Political Psychology of Turkish Political Behavior Cengiz Erisen, 2016-04-14 The primary motivation for this book is to focus on something crucial that is missing in Turkish political science: well-founded theories on the Turkish voter and empiricism in scholarly research. Given the absence of such theories, one could ask what then the best model is for explaining a Turkish citizen's vote choice and political behaviour and what schools of thought Turkish political science has. Unfortunately, it is not possible to offer a satisfactory response to either question at this point and among the clear deficiencies in the current literature, the primary one is the lack of a robust model explaining how Turkish citizens form their political attitudes, engage in political participation or cast their votes. With these important questions in mind, this book aims to generate an interest in the theoretical and methodological

tools that one can employ to conduct research contributing to the needs of the literature particularly in political behaviour and political psychology This book expands our understanding about the processes and the mechanisms of Turkish political behaviour and contributes to the foundations of theory building in the literature This book was published as a special issue of Turkish Studies **The Political Psychology of Israeli Prime Ministers** Yael S. Aronoff, 2014-05-29 This book examines

leaders of the seemingly intractable conflict between Israel and its Palestinian neighbors It takes as an intellectual target of opportunity six Israeli prime ministers asking why some of them have persisted in some hard line positions but others have opted to become peacemakers This book argues that some leaders do change and above all it explains why and how such changes come about This book goes beyond arguing simply that leaders matter by analyzing how their particular belief systems and personalities can ultimately make a difference to their country's foreign policy especially toward a long standing enemy Although no hard liner can stand completely still in the face of important changes only those with ideologies that have specific components that act as obstacles to change and who have an orientation toward the past may need to be replaced for dramatic policy changes to take place *Individual Agency and Policy Change at the United Nations* Ingvild

Bode, 2015-03-24 This book highlights how temporary international civil servants play a crucial role in initiating processes of legal and institutional change in the United Nations system These individuals are the missing creative elements needed to fully understand the emergence and initial spread of UN ideas such as human development sovereignty as responsibility and multifunctional peacekeeping The book Shows that that temporary UN officials are an actor category which is empirically crucial yet usually neglected in analytical studies of the UN system Focussing on these particular individual actors therefore allows for a better understanding of complex UN decision making Demonstrates how these civil servants matter looking at what their agency is based on Offering a new and distinctive model Bode seeks to move towards a comprehensive conceptualisation of individual agency which is currently conspicuous for its absence in many theoretical approaches that address policy change Uses three key case studies of international civil servants Francis Deng Mahbub ul Haq and Marrack Goulding to explore the possibilities of this specific group of UN individuals to act as agents of change and thereby test the prevailing notion that international bureaucrats can only act as agents of the status quo This book will be of great interest to students and scholars of international organizations and the United Nations *Personalizing Politics and Realizing*

Democracy Gian Vittorio Caprara, Michele Vecchione, 2017-02-15 Few people today would challenge the legitimacy of democracy as the form of government most congenial to modern day citizenship as it requires its members to treat each other as equals and to cooperate in the shared pursuit of conditions that maximize both the individual's potential and the achievement of a public welfare However a number of facts challenge these deeply rooted ideals declining political participation along with skepticism and dissatisfaction with the function of democracy has spread citizens increasing capacity to control their own circumstances within their private economic and social spheres is at odds with their inability to exert

control over their elected representatives and the shift of opposing radical coalitions towards more pragmatic and ideologically elusive platforms aimed to attract a larger constituency of the electorate has greatly diluted the identity of political parties In *Personalizing Politics and Realizing Democracy* authors Gian Vittorio Caprara and Michele Vecchione present the ever growing reciprocal relationship between personality and politics and assert that politics are not only increasingly dependent on the likes and dislikes of its citizenship but ultimately on the personalities of political candidates attracting these voters preferences In this book Caprara and Vecchione draw from recent research in personality psychology that offer a decisive role in understanding the major changes that have occurred within politics in the last several decades

Understanding Prime-Ministerial Performance Paul Strangio,Paul 't Hart,James Walter,2013-03-28 At the beginning of the twenty first century prime ministers loom larger in the consciousness of their nations than perhaps in any previous era But how well do we really understand the variables of prime ministerial performance and specifically why some prime

ministers apparently flourish in the role while others wither This study examines how prime ministers perform as leaders of their governments parties and nations It offers new ways of thinking about prime ministerial power and leadership and systematic empirical studies of prime ministerial leadership practices in four Westminster democracies the United Kingdom Canada Australia and New Zealand The volume features contributions from leading political scientists from all of these countries and is organised into three major sections understanding power in prime ministerial performance prime ministers and their parties and evaluating prime ministerial performance Through its collaborative and multifaceted approach the volume demonstrates that there are no hard and fast propositions or rules of thumb to capture what it is that makes us think of some prime ministers as so much more effective than others Instead it highlights the importance for students of executive government to grasp the contingent interplay between personal institutional and contextual factors in understanding and evaluating prime ministerial performance
