

J2ME Chapter 1. Scrollable Messages

The ScrollIMBDemo MIDlet is a test rig for a CustomItem subclass called ScrollableMessageBox. ScrollableMessageBox displays a list of messages, and allows the user to scroll up and down through them. Since the messages box is a CustomItem, it can be easily integrated into forms alongside other items.

Figure 1 shows ScrollIMBDemo in action.

Figure 1. ScrollIMBDemo with Some Messages.

The user types a message into the "Enter:" textfield at the top of the form, presses the "Send" command, and the message is added to the messages box. The messages are automatically numbered, starting from 1.

Once the box has filled up, the messages start scrolling upwards, so the latest messages remain visible (see Figure 2).
