Producing Hegemony

*The Politics of
Mass Production
and American
Global Power*

Producing Hegemony

Daniel R. McCarthy

Producing Hegemony:

Producing Hegemony Mark Rupert, 1995-02-24 In this book Mark Rupert argues that American global power was shaped by the ways in which mass production was institutionalized in the USA and by the political and ideological struggles integral to this process. The production of an unprecedented volume of goods propelled the United States to the apex of the global division of labor ensuring victory in World War II and enabling postwar reconstruction under American leadership. He describes an historic bloc of American statesmen, capitalists and labor leaders who fostered a productivity oriented political consensus within the USA and sought to generalize their vision of liberal capitalism around the globe. He focuses on the incorporation of industrial labor as a junior partner in this hegemonic bloc and argues that the recent erosion of its position under the pressures of transnational competition and the political forces of right wing reaction may open up new possibilities for transformative politics.

Poor States, Power and the Politics of IMF Reform Mark Hibben, 2016-06-02 This book provides a timely comparative case study that reveals the factors driving the International Monetary Fund's policy reform in Low Income Developing Countries (LIDCs) as a resurgent IMF expands its footprint in the world's poorest states. Through a research design that employs both mainstream and critical IPE theory, Mark Hibben uncovers three major tendencies. Principal agent analysis, he argues, demonstrates that coalition formation among powerful states, IMF staff and management and other influential actors is necessary for policy reform. At the same time, he uses constructivist analysis to show that ideational frameworks of what merits appropriate macroeconomic policy response also have an impact on reform efforts and that IMF management and staff seek legitimacy in their policy choices. In response to the crises in 1999 and 2008, the author maintains, poverty and inequality now matter in IMF thinking and serve as an opportunity for policy insiders and external actors to deepen the institution's new commitment to inclusive growth. Finally, Hibben draws on neo Gramscian analysis to highlight how the IMF looked to soften the destabilizing effects of globalization through reforms focused on stakeholder participation in poor states and will continue to do so in its support of the new United Nations Sustainable Development Goals. This means that the 2015-2030 time period will be a critical juncture for IMF LIDC reform. By drawing from diverse theoretical traditions, the author thus provides a unique framework for the study of contemporary IMF change and how best those interested in LIDC policy reform can meet this objective.

Japan and the Reconstruction of East Asia D. Kelly, 2001-12-17 Dominic Kelly has written a fascinating study of Japanese policies designed to lead to the reconstruction of East Asia. He presents a detailed picture of Japanese activity in East Asia in the areas of production, finance, security and knowledge and maps out the historical context upon which this activity rests. In doing so, Kelly sheds light on the increasingly powerful but imperfectly understood phenomenon of regionalism. He goes on to identify the major fault line situated beneath both theoretical accounts of Japanese regionalism and real world predictions of its success or failure.

Manufacturing Ideology William M. Tsutsui, 2001-03-12 Japanese industry is the envy of the world for its efficient and humane management

practices Yet as William Tsutsui argues the origins and implications of Japanese style management are poorly understood Contrary to widespread belief Japan's acclaimed strategies are not particularly novel or even especially Japanese Tsutsui traces the roots of these practices to Scientific Management or Taylorism an American concept that arrived in Japan at the turn of the century During subsequent decades this imported model was embraced and ultimately transformed in Japan's industrial workshops Imitation gave rise to innovation as Japanese managers sought a revised Taylorism that combined mechanistic efficiency with respect for the humanity of labor Tsutsui's groundbreaking study charts Taylorism's Japanese incarnation from the efficiency movement of the 1920s through Depression era rationalization and wartime mobilization up to postwar productivity drives and quality control campaigns Taylorism became more than a management tool its spread beyond the factory was a potent intellectual template in debates over economic growth social policy and political authority in modern Japan Tsutsui's historical and comparative perspectives reveal the centrality of Japanese Taylorism to ongoing discussions of Japan's government industry relations and the evolution of Fordist mass production He compels us to rethink what implications Japanese style management has for Western industries as well as the future of Japan itself

Gills, Kevin Gray, 2013-10-31 A quarter of a century has now passed since the historic popular uprising that led to the overthrow of the Ferdinand Marcos dictatorship in the Philippines The mass movement known as the People Power Revolution was not only pivotal to the democratic transition within the Philippines but it also became an inspiration for subsequent mass movements leading to further democratic transitions throughout the Third World and in the former Communist bloc in Eastern Europe and the Soviet Union However the neoliberal economic policies subsequently pursued by newly democratic governments throughout the Third World led all but the most celebratory observers to note the constrained and limited nature of these formal political transitions This volume poses the question of the extent to which people power has been able to play an active role resisting neoliberalism and deepen substantive democracy and social justice Through a series of case studies of the regions and individual countries of Asia Africa Latin America and Eastern Europe the contributions in the volume provide a new set of original and in depth critical assessments of the nature of the longer term impact of the democratic transitions commencing in the 1980s and continuing until the present and questioning their impact and potential influence on human dignity freedom justice and self determination and thus opening new avenues of enquiry into the future of democracy This book was originally published as a special issue of Third World Quarterly **Historical Materialism and Globalization** Mark Rupert, Hazel Smith, 2002 13 The politics of regulated liberalism a historical materialist approach to European integration 14 Historical materialism ideology and the politics of globalizing capitalism Index **The End of Sovereignty** Antonio Negri, 2022-09-30 This book brings together

Antonio Negri's critical writings on the nature and form of the modern state. The central theme that runs through these writings is our need to be done with the sovereign state that is with the particular form of political power that the capitalist organization of bourgeois society has imposed upon us. Negri seeks to show how the sovereign bourgeois state built in the course of modernity has now become a weapon in the hands of a declining ruling class, a class sometimes exhausted in its institutional expressions and sometimes frenetic, zombie-like and para-fascist. In arguing that the despotic power of the state should be abolished, Negri distances himself from some other left-wing thinkers who erroneously in his view have come to see the state as an unavoidable institution rather than as a place of power that once conquered should be transformed and ultimately dissolved since it represents the central moment in the organization of force against living labour and free citizenship. In Negri's view, the call for the abolition of the state remains vital and active today as a concrete utopia that is expressed in every thought and act of liberation. The articles brought together in this volume range from Negri's analysis of the first great transformation of the capitalist state in the twentieth century, a phenomenon precipitated by the triumph of Keynesianism, to his more recent work on how the form of sovereignty changed from being a figure of transcendent and local command to being a dispositif of immanent and global control. Like its companion volumes, this new collection of essays by Negri will be a valuable resource for anyone interested in radical politics and in the key social and political struggles of our time.

Creating Insecurity Anthony D. Lott, 2019-10-01 In this absorbing book, Anthony Lott develops a national security analysis that can be used to critique the policies of states. His approach combines realist thought common to traditional security studies and a version of political constructivism common to critical security studies. While the focus on human security remains integral, the 9/11 attacks on New York demonstrate the importance of national security traditionally defined. This book recognizes the importance of both components of security in a broader security dialogue. After building a theoretical understanding of security, the work examines four disparate security issues that currently engage policy makers in the United States: the current discourse concerning ballistic missile defense, the war on drugs in Colombia, democratic challenges to economic globalization and the state response, and the US-led war to oust Saddam Hussein from power in Iraq. The book is designed for upper division international relations courses in national security studies, international politics and theory.

Phillips, 2000-05-30 Challenging conventional wisdom about German dominance in the new Europe this study presents a new approach to the question of power and influence after the Cold War Inspired by the debate over German hegemony and drawing on intensive fieldwork Ann L Phillips develops two original cases of German relations with East Central Europe to test competing arguments As she convincingly demonstrates the politics of reconciliation and the activities of German party affiliated foundations illustrate German engagement in the region in its dual faces restraint and projection The author uses the less developed literature on reciprocal influences of domestic politics and the international environment to frame her analysis These two cases provide evidence not only of the intersection of domestic politics and international relations but of when and how one trumps the other Contributing to the theoretical debate Phillips argues that this interplay explains the divergent trajectories bilateral relations have taken since 1990 in ways that more traditional neo realist or liberal approaches could not The author's fresh perspective and new evidence demonstrate that East Central European states play a much greater role in the influence equation than they did in the past **Fifty Key Thinkers in International Relations** ,
