growing significance and status of the role of General Counsel has been accompanied by growth in legal risk as a phenomenon of importance. In house lawyers are regularly exhorted to be more commercial, proactive and strategic to be business leaders and not mere lawyers but they are increasingly exposed for their roles in organisational scandals. This book poses the question how far does going beyond being a lawyer conflict with or entail being more ethical. It explores the role of in house lawyers by calling on three key pieces of empirical research: two tranches of interviews with senior in house lawyers and senior compliance staff and an unparalleled large survey of in house lawyers. On the basis of this evidence the authors explore how ideas about in house roles shape professional logics, how far professional notions such as independence play a role in those logics and the ways in which ethical infrastructure are managed or are absent from in house practice. It concludes with a discussion of whether and how in house lawyers and their regulators need to take professionalism and professional ethicality more seriously.
