The Dreyfus Affair and the Crisis of French Manhood Christopher E. Professions and the French State, 1700-1900 Gerald L. Geison, 2016-11-11 This collection of essays represents the first focused attempt to treat the professions in France as a single large historical problem It is at once a contribution to the history of the professions and to the social history of France The essays point toward a common conclusion in the French context by striking contrast to standard Anglo American assumptions professional autonomy power and success virtually require dependence on the state

Chemistry, Pharmacy and Revolution in France, 1777-1809 Jonathan Simon, 2016-04-08 This book explores the history of pharmacy in France and its relationship to the discipline of chemistry as it emerged at the beginning of the nineteenth century It argues that an appreciation of the history of pharmacy is essential to a full understanding of the constitution of modern science in particular the discipline of chemistry As such it provides a novel interpretation of the chemical revolution c 1770 1789 that will no doubt generate much debate on the place of the chemical arts in this story a question that has hitherto lacked sufficient scholarly reflection Furthermore the book situates this analysis within the broader context of the French Revolution arguing that an intimate and direct link can be drawn between the political upheavals and our vision of the chemical revolution The story of the chemical revolution has usually been told by focusing on the small group of French chemists who championed Lavoisier's oxygen theory or else his opponents Such a perspective emphasises competing theories and interpretations of critical experiments but neglects the challenging issue of who could be understood as practising chemistry in the eighteenth century In contrast this study traces the tradition of pharmacy as a professional pursuit that relied on chemical techniques to prepare medicines and shows how one of the central elements of the chemical revolution was the more or less conscious disassociation of the new chemistry from this ancient chemical art

Nationalizing Science Alan J. Rocke, 2000-11-08 After looking at the early careers of Wurtz's two mentors Liebig and Jean Baptiste Dumas Rocke describes Wurtz's life and career in the politically complex period leading up to 1853 He then discusses the turning point in Wurtz's intellectual life his conversion to the reformed chemistry of Laurent Gerhardt and Williamson and his efforts to persuade his colleagues of the advantages of the new system In 1869 Adolphe Wurtz 1817-1884 called chemistry a French science In fact however Wurtz was the most internationalist of French chemists Born in Strasbourg and educated partly in the laboratory of the great Justus Liebig he spent his career in Paris where he devoted himself to introducing German ideas into French scientific circles His life therefore provides an excellent vehicle for considering the divergent trajectories of French and German chemistry and by extension French and German science during this crucial period After looking at the early careers of Wurtz's two mentors Liebig and Jean Baptiste Dumas Rocke describes Wurtz's life and career in the politically complex period leading up to 1853 He then discusses the turning point in Wurtz's intellectual life his conversion to the reformed chemistry of Laurent Gerhardt and Williamson and his efforts social and political as well as scientific to persuade his colleagues of the advantages of the new system He looks at political patronage or the lack thereof and at the insufficient material support from the French government during the middle decades of the century From there Rocke goes on to examine the rivalry between Wurtz and Marcellin Berthelot the debate over atoms versus equivalents and the reasons for Wurtz's failure to win acceptance for his ideas The story offers insights into the changing status of science in this period and helps to explain the eventual course of both French and German chemistry

Nineteenth-century Oxford Michael G. Brock, Mark C. Curthoys, 1997 *Health and Medicine in the circum-Caribbean, 1800-1968* Juanita De Barros, Steven Palmer, David Wright, 2010-11-16 Health and medicine in colonial environments is one of the newest areas in the history of medicine but one in which the Caribbean is conspicuously absent Yet the complex and fascinating history of the Caribbean borne of the ways European colonialism combined with slavery indentureship migrant labour and plantation agriculture led to the emergence of new social and cultural forms which are especially evident the area of health and medicine The history of medical care in the Caribbean is also a history of the transfer of cultural practices from Africa and Asia the process of creolization in the African and Asian diasporas the perseverance of indigenous and popular medicine and the emergence of distinct forms of western medical professionalism science and practice This collection which covers the French Hispanic

Dutch and British Caribbean explores the cultural and social domains of medical experience and considers the dynamics and tensions of power. The chapters emphasize contestations over forms of medicalization and the controls of public health and address the politics of professionalization not simply as an expression of colonial power but also of the power of a local elite against colonial or neo colonial control. They pay particular attention to the significance of race and gender focusing on such topics as conflicts over medical professionalization control of women's bodies and childbirth and competition between European and Indigenous healers and healing practices. Employing a broad range of subjects and methodological approaches this collection constitutes the first edited volume on the history of health and medicine in the circum Caribbean region and is therefore required reading for anyone interested in the history of colonial and post colonial medicine.

The Work of France James R. Farr, 2008-12-16 This clearly written and deeply informed book explores the nature and meaning of work in early modern France. Distinguished historian James R. Farr considers the relationship between material life specifically the work activities of both men and women and the culture in which these activities were embedded. This culture he argues helped shape the nature of work invested it with meaning and fashioned the identities of people across the social spectrum. Farr vividly traces the daily lives of peasants common laborers domestic servants prostitutes street vendors craftsmen and women merchants men of the law medical practitioners and government officials. Work was recognized and valued as a means to earn a living but it held a greater significance as a cultural marker of honor identity and status. Constants and continuities in work activities and their cultural aspects shared space with changes that were so profound and sweeping that France would be forever transformed. The author focuses on three salient interconnected and at times conflicting developments the extension and integration of the market economy the growth of the state's functions and governing apparatus and the intensification of social hierarchy. Presenting a unified and compelling argument about the role of labor in society Farr addresses a complex set of questions and succeeds masterfully at answering them. With its stylish writing and clear themes this book will find a broad audience among students and scholars of early modern Europe French history economics gender studies anthropology and labor studies.

Essays in the History of Therapeutics William F. Bynum, Vivian Nutton, 1991 Therapeutics has been central to the medical enterprise in all times and all places but a subject that is all too often neglected by historians. The essays in this volume follow a range in chronology from antiquity to the 1980s and in geography from the Mediterranean Basin to the New World. They touch on such matters as diet and drugs magic and surgery orthodox and unorthodox approaches. What they share is an attempt to get beyond the easy dismissal of almost all therapeutics before the twentieth century as meaningless and harmful and to examine concrete

dimensions of the therapeutic encounter in its social professional religious and scientific reverberations **The Political Economy of Virtue** John Shovlin, 2006 *The Political Economy of Virtue* offers an interpretation of political economy in the second half of the 18th century It covers the key turning points in the development of French political economy

Fitzsimmons, 1987 This investigation not only revises what historians have long thought of the attitude of barristers toward the French Revolution but also offers insights into the corporate character of Old Regime society and how the Revolution affected it Fitzsimmons's study suggests that many propertied commoners during the Revolution were not politically engaged that they were not necessarily associated with a party or cause simply because of their place within a set of social relationships **French Medical Culture in the**

Privilege Gail Bossenga, 2002-05-09 This study analyzes the political and fiscal origins of the French Revolution by looking at the relationship between the royal government and privileged corporate bodies at local level Utilizing a neo Tocquevillian approach it argues that the monarchy undermined its own attempts at reform by extending central authority while at the same time it continued to rely upon corporate structures and monopolies to finance the state The unresolvable institutional conflicts had the effect of politicising members of the privileged elite and eventually led many of them to embrace a rhetoric of citizenship accountability and civic equality that had far reaching and unanticipated consequences When Lille s bourgeoisie consolidated a municipal revolution in 1789 they followed a programme that was politically liberal but economically conservative Arranged as a series of case studies the book illuminates the structure of political power in the Flemish provincial estates the growth of royal taxation the problem of municipal credit the role of venal officeholders and the relationship of the revolutionary bourgeoisie to monopolies of the guilds
