Professional Hunters For A Changing Africa:

Contested Karoo: Interdisciplinary perspectives on change and continuity in South Africa's drylands Cherryl Walker, M Timm Hoffman, 2024-05-15 This interdisciplinary collection explores significant land use changes in South Africa's semi arid Karoo region and their implications for social justice and the environment across different scales. It brings together recent scholarship by established and younger researchers in both the social and the natural sciences to examine the ways in which the Karoo is being reconfigured as a new resource frontier and the tensions and contestations that result. Along with ongoing mining major investments in astronomy notably the Square Kilometre Array radio telescope in renewable and non renewable sources of energy solar wind potential shale gas mining in biodiversity conservation and commercial game farming are reshaping land use and authority in this vast and long marginalised area. While promising significant benefits to society at large these developments are built on older histories of dispossession and extractivism histories that many Karoo residents fear are being reproduced in new forms today. Collectively these dynamics place this unique region at the centre of national and global concerns around climate change the politics of knowledge production the conservation of threatened biodiversity and the meaning and possibility of sustainable development. These issues are explored through a series of case studies of selected developments complemented by chapters providing more historical context and general overviews. While challenging perceptions of this region as a peripheral wasteland this collection raises conceptual and policy questions that resonate far beyond the Karoo itself. It also highlights the importance of interdisciplinary collaboration in research aimed not only at understanding but also at responding appropriately to the mounting challenges of our time. *Experiences of Climate Change Adaptation in Africa* Walter Leal Filho, 2011-08-08 It is widely acknowledged that in addition to global and regional efforts to cope with climate change by means of mitigation measures adaptation initiatives can and perhaps should play a key role in enabling communities from across Africa to better handle the problems related to it. Due to the fact that experiences in climate change adaptation in Africa are poorly documented this book provides an attempt to address the perceived need for better documentation and dissemination of African experiences on climate change adaptation. **Conservation in the Context of a Changing World** Bertie J. Weddell, 2023-10-12 This comprehensive book promotes understanding of the past challenges to and current opportunities in the conservation of the natural world. **Twelve Inventions Which Changed America** Gerhard Falk, 2013-02-13 This book describes twelve inventions that transformed the United States from a rural and small town community to an industrial country of unprecedented power. These inventions demonstrate that no one person is ever responsible for technological advances and that the culture produces a number of people who work together to create each new invention. The book also shows the influences of technology on society and examines the beliefs and attitudes of those who partake in technological advances. The book is both a sociological analysis and a history of technology in the United States in the past two hundred years. Investigative Journalism Hugo de Burgh, 2000 Investigative
