Advances in Digital Science Tatiana Antipova,2021-03-14 This book gathers selected papers that were submitted to the 2021 International Conference on Advances in Digital Science ICADS 2021 that aims to make available the discussion and the publication of papers on all aspects of single and multi disciplinary research on Conference topics <https://ics.events/icads2021/> ICADS 2021 was held on February 19-21, 2021. An important characteristic feature of Conference is the short publication time and world wide distribution. Written by respected researchers, the book covers a range of innovative topics related to Advances in Digital Agriculture for use in presentations or handouts for any level students, researchers, etc. for the further development of authors' scientific career, e.g. by citing and attaching contributions to job or grant application.

Catalogue United States Naval Academy,1990 Catalog United States Naval Academy,1990 Proceedings of 4th International Conference in Software Engineering for Defence Applications Paolo Ciancarini,Alberto Sillitti,Giancarlo Succi,Angelo Messina,2016-01-25 This book presents high quality original contributions on new software engineering models, approaches, methods and tools and their evaluation in the context of defence and security applications. In addition, important business and economic aspects are discussed with a particular focus on cost-benefit analysis, new business models, organizational evolution and business intelligence systems. The contents are based on presentations delivered at SEDA 2015, the 4th International Conference in Software Engineering for Defence Applications, which was held in Rome, Italy, in May 2015. This conference series represents a targeted response to the growing need for research that reports and debates the practical implications of software engineering within the defence environment and also for software performance evaluation in real settings through controlled experiments as well as case and field studies. The book will appeal to all with an interest in modeling, managing and implementing defence-related software development products and processes in a structured and supportable way. *Application Development and Design: Concepts, Methodologies, Tools, and Applications* Management Association, Information Resources,2017-08-11 Advancements in technology have allowed for the creation of new tools and innovations that can improve different aspects of life. These applications can be utilized across different technological platforms. *Application Development and Design: Concepts, Methodologies, Tools, and Applications* is a comprehensive reference source for the latest scholarly material on trends, techniques and uses of various technology applications and examines the benefits and challenges of these computational developments. Highlighting a range of pertinent topics such as software design, mobile applications and web applications, this multi-volume book is ideally designed for researchers, academics, engineers, professionals, students and practitioners interested in emerging technology applications. *Overcoming Challenges in Software Engineering Education: Delivering Non-Technical Knowledge and Skills* Yu, Ligu,2014-03-31 Computer science graduates often find software engineering knowledge and skills are more in demand after they join the industry. However, given the lecture-based curriculum present in academia, it is not an easy undertaking to deliver industry standard knowledge and skills in a software engineering classroom as such lectures hardly engage or convince students.

Overcoming Challenges in Software Engineering Education Delivering Non Technical Knowledge and Skills combines recent advances and best practices to improve the curriculum of software engineering education This book is an essential reference source for researchers and educators seeking to bridge the gap between industry expectations and what academia can provide in software engineering education Scientific and Technical Aerospace Reports ,1992 **Computer**
