Programming Languages and Systems G. Ramalingam, 2008-11-14 This volume contains the

proceedings of the 6th Asian Symposium on Programming Languages and Systems APLAS 2008 which took place in Bangalore December 9-11, 2008. The symposium was sponsored by the Asian Association for Foundation of Software AAFS and the Indian Institute of Science. It was held at the Indian Institute of Science as part of the institute's centenary celebrations and was co-located with FSTTCS Foundations of Software Technology and Theoretical Computer Science 2008 organized by the Indian Association for Research in Computer Science IARCS. In response to the call for papers, 41 full submissions were received. Each submission was reviewed by at least four Program Committee members with the help of external reviewers. The Program Committee meeting was conducted electronically over a 2-week period. After careful discussion, the Program Committee selected 20 papers. I would like to sincerely thank all the members of the APLAS 2008 Program Committee for their excellent job and all the external reviewers for their invaluable contribution. The submission and review process was managed using the EasyChair system. In addition to the 20 contributed papers, the symposium also featured three invited talks by Dino Distefano (Queen Mary University of London, UK), Radha Jagadeesan (DePaul University, USA), and Simon Peyton Jones (Microsoft Research, Cambridge, UK). Many people have helped to promote APLAS as a high quality forum in Asia to serve programming language researchers worldwide. Following a series of well-

attended workshops that were held in Singapore (2000), Daejeon (2001), and Shanghai (2002), the first few formal symposiums were held in Beijing (2003), Taipei (2004), Tsukuba (2005), Sydney (2006), and Singapore (2007).

Programming Languages and Systems Gert Smolka, 2003-06-26. ETAPS 2000 was the third instance of the European Joint Conferences on Theory and Practice of Software. ETAPS is an annual federated conference that was established in 1998 by combining a number of existing and new conferences. This year it comprised five conferences: FOSSACS, FASE, ESOP, CC, TACAS, five satellite workshops, CBS, CMCS, CoFI, GRATRA, INT, seven invited lectures, a panel discussion, and ten tutorials. The events that comprise ETAPS address various aspects of the system development process, including specification, design, implementation, analysis, and improvement. The languages, methodologies, and tools which support these activities

are all well within its scope. Different blends of theory and practice are represented with an inclination towards theory with a practical motivation on one hand and soundly based practice on the other. Many of the issues involved in software design apply to systems in general including hardware systems and the emphasis on software is not intended to be exclusive.

Programming Languages and Systems Andrew Gordon, 2010-03-17 This book constitutes the refereed proceedings of the 19th European Symposium on Programming ESOP 2010 held in Paphos, Cyprus in March 2010 as part of ETAPS 2010 the European Joint Conferences on Theory and Practice of Software. The 30 revised full papers presented together with two invited talks, one abstract and one full, were carefully reviewed and selected from 121 full paper submissions. The topics addressed include programming paradigms and styles, methods and tools to write and specify programs and languages, methods and tools for reasoning about programs, methods and tools for implementation and concurrency and distribution.
