalytic perspective **Dual-Process Theories of Numerical Cognition** Mario Graziano,2018-08-12 This book presents a philosophical interpretation to numerical cognition based on dual process theories and heuristics It shows how investigations in cognitive science can shed light on issues traditionally raised by philosophers of mathematics The analysis will also help readers to better understand the relationship between current neuroscientific research and the philosophical reflection on mathematics The author seeks to explain the acquisition of mathematical concepts To accomplish this he needs to answer two questions How can the concepts of approximate numerosity become an object of thought that is so accessible to our consciousness How are these concepts refined and specified in such a way as to become numbers Unfortunately there is currently no model that can truly demonstrate the role of language in the development of numerical skills starting from approximate pre verbal skills However the author details a solution to this problem dual process theories It is an approach widely used by theorists focusing on reasoning decision making social cognition and consciousness Here he applies this approach to the studies on mathematical knowledge He

details the results brought about by psychological and neuroscientific studies conducted on numerical cognition by key neuroscientists In the process he develops the foundations of a new potential philosophical explanation on mathematical knowledge
