With roughly 25% of those teaching college classes belonging to a union, higher education is one of the most heavily organized industries in the United States. Substantial research-based literature exists as scholars have been studying the topic for a half of a century. Following an overview of its history and context, this monograph synthesizes and analyzes the existing research on faculty and graduate student unionization. It points to evolving understandings of faculty attitudes regarding collective bargaining and the findings on the relationships between unionization and compensation, satisfaction, procedural protections, organizational effectiveness, and related issues for tenure-line faculty. Additional chapters consider the more limited research on non-tenure line faculty and graduate student instructors. As such, this monograph illuminates the accepted understandings, contested arguments, and the substantial gaps in understandings that remain. This is the third issue of the 43rd volume of the Jossey-Bass series *ASHE Higher Education Report*. Each monograph is the definitive analysis of a tough higher education issue based on thorough research of pertinent literature and institutional experiences. Topics are identified by a national survey. Noted practitioners and scholars are then commissioned to write the reports with experts providing critical reviews of each manuscript before publication.

**American Higher Education in the Postwar Era, 1945-1970** Roger L. Geiger, Nathan M. Sorber, Christian K. Anderson, 2017-09-01 After World War II returning veterans with GI Bill benefits ushered in an era of unprecedented growth that fundamentally altered the meaning, purpose, and structure of higher education. This volume explores the multifaceted and tumultuous transformation of American higher education that occurred between 1945 and 1970 while examining the changes in institutional forms, curricula, clientele, faculty, and governance. A wide range of well-known contributors cover topics such as the first public university to explicitly serve an urban population, the creation of modern day honors programs, how teachers colleges were repurposed as state colleges, the origins of faculty unionism and collective bargaining, and the dramatic student protests that forever changed higher education. This engaging text explores a critical moment in the history of higher education, signaling a shift in the meaning of a college education, the concept of who should and who could obtain access to college, and what should be taught.

*Professors, Unions, and American Higher Education* Everett Carl Ladd, Seymour Martin Lipset, 1973     Resources in Education, 1990-03     *Research in Education*, 1974     IJER Vol 2-N2 International Journal of Educational Reform, 1993-04-01 The mission of the International Journal of Educational Reform (IJER) is to keep readers up to date with worldwide developments in education reform by providing scholarly information and practical analysis from recognized international authorities. As the only peer-reviewed scholarly publication that combines authors' voices without regard for the political affiliations, perspectives, or research methodologies, IJER provides readers with a balanced view of all sides of the political and educational mainstream. To this end, IJER includes but is not limited to inquiry-based and opinion pieces on developments in such areas as policy, administration, curriculum, instruction, law, and research. IJER should thus be of interest to professional educators with decision-making roles and policymakers at all levels, since it provides a broad-based conversation between and among policymakers, practitioners, and academicians about reform goals, objectives, and methods for success throughout the world. Readers can call on IJER to learn from an international group of reform implementers by discovering what they can do that has actually worked. IJER can also help readers to understand the pitfalls of current reforms in order to avoid making similar mistakes. Finally, it is the mission of IJER to help readers to learn about key issues in school reform from movers and shakers who help to study and shape the power base directing educational reform in the U.S. and the world.

**The Moral Dimensions of Academic Administration** Rudolph H. Weingartner, 1999 What distinguishes academic administration from administration or managing in business? Rudolph H. Weingartner argues that colleges and universities are founded to serve certain purposes; they are supported by governments and private individuals, and as professional institutions, they have students among others as clients to whom they owe education services in ways analogous to the obligations hospitals have via and vis their patients. Academic administration is not just another job of managing, but a

calling that importantly assists institutions to carry out their missions

**Voices of Asian Americans in Higher Education** Festus E. Obiakor, Ying Hui-Michael, 2018-10-01 *Voices of Asian Americans in Higher Education* Unheard Voices is a unique and historical book Asian Americans are often portrayed as model minority yet their personal and educational experiences are often unheard In this book 10 Asian American educators and scholars present realistic pictures of America's higher education using personal narratives The contributors in this book come from different regions and teach in different colleges and universities and coincidentally they all endure the outsider category formerly as students and now as professors and leaders This outsider status can be emotionally overwhelming and psychologically unnerving This status hampers opportunities for Asian Americans to grow and maximize their fullest potential Though they develop different strategies to address their outsider label it does not make it comfortable But time and time again they have proven that they can succeed In this technological age we must value unending truths as we educate ourselves and others We hope that this book will be an educational and informational resource for students administrators and faculty in higher education and also educational policy makers and stakeholders
