Professional Education For General Practice:

Higher Professional Education for General Practitioners Ed Peile, Glynis Buckle, Derek Gallen, 2018-08-08 Higher Professional Education for General Practitioners is a practical guide on the best ways to plan educational and vocational training needs throughout professional practice. It clearly outlines the underlying issues surrounding the introduction of higher professional education (HPE) enabling newly qualified professionals to focus on areas that they feel less competent in and areas that require additional training. In an easy to read format it provides all the necessary information to assist readers undertaking HPE and for all those setting up educational programmes for newly qualified GPs in the first year after their vocational training scheme.

Professional Education for General Practice Peter Havelock, 1995 Vocational training for general practice has been tremendously successful over the past two decades but the need became apparent at the beginning of the 1990s for revision of the education of GP trainers already experienced in setting up a training practice who were demanding a fresh more detailed consideration of the educational aspects of vocational training. The authors of *Professional Education for General Practice* comprise general practitioners from training practices, regional advisers in primary care and an expert in adult education. They describe the history of vocational training and examine the educational requirements of adult learners then go on to discuss particular aspects of curriculum design, assessment, teaching methods, trainer/trainee relationships and evaluation followed by an appraisal of what changes are needed in training for general practice in the future. Throughout the preparation of the book the authors worked closely with general practice trainers and trainees as well as their educators thus ensuring that the book is completely appropriate for these groups. This book is essential for everyone involved in teaching GP trainers as well as for the trainers themselves and will be of interest to doctors training in primary care.

Professional Practices Tony Becher, 2018-04-17 There is recurrent public concern with enhancing the quality of professional performance. What is the contemporary understanding of professionalism? Are the needs of professionals in various fields being met in today's world as what is commonly called continuing professional development has become of a sizable industry? Many books treat the professions as a homogeneous group and view them from an external standpoint. In *Professional Practices* Tony Becher investigates the differences as well as the similarities between and within professional groupings and presents the perspectives of insiders. One particular theme concerns the main patterns of change in professional careers and the specific problems faced by women professionals in a largely male dominated environment. Brilliantly written the book focuses on six professions: medicine, pharmacy, law, accountancy, architecture and structural engineering. The material is based on 190 interviews with a variety of members of the six professions. Becher's book offers original and sensitive insight into the working lives of practitioners and an understanding of the ideas and values they embrace. He argues that their high sense of commitment stems from a concern to enhance their individual reputations and to maintain their collective professional status. Becher highlights a variety of activities in which these professionals are

engaged and the reasons for their responses to social and political pressures from outside their fields Above all he seeks to demystify professionalism and to show that professional people share with others a wide range of universal human feelings and concerns A postscript raises the issue of why Diversities are little involved with continuing education in the professions Practicing professionals will benefit from this insight into how people in their own and other professions cope with similar problems Becher's volume will be particularly appealing to educationists policymakers and social scientists interested in the subject of professionalism those involved in the provision of initial and mid career change for the professions and those with a lay interest in the topic
