Howells, I. Ramsay, Thomas Wilhelmsson, 2010 This is a truly

international effort and one with a strong commitment to human rights by the highly reputable authors coming from different jurisdictions. The many facets of today's consumer law are presented to the reader including developing countries a fascinating effort in a dynamically emerging field of law. We are comprehensively informed about such bread and butter areas as advertising, unfair terms, consumer guarantees, product safety and liability, consumer credit and redress. But traditional consumer law concepts and remedies are facing challenges in more complex areas like services of general interest where consumers and private users should enjoy equal access to universal services with the internet where speed must not be a pretext to eliminate standards of fair dealing with risky investment services under the problematic paradigm shift from investor protection to investor confidence. A book to read to think about to work with for everybody interested in the future of consumer markets and law in a time of economic crisis. Norbert Reich, University of Bremen, Germany. This is a richly interesting collection of essays written by leading names in the field. It offers a thoroughly reliable survey of key tensions and challenges in modern consumer law and brilliantly combines thematic overview with detailed analysis. It will stimulate comparative thinking, it will provide a source of information and it will be welcomed by consumer law scholars all over the world. Stephen Weatherill, University of Oxford, UK. Consumer law and policy has emerged in the last half century as a major policy concern for all nations. This Handbook of original contributions provides an international and comparative analysis of central issues in consumer law and policy in developed and developing economies. The Handbook encompasses questions of both social policy and effective business regulation. Many of the issues are common to all countries and are becoming increasingly globalised due to the growth in international trade and technological developments such as the Internet. The authors provide a broad coverage of both substantive topics and institutional questions concerning optimal approaches to enforcement and the role of class actions in consumer policy. It also includes comparative insights into the influential EU and US models of consumer law and relates consumer law to contemporary trends in human rights law. Written by a carefully selected group of international experts, this text represents an authoritative resource for understanding contemporary and future developments in consumer law. This Handbook will provide students, researchers and policymakers with an insight to the main policy debates in each context and provide models of legal regulation to assist in the evaluation of laws and the development of consumer law and policy.

*The Regulatory Function of European Private Law* Fabrizio Cafaggi, Horatia Muir Watt, 2009-01-01. In twelve topical papers written by renowned experts in distinct areas of the law, the reader will find out how private law and private international law instruments can serve public policy goals such as the protection of the environment, product safety or services of general economic interest and how these instruments interact with regulation in the proper sense. A must for those who want to explore the borderline if it exists between public and private law in the EU. Jules Stuyck, Leuven University, Belgium. In the context of the current debate on the desirability and process of forming European private law (EPL), this book considers one fundamental question addressing its descriptive and normative dimension.

does and should EPL pursue regulatory objectives beyond market integration The editors argue that because national categories are of little help in grasping the characteristics of a multi level regulatory system it is necessary to link three perspectives private law regulation and conflict of laws This book explores this interaction in four distinct fields product liability environmental protection public utilities and e commerce The results show that EPL is highly regulatory and that the implications of this change have not been adequately considered by institutions and by scholars The Regulatory Function of European Private Law will be of great interest to academics of law as well as to private and public lawyers and European policymakers
