**Designing With Light** Jason Livingston, 2014-10-23 A comprehensive introduction to the theory and practice of lighting design. *Designing With Light: The Art, Science and Practice of Architectural Lighting Design* is a comprehensive introduction to the intelligent use of lighting to define and enhance a space. The book explores all aspects of the process, including aesthetics, technology, and practicalities, in a clear, concise manner designed to provide the reader with a full working knowledge of lighting design. Color illustrations throughout demonstrate the real-world effects of the concepts presented, and the companion website offers video animations and exercises to better illuminate the art and science of lighting. The book addresses the considerations that should be a part of any designer's process and provides thorough guidance on meeting the various demands with smarter design. Lighting is an essential element of interior design, and despite its ubiquity, it is difficult to truly master. A designer with a fundamental and conceptual understanding of light is empowered to create simple, typical spaces or work intelligently with lighting consultants on more complex projects. *Designing With Light* contains special discussions on color, light, and health, as well as the latest information on energy-efficient lighting control systems and other technologies. Topics include physics, psychology, and perception of light; current and future lighting technology; communication, documentation, and the design process; sustainability; daylighting and energy efficiency. The book also contains an entire chapter on building and energy codes, as well as practical guidance on photometrics and calculations. Lighting can make or break an otherwise well-designed space, so designers need the background to be able to think intelligently about illumination factors during all stages of the process. With comprehensive coverage and thorough explanation, *Designing With Light* is a complete resource for students and professionals alike.
