Journalism and Social Media Diana Bossio, 2017-10-25 This book offers a comprehensive investigation of the ways in which social media has affected change to the constitution of mainstream journalism The volume does this in a unique way by tracing the links between the different changes social media has brought to individual journalism practice organisational processes and policies and institutional understandings of journalism The role of social media platforms in the changing professional landscape of journalism is explored both in terms of the changes that social media platforms have impacted on journalism but also the way in which journalistic use of social media has impacted on particular uses of these platforms Therefore Journalism and Social Media is not simply a description of changed journalistic practices but endeavours to

encapsulate a complex and integrated techno social relationship incorporating both the individual practices of journalists as well as the larger organisational and institutional changes that have occurred due to the increasing use of social media to investigate present and disseminate news

So You Want To Be A Journalist? Bruce Grundy, Martin Hirst, Janine Little, Mark Hayes, Greg Treadwell, 2012-09-17 Explores the world of journalism and contains instructions and practical advice on all facets of reporting

Journalism Worthy of the Name Herdís Thorgeirsdóttir, 2005-06-01 The subject of this study is freedom within the press the nature and limits of the protection afforded to the journalistic imparting process which has been a neglected area of research The analysis draws on the classical defenders of freedom of speech Milton and Mill to show that at the dawn of the 21st century the intertwined alliance between big business and public authorities resulting in the widespread phenomena of self censorship within the media constitutes an almost insurmountable obstacle Instead of enlightening the public and inspiring the individual the press may be contributing to an inert public and individual cowardice antithetical to the objectives of human dignity and democracy The core of the problem is that prima facie the infringement of freedom within the media is not exercised on legal premises and cannot therefore be solved within the legal framework The operation of the press in society is conditioned by three types of regulation legal regulation market regulation and self regulation Legal regulation does not adequately presuppose the impact of the latter as it is based on the assumption that press freedom is mainly a negative liberty The book explores the affirmative side of Article 10 of the European Convention on Human Rights to guarantee press freedom that is not merely illusory but practical and effective Convention jurisprudence has not only influenced the domestic courts of the Contracting Parties but also the legislators of the Member States In an era of globalization dominant media operators wield power in their own domestic markets to impede national regulators in adopting interventionist media policies to secure journalistic freedoms The Convention jurisprudence represents a kind of European ius commune which is here set in the context of an analysis reflecting the problems and values at issue and offering recommendations to alleviate a situation which threatens democratic ideals and public spirited journalism

Viva Journalism! John Calhoun Merrill, Ralph Lynn Lowenstein, 2010 In a previous book John Merrill and Ralph Lowenstein were the first journalism academics in America to predict correctly that newspapers and magazines as we know them would soon disappear to be replaced by digitized products Drawing on their long experience in journalism and journalism education they lay out in this

book their observations suggestions and predictions not only for the American media but for the education of future journalists They believe many media moguls have abused their fiduciary responsibility to maintain the financial strength and credibility of the press They believe few university presidents understand the important relationship between journalism education and political democracy They describe the chain of neglect that has led to press insolvency staff unemployment and J school misdirection They believe print journalism will be the strongest form of journalism well into the future although the print will not be on paper It will be on what the authors call an s slate silicon slate and they believe that every individual from kindergartner to senior citizen will a personal s slate in the future to retrieve and read books magazines and newspapers Merrill and Lowenstein assert that readers of the s slate will pay for everything they read The co authors observe that journalism education s ties to professional journalism are more problematic than at any time in their mutual history and that there is an unfortunate lack of self examination about this tragic disconnect in both academe and the mass media One remedy they suggest is the addition of a half year to the undergraduate curriculum in which students immerse themselves in an intensive practicum involving print radio and television The reward at the end will be a meaningful certification in addition to their bachelor s degree The co authors also suggest that faculty should serve the media better and teach university administrators better about the true worth of journalism education to the political system

sensitive stories As a result a group of journalists stands at the forefront of some of China's most dramatic social and political changes This book is the first to systematically explore why some Chinese journalists decide to challenge Communist Party power holders and the censorship system Based on 18 months of fieldwork interviews with over 70 Chinese journalists and academics and analysis of nearly 20 000 Chinese newspaper articles it investigates the motivation behind news workers who often brave the perils of challenging an authoritarian system Rather than being driven by commercial pressures or financial inducements the book suggests that many aggressive journalists push the limits of acceptable coverage because of their sense of public spirit and their professional role orientation It argues that ultimately these advocate journalists matter because they challenge specific policies and are changing China one article at a time By investigating these path breaking journalists the book engages with literature across the social sciences on contentious politics and social movements political communication media theory and the sociology of professions Therefore it will be of great interest to students and scholars of Chinese Studies Politics and Media Studies

Making Hard Choices in Journalism Ethics David E. Boeyink, Sandra L. Borden, 2010-04-05 This book teaches students how to make the difficult ethical decisions that journalists routinely face By taking a case based approach the authors argue that the best way to make an ethical decision is to look closely at a particular situation rather than looking first to an abstract set of ethical theories or principles This book goes beyond the traditional approaches of many other journalism textbooks by using cases as the starting point for building ethical practices Casuistry the technical name of such a method develops provisional guidelines from the bottom up by reasoning analogically from an easy ethical case the paradigm to harder ethical cases Thoroughly

grounded in actual experience this method admits more nuanced judgments than most theoretical approaches *Network Journalism* Ansgard Heinrich, 2011-04-26 Drawing on current theoretical debates in journalism studies and grounded in empirical research Heinrich here analyzes the interplay between journalistic practice and processes of globalization and digitalization She argues that a new kind of journalism is emerging characterized by an increasingly global flow of news as well as a growing number of news deliverers Within this transformed news sphere the roles of journalistic outlets change They become nodes arranged in a dense net of information gatherers producers and disseminators The interactive connections among these news providers constitute what Heinrich calls the sphere of network journalism
