 Grembowski, 2001-04-13 As more and more money is spent developing programs and services to solve health problems how
 can one know if a specific health program works or what it would take to improve it Aimed at addressing this issue The
 Practice of Health Program Evaluation provides readers with the methods to evaluate health programs and the expertise to
 navigate the political terrain so as to work more effectively with decision makers and other groups To convey these principles
 Grembowski uses the metaphor of evaluation being a three act play with a variety of actors and interest groups each having a
 role that involves entering and exiting the stage at different points in the evaluation process *Library of Congress Catalogs*

 internal and statistical validity that correspond to each evaluation design Laura Langbein then presents a variety of methods
 for program analysis and advise readers on how to select the mix of methods most appropriate for the issues they deal with
