PHP Solutions David Powers,2007-04-30 You want to make your websites more dynamic by adding a feedback form creating a private area where members can upload images that are automatically resized or perhaps storing all your content in a database The problem is you re not a programmer and the thought of writing code sends a chill up your spine Or maybe you ve dabbled a bit in PHP and MySQL but you can t get past baby steps If this describes you then you ve just found the right book PHP and the MySQL database are deservedly the most popular combination for creating dynamic websites They re free easy to use and provided by many web hosting companies in their standard packages Unfortunately most PHP books either expect you to be an expert already or force you to go through endless exercises of little practical value In contrast this book gives you real value right away through a series of practical examples that you can incorporate directly into your sites optimizing performance and adding functionality such as file uploading email feedback forms image galleries content management systems and much more Each solution is created with not only functionality in mind but also visual design But
